Watteau, 1684-1721 Margaret Morgan Grasselli,Pierre Rosenberg,Nicole Parmantier,Antoine Watteau,1984 **Music Theory and Natural Order from the Renaissance to the Early Twentieth Century** Suzannah Clark,Alexander Rehding,2001 Music theory of almost all ages has relied on nature in its attempts to explain music The understanding of what nature is however is subject to cultural and historical differences In exploring ways in which music theory has represented and employed natural order since the scientific revolution this volume asks some fundamental questions not only about nature in music theory but also the nature of music theory In an array of different approaches ranging from physical acoustics to theology and Lacanian psychoanalysis these essays examine how the multifarious conceptions of nature located variously between scientific reason and divine power are brought to bear on music theory They probe the changing representations and functions of nature in the service of music theory and highlight the ever changing configurations of nature and music as mediated by the music theoretical discourse Curiosities and Texts Marjorie Swann,2010-11-24 A craze for collecting swept England during the sixteenth and seventeenth centuries Aristocrats and middling sort men alike crammed their homes full of a bewildering variety of physical objects antique coins scientific instruments minerals mummified corpses zoological specimens plants ethnographic objects from Asia and the Americas statues portraits Why were these bizarre jumbles of artifacts so popular In Curiosities and Texts Marjorie Swann demonstrates that collections of physical objects were central to early modern English literature and culture Swann examines the famous collection of rarities assembled by the Tradescant family the development of English natural history narrative catalogs of English landscape features that began to appear in the Tudor and Stuart periods the writings of Ben Jonson and Robert Herrick and the foundation of the British Museum Through this wide ranging series of case studies Swann addresses two important questions

How was the collection which was understood as a form of cultural capital appropriated in early modern England to construct new social selves and modes of subjectivity And how did literary texts both as material objects and as vehicles of representation participate in the process of negotiating the cultural significance of collectors and collecting Crafting her unique argument with a balance of detail and insight Swann sheds new light on material culture s relationship to literature social authority and personal identity The Age of Subtlety Javier Patiño Loira,2024-06-14 A craze for intricate metaphors referred to as conceits permeated all forms of communication in seventeenth century Italy and Spain reshaping reality in highly creative ways The Age of Subtlety Nature and Rhetorical Conceits in Early Modern Europe situates itself at the crossroads of rhetoric poetics and the history of science analyzing technical writings on conceits by such scholars as Baltasar Graci n Matteo Peregrini and Emanuele Tesauro against the background of debates on telescopic and microscopic vision the generation of living beings and the boundaries between the natural and the artificial It contends that in order to understand conceits we must locate them within the early modern culture of ingenuity that was also responsible for the engineer s machines the juggler s sleight of hand the wiles of the statesman and the discovery of truths about nature The Art of Ceramics Howard Coutts,2001-01-01 The great age of European ceramic design began around 1500 and ended in the early 19th century with the introduction of large scale production of ceramics In this illustrated history with nearly 300 color and black and white photos and reproductions curator Howard Coutts considers the main stylistic trends Renaissance Mannerism Oriental Rococo and Neoclassicism as they were represented in such products as Italian Majolica Dutch Delftware Meissen and S vres porcelain Staffordshire and Wedgwood pottery He pays close attention to changes in eating habits over the period particularly the layout of a formal dinner and discusses the development of ceramics as room decoration the transmission of images via prints marketing of ceramics and other luxury goods and the intellectual background to Neoclassicism
