Denationalizing Science E. Crawford, T. Shinn, Sverker Sörlin, 2013-06-29 Present trends indicate that in the years to come transnational science whether basic or applied and involving persons equipment or funding will grow considerably The main purpose of this volume is to try to understand the reasons for this denationalization of science its historical contexts and its social forms The Introduction to the volume sets out the socio political intellectual and economic contexts for the nationalization and denationalization of the sciences processes that have extended over four centuries The articles examine the specific conditions that have given rise to the growth of transnational science in the 20th century Among these are the need for cognitive and technical standardization of scientific knowledge products pressure toward cost sharing of large installations such as CERN the voluntary and involuntary migration of scientists and the global market for R D products that has emerged at the end of the century The volume raises many new questions for research by historians and sociologists of science and poses problems that are of concern both to scientists and science policy makers *Non-chemical Methods for Disinfestation of Stored Products* M Loganathan, Jeyan Moses, 2025-05-05 This reference book covers traditional and recent technologies in the disinfestation of stored foods Storage of durables is challenging and demands scientific management protocols Chemical fumigants have been used for decades and several reports detail their impact on the environment in addition to other concerns This book focuses on the use of non chemical methods of disinfestation in durables like cereals pulses oilseeds millets and spices It discusses important disinfestation techniques like biological control extreme temperature based approaches insect repellent packaging and nano based techniques The book also covers the detection of pests and some chemical methods of disinfestation It is an important reference for professionals researchers industry personnel and post graduate students in the field of food and grain storage **Key Features** Focuses on the non chemical methods for grain disinfestation Reviews the rising need for a shift to non chemical methods of disinfestation of stored foods Includes a blend of topics on entomology food engineering food design and regulations Discusses conventional methods of disinfestation as well as chemical approaches Covers topics like extreme temperature based approaches dielectric heating insect traps and use of inert materials *Weed Science*, 1987 *Food Processing* Kshirod Kumar Dash, Sourav Chakraborty, 2021-06-14 Non thermal operations in food processing are an alternative to thermal operations and similarly aimed at retaining the quality and organoleptic properties of food products This volume covers different non thermal processing technologies such as high pressure processing ultrasound ohmic heating pulse electric field pulse light membrane processing cryogenic freezing nanofiltration and cold plasma processing technologies The book focuses both on fundamentals and on recent advances in non thermal food processing technologies It also provides information with the description and results of research into new emerging technologies for both the academy and industry **Key features** Presents engineering focus on non thermal food processing technologies Discusses sub classification for recent trends and relevant industry information examples Different

current research oriented results are included as a key parameter Covers high pressure processing pulse electric field pulse light technology irradiation and ultrasonic techniques Includes mathematical modeling and numerical simulations Food Processing Advances in Non Thermal Technologies is aimed at graduate students professionals in food engineering food technology and biological systems engineering **Canadian Chemistry and Process Industries** ,1983 *Origins and Evolution of Life* Muriel Gargaud,Purificación López-García,Hervé Martin,2011-01-06 Devoted to exploring questions about the origin and evolution of life in our Universe this highly interdisciplinary book brings together a broad array of scientists Thirty chapters assembled in eight major sections convey the knowledge accumulated and the richness of the debates generated by this challenging theme The text explores the latest research on the conditions and processes that led to the emergence of life on Earth and by extension perhaps on other planetary bodies Diverse sources of knowledge are integrated from astronomical and geophysical data to the role of water the origin of minimal life properties and the oldest traces of biological activity on our planet This text will not only appeal to graduate students but to the large body of scientists interested in the challenges presented by the origin of life its evolution and its possible existence beyond Earth

