

# Landing

Near the airport where the plane is going to land, air traffic controllers contact the captain.

The plane flies lower and flaps under the wings move to help the plane fly slower.

The wheels come down, with a clunk.

An air traffic controller tells the captain when to land.

At busy airports, planes fly around and around before they can land.

The plane flies close to the runway and lands.

The captain puts on the brakes to slow the plane down, then steers it to the apron.
