Federspiel, Gilberto Montibeller, Matthias Seifert, 2024-05-30 This book lays out a foundation and taxonomy for Behavioral Decision Analysis featuring representative work across various domains Traditional research in the domain of Decision Analysis has focused on the design and application of logically consistent tools to support decision makers during the process of structuring problem complexity modeling uncertainty generating predictions eliciting preferences and ultimately making better decisions Two commonly held assumptions are that the decision maker's cognitive belief system is fully accessible and that this system can be understood and formalized by trained analysts However in past years an active line of research has emerged studying instances in which such assumptions may not hold This book unites this community under the common theme of Behavioral Decision Analysis The taxonomy used in this book categorizes research based on task focus prediction or decision and behavioral level individual or group Two theoretical lenses that lie at the interface between 1 normative and descriptive research and 2 normative and prescriptive research are introduced The book then proceeds to highlight representative works across the two lenses focused on individual and group level decision making Featuring various methodologies and applications the book serves as a reference for researchers students and professionals across different disciplines with a common interest in Behavioral Decision Analysis Multiple Criteria Decision Analysis in Regional Planning Fumiko Seo, Masatoshi Sakawa, 2012-12-06 This book is devoted to presenting theoretical fundamentals for the methods of multiple criteria decision making MCDM in the social sciences with particular intent to their applicability to real world decision making The main characteristics of the complex problems facing humans in the world today are multidimensional and have multiple objectives they are large scale and have noncommensurate and conflicting objectives such as economic environmental societal technical and aesthetic ones The authors intend to establish basic concepts for treating these complex problems and to present methodological discussions for MCDM with some applications to administrative or regional planning MCDM is composed of two phases analytical and judgmental In this book we intend to consolidate these two phases and to present integrated methodologies for manipulating them with particular interest in managerial decision making which has not yet been properly treated in spite of its urgent necessity Although a number of books in MCDM fields have already been published in recent years most of them have mainly treated one aspect of MCDM Our work specifically intends to treat the methodology in unified systems and to construct a conceptual structure with special regards to the intrinsic properties of MCDM and its economic meanings from the social scientific point of view

Organization and Decision Theory Ira Horowitz, 2012-12-06 Ira Horowitz Depending upon one's perspective the need to choose among alternatives can be an unwelcome but unavoidable responsibility an exciting and challenging opportunity a run of the mill activity that one performs seemingly without thinking very much about it or perhaps something in between Your most recent selections from a restaurant menu from a set of jobs or job candidates or from a rent or buy or sell or lease option are cases in point Oftentimes we are involved in group decision processes such as the choice of a president wherein one group member's unwelcome responsibility is another's exciting opportunity Many of us that voted in the presidential elections of both 1956 and 1984 irrespective of political affiliation experienced both emotions others just pulled the lever or punched the card without thinking very much about it Arriving at either an individual or a group decision can sometimes be a time consuming torturous and traumatic process that results in a long regretted choice that could have been reached right off the bat On other occasions the just let's get it over with and get out of here solution to a long festering problem can yield rewards that are reaped for many 1 ORGANIZATION AND DECISION THEORY 2 years to come One way or another however individuals and organizations somehow manage to get the decision making job done even if they don't quite understand and often question just how this was accomplished
