American Landscapes Ann J. Abadie, J. Richard Gruber, 2023-10-20. *American Landscapes: Meditations on Art and Literature in a Changing World* is a major contemporary survey of landscapes in art and literature of the United States, especially the American South. Inspired by William Dunlap's extraordinary landscape *Meditations on the Origins of Agriculture in America* and a collection of forty paintings and photographs by Southern artists, this volume brings together artists, authors, and scholars to present new perspectives on art and literature both past and present. The volume includes art and text from artists John Alexander, Jason Bouldin, William Dunlap, Carlyle Wolfe, Lee Ke Francis, Linda Burgess, Randy Hayes, photographers Sally Mann, Ed Croom, and Huger Foote, museum directors Betsy Bradley, Jane Livingston, and Julian Rankin, and authors W. Ralph Eubanks, John Grisham, J. Richard Gruber, Jessica B. Harris, Lisa Howorth, Julia Reed, Natasha Trethewey, Curtis Wilkie, Joseph M. Pierce, and Drew Gilpin Faust. This diverse group explores major eras of American history portrayed in Dunlap's painting, a landscape that evokes the displacement and genocide of Native Americans, the enslavement of Africans, the Civil War, and William Faulkner's fiction. They examine the history of landscape art in America, connecting art with the works of major writers like William Faulkner, Eudora Welty, Natasha Trethewey, and Jesmyn Ward. In eighteen new essays written during the pandemic and since the events of January 6, 2021, the essayists emphasize how the key issues Dunlap addressed in his 1987 artwork have become part of the national discourse and make his work even more vital today.

Sustainable Tourism VIII S. Syngellakis, U. Probstl-Haider, F. Pineda, 2018-07-23. This volume includes papers from the 8th International Conference on Sustainable Tourism. Today, tourism is becoming accessible to a growing number of people and is an important component of development, not only in economic terms but also for knowledge and human welfare. This collection of research aims to find ways to protect the natural and cultural landscape through the development of new solutions which minimise the adverse effects of tourism. The phenomenon has many more advantages than disadvantages. New forms of economic development and increasing wealth of human societies depend on tourism. Our knowledge of the world now includes a strong component due to tourism. Human welfare has physiological and psychological elements which tourism promotes both because of the enjoyment of knowing new territories and increasing contacts with near or far away societies and cultures. The tourism industry has nevertheless given rise to some serious problems, including social costs and ecological impacts. Many ancient local cultures have practically lost their identity. Their societies have oriented their economy only to this industry. Both the natural and cultural rural or urban landscapes have also paid a high price for certain forms of tourism. These

problems will persist if economic benefit is the only target leading to economic gains that eventually become ruinous. It is also a grave error to disregard the fact that visitors nowadays are increasingly demanding in cultural and environmental terms. The Global Change is a set of natural environmental changes that are strongly affected by technological and social developments. Natural changes are inherent in the Earth's ecosystem, the ecosphere. Also technological and social changes are inherent to mankind, the noosphere, and are now becoming widespread. Cities are growing rapidly and industry requires increasingly larger areas. Many traditional rural areas are being abandoned. Tourism should also play an important role in this context. Thus interestingly many historic agricultural districts have maintained or even recovered their local population numbers through intelligent strategies of tourism focused on nature and rural culture. Natural landscapes and biodiversity are becoming increasingly appreciated. The tourism industry must be able to respond to these aspirations.
