Placage Et Frisage:

Placage et frisage Mike Burton, 2002-08-23 Le placage consiste appliquer une feuille de bois noble ou précieux sur une structure en bois plus ordinaire ou plus résistante. Si l'aspect économique est évident, ce procédé qui s'est développé au XVIIIe siècle permet d'utiliser des bois fragiles et d'obtenir des effets décoratifs difficiles voire impossibles à obtenir avec du bois massif en particulier pour le travail et la décoration des parties courbes et des surfaces contre fil ou importantes. La première partie de ce livre présente en détail l'outillage, les matériaux, les notions de base de coupe de la feuille de bois, la préparation des surfaces, les collages, les finitions. La seconde partie montre, par exemple, quatre réalisations : pied de lampe, coffre, bureau, table combinant divers types de placage sur des surfaces planes et incurvées. Ainsi le lecteur comprend comment organiser son travail et apprend les bons gestes pour réaliser son tour des projets qui lui tiennent à cœur.
