*The Wright Brothers* Ian Mackersey, 2004 On 17th December 1903 Orville and Wilbur Wright made the first controlled powered flights, although they failed to arouse either governmental or public interest at the time. This biography of the Wrights draws on new sources to place them in their proper context in the history and development of aviation.

*The Wright Brothers* Charles Harvard Gibbs-Smith, 2002 To mark the centenary of the Wright brothers' pioneering flights on 17 December 1903, the Science Museum will republish Gibbs Smith's classic introduction to their remarkable careers and their unique place in aviation history. The Wrights were arguably the first to make powered, sustained, and controlled flights near Kitty Hawk, NC; the aeroplane, the first Flyer, was of their own design and construction and had been developed over a period of three years. It was loaned to the Science Museum, London, from 1928 to 1948 and is now displayed in the National Air and Space Museum, Smithsonian Institution, in Washington, DC; a reproduction remaining in London. This edition of Gibbs Smith's authoritative text, first published in 1987, is illustrated with a number of historic photographs and detailed diagrams.

**Canton's Pioneers in Flight** Kimberly A. Kenney, 2008 Canton boasts a rich aviation heritage reaching back to the earliest pioneers of flight. Local resident Frank S. Lahm founded the Aero Club of Ohio here, and his son Frank P. Lahm worked with the Wright brothers on some of their earliest test flights. William Martin's monoplane, the first single-wing airplane in the world, was invented here. Other Canton firsts include Martin's wife Almina, the world's first female airplane pilot; Bernetta Miller, one of the first women to earn a pilot's license; and Louise Timken, the first woman to own and operate a private jet. The Timken Company developed a steel alloy here that allowed planes to fly at higher altitudes.