Encyclopedia of Astrobiology Muriel Gargaud,William M. Irvine,Ricardo Amils,Philippe Claeys,Henderson James Cleaves,Maryvonne Gerin,Daniel Rouan,Tilman Spohn,Stéphane Tirard,Michel Viso,2023-07-27 Now in its third edition the Encyclopedia of Astrobiology serves as the key to a common understanding in the extremely interdisciplinary community of astrobiologists Each new or experienced researcher and graduate student in adjacent fields of astrobiology will appreciate this reference work in the quest to understand the big picture The carefully selected group of active researchers contributing to this work are aiming to give a comprehensive international perspective on and to accelerate the interdisciplinary advance of astrobiology The interdisciplinary field of astrobiology constitutes a joint arena where provocative discoveries are coalescing concerning e g the prevalence of exoplanets the diversity and hardiness of life and its chances for emergence Biologists astrophysicists bio chemists geoscientists and space scientists share this exciting mission of revealing the origin and commonality of life in the Universe With its overview articles and its definitions the Encyclopedia of Astrobiology not only provides a common language and understanding for the members of the different disciplines but also serves for educating a new generation of young astrobiologists who are no longer separated by the jargon of individual scientific disciplines This new edition offers 170 new entries More than half of the existing entries were updated expanded or supplemented with figures supporting the understanding of the text Especially in the fields of astrochemistry and terrestrial extremophiles but also in exoplanets and space sciences in general there is a huge body of new results that have been taken into account in this new edition Because the entries in the Encyclopedia are in alphabetical order without regard for scientific field this edition includes a section Astrobiology by Discipline which lists the entries by scientific field and subfield This should be particularly helpful to those enquiring about astrobiology as it illustrates the broad and detailed nature of the

field *International Food Law and Policy* Gabriela Steier, Kiran K. Patel, 2017-08-08 *International Food Law and Policy* is the first interdisciplinary piece of academic literature of its kind with a comprehensive reader friendly approach to teaching the major aspects of food regulation law policy food safety and environmental sustainability in a global context The sections are grouped by continents and focus on a range of cross disciplinary subjects such as public health international food trade the right to food intellectual property and global regulatory aspects of food production With its systematic approach this book will be a valuable resource both for professionals working in food regulation and anyone interested in the subject It provides a solid foundation for courses and master s programs in environmental management food law policy and regulation and sustainable development around the world **The Cassini-Huygens Mission** C.T. Russell, 2013-03-14 The exploration of the planets is the modern counterpart to the exploration voyages of old To reach the new world Columbus had to secure funding from Queen Isabella outfit his three ships and set sail on a long journey To explore the American Pacific Northwest Lewis and Clark had a similar task of obtaining funding purchasing equipment and going to points unknown even though their path was across land and not sea Today our journey is through space rather than across land or sea but we still travel with ships now spaceworthy craft rather than seaworthy Our spacecraft are smaller than the ships of yore crammed with electronics rather than provisions because man cannot go along on these journeys We now rely on robots to be our eyes and ears at these distant worlds Nevertheless some aspects of exploration have not changed over the centuries People are still fascinated by these unknown worlds and desire to explore them and the process of obtaining the large sums of public moneys to finance these journeys still requires much pleading with authorities **Planetary Systems** Ludwik Marian Celnikier, J. Thanh Van Tran, 1998 **Lectures in Astrobiology** Muriel Gargaud, Hervé Martin, Philippe Claeys, 2007-01-05 Based on material delivered at several summer schools this book is the first comprehensive textbook at the graduate level encompassing all aspects associated with the emerging field of astrobiology Volume II gathers another set of extensive lectures covering topics so diverse as the formation and the distribution of elements in the universe the concept of habitability from both the planetologists and the biologists point of view and artificial life The contributions are held together by the common goal to understand better the origin of life its evolution and possible existence outside the Earth s realm The volume ends with 120 pages of a very useful appendix comprising Some Astrophysical Reminders Useful Astrobiological Data and An Astrobiological Glossary *Computerworld* , 1984-09-10 For more than 40 years *Computerworld* has been the leading source of technology news and information for IT influencers worldwide *Computerworld* s award winning Web site *Computerworld.com* twice monthly publication focused conference series and custom research form the hub of the world s largest global IT media network **Subsurface Ventilation and Environmental Engineering** M.J. McPherson, 2012-12-06 This book has been written as a reference and text for engineers researchers teachers and students who have an interest in the planning and control of the environment in underground openings While directed primarily to

underground mining operations the design procedures are also applicable to other complex developments of subsurface space such as nuclear waste repositories commercial accommodation or vehicular networks The book will therefore be useful for mining civil mechanical and heating ventilating and air conditioning engineers involved in such enterprises The chapters on airborne pollutants highlight means of measurement and control as well as physiological reaction These topics will be of particular interest to industrial hygienists and students of industrial medicine One of the first technical applications of digital computers in the world s mining industries was for ventilation network analysis This occurred during the early 1960s However it was not until low cost but powerful personal computers proliferated in engineering offices during the 1980s that the full impact of the computer revolution was realized in the day to day work of most mine ventilation engineers This book reflects the changes in approach and design procedures that have been brought about by that revolution While the book is organized into six parts it encompasses three broad areas
