Proton Emitting Nuclei Proceedings 2nd International Symposium Legnaro Italy 2003:

Proton Emitting Nuclei and Related Topics Lúcia S. Ferreira, Paramasivan Arumugan, 2007-12-14 The International Conference on Proton Emitting Nuclei and Related Topics PROCON 07 was held at in Lisbon in June 2007 It was the third meeting in the series after ones held at Oak Ridge and Legnaro The conference provided the opportunity to review the most recent developments in the study of neutron deficient exotic nuclei at the borders of stability There was a fruitful exchange of information between experimental and theoretical physicists regarding future measurements Physics Division Annual Report Argonne National Laboratory. Physics Division, 2003

Electrostatic Accelerators Ragnar Hellborg, 2005-11-02 Electrostatic accelerators are an important and widespread subgroup within the broad spectrum of modern large particle acceleration devices They are specifically designed for applications that require high quality ion beams in terms of energy stability and emittance at comparatively low energies a few MeV Their ability to accelerate virtually any kind of ion over a continuously tunable range of energies makes them a highly versatile tool for investigations in many research fields including but not limited to atomic and nuclear spectroscopy heavy ion reactions accelerator mass spectroscopy as well as ion beam analysis and modification The book is divided into three parts The first part concisely introduces the field of accelerator technology and techniques that emphasize their major modern applications The second part treats the electrostatic accelerator per se its construction and operational principles as well as its maintenance The third part covers all relevant applications in which electrostatic accelerators are the preferred tool for accelerator based investigations Since some topics are common to all types of accelerators Electrostatic Accelerators will also be of value for those more familiar with other types of accelerators
