Railway Station A Social History:

The Railway Station Jeffrey Richards, John MacDonald MacKenzie, John M. MacKenzie, 1986 This delightful and wide ranging compendium Books and Bookmen captures the mystique of railway stations by crossing the disciplines of history literature art and architecture in a sweeping global survey unique in its scope The railway station, 1986 *The Railway and Modernity* Matthew Beaumont, Michael J. Freeman, 2007 Most research and writing on railway history has been undertaken in a way that disconnects it from the wider cultural milieu Authors have been very effective at constructing specialist histories of transport but have failed to register the railway's central importance in the representation and understanding of modernity This book brings together contributions from a range of established scholars in a variety of disciplines with the central purpose of exploring the railway less as a transport technology than as a key signifier of capitalist modernity It examines the complex social relations in which the railway became historically embedded identifying it as a central problematic in the cultural experience of modernity It avoids the limitations of both the close sighted empiricism typical of many transport historians and the long sighted generalizations of cultural commentators who view the railway merely as a shorthand for the concept of progress over the nineteenth and twentieth centuries The book draws on a diverse range of materials including literary and historical forms of representation It is also informed by a creative application of various critical theories The Railway Station Jeffrey Richards, John MacDonald MacKenzie, 2005 The advent of the railways in the 19th century symbolised a new age of progress power and civilisation for the Victorians and although the civilising aspect of industrialisation has not always been obvious the importance of the railways has never been in doubt Every aspect of the railway station is examined from the sombre grandeur of St Pancras to the smallest country halt

Social History, Local History, and Historiography Roger C. Richardson, 2011-09-22 This wide ranging volume collects together twelve of the author's longer essays mainly drawn from those first published in the last two decades Chiefly consisting of micro studies of a variety of different aspects of early modern English history the book concerns itself with social and economic change the period of the English Revolution and its long lasting impact with Puritanism with the family as a social institution and with historical consciousness and different forms of historical writing Some of the essays focus on a particular individual not all well known William Camden John Milner and Ralph Dutton to open up a broader theme One boldly attempts a comparison over three centuries of the evolution of local history as a subject on both sides of the Atlantic Two other essays reach out into the nineteenth and twentieth centuries but do so with echoes of the subject matter of some of those dealing with the early modern period The interconnectedness of social history local history and historiography is stressed and illustrated throughout Both specialists and non specialists will find much to interest them in this varied and rewarding volume *British Economic and Social History* R. C. Richardson, William Henry Chaloner, 1996 *A Social History of the Media* Asa Briggs, Peter Burke, 2018-07-26 Written by two leading social and cultural historians the first two

Wigglesworth, 2013-10-31 This book seeks to redress the balance of reporting in the sport s literature which has always favoured the activities of aquatic gentlemen at the public schools Oxford and Cambridge Universities Henley Regatta and on the River Thames This study focuses on the many who helped instigate and nurture the sport but who have been forgotten due to their not being associated with the elite of the sport *The City and the Railway in the World from the Nineteenth Century to the Present* Ralf Roth, Paul Van Heesvelde, 2022-07-18 This volume explores the relationship between cities and railways over three centuries Despite their nearly 200 year existence *The City and the Railway in the World* shows that urban railways are still politically and historically important to the modern world Since its inception cities have played a significant role in the railway system cities were among the main reasons for building such efficient but lavish and costly modes of transport for persons goods and information They also influenced the technological appearance of railways as these have had to meet particular demands for transport in urban areas In 25 essays this volume demonstrates that the relationship between the city and the railway is one of the most publicly debated themes in the context of daily lives in growing urban settings as well as in the second urbanisation of the global South with migration from rural to urban landscapes The volume s broad geographical range includes discussions of railway networks railway stations and urban rails in countries such as India Japan England Belgium Romania Nigeria the USA and Mexico *The City and the Railway in the World* will be a useful tool for scholars interested in the history of transport travel and urban change ***A World History of Railway Cultures,***

1830-1930 Matthew Esposito, 2021-08-29 *A World History of Railway Cultures 1830 1930* is the first collection of primary sources to historicize the cultural impact of railways on a global scale from their inception in Great Britain to the Great Depression Its dual purpose is to promote understanding of complex historical processes leading to globalization and generate interest in transnational and global comparative research on railways In four volumes organized by historical geography this scholarly collection gathers rare out of print published and unpublished materials from archival and digital

repositories throughout the world It adopts a capsule approach that focuses on short selections of significant primary source content instead of redundant and irrelevant materials found in online data collections The current collection draws attention to railway cultures through railroad reports parliamentary papers government documents police reports public health records engineering reports technical papers medical surveys memoirs diaries travel narratives ethnographies newspaper articles editorials pamphlets broadsides paintings cartoons engravings photographs art ephemera and passages from novels and poetry collections that shed light on the cultural history of railways The editor s original essays and headnotes on the cultural politics of railways introduce over 200 carefully selected primary sources Students and researchers come to understand railways not as applied technological impositions of industrial capitalism but powerful fluid and idiosyncratic historical constructs

A Social History of Sheffield Boxing, Volume I Matthew Bell,Gary Armstrong,2021-02-20 A Social History of Sheffield Boxing combines urban ethnography and anthropology sociological theory and place and life histories to explore the global phenomenon of boxing Raising many issues pertinent to the social sciences such as contestations around state regulation of violence commerce and broadcasting pedagogy and elite sport and how sport is delivered and narrated to the masses the book studies the history of boxing in Sheffield and the sport s impact on the cultural political and economic development of the city since the 18th century Interweaving urban anthropology with sports studies and historical research the text expertly examines a variety of published sources ranging from academic papers to biographies and from newspaper reports to case studies and contemporary interviews In Volume I Bell and Armstrong construct a vivid history of boxing and probe its cultural acceptance in the late 1800s examining how its rise was inextricably intertwined with the industrial and social development of Sheffield Although Sheffield was not a national player in prize fighting s early days throughout the mid 1800s many parochial scores and wagers were settled by the use of fists By the end of the century boxing with gloves had become the norm and Sheffield had a valid claim to be the chief provincial focus of this new passion largely due to the exploits of George Corfield Sheffield s first boxer of national repute Corfield s deeds were later surpassed by three British champions Gus Platts Johnny Cuthbert and Henry Hall Concluding with the dual themes of the decline of boxing in Sheffield and the city s changing social profile from the 1950s onwards the volume ends with a meditation on the arrival of new migrants to the city and the processes that aided or frustrated their integration into UK life and sport

The Early History of Railway Tunnels Hubert Pragnell,2024-08-30 To the early railway traveller the prospect of travelling to places in hours rather than days hitherto was an inviting prospect however a journey was not without its fears as well as excitement To some the prospect of travelling through a tunnel without carriage lighting with smoke permeating the compartment and the confined noise was a horror of the new age What might happen if we broke down or crashed into another train in the

darkness To others it was exciting with the light from the footplate flickering against the tunnel walls or spotting the occasional glimpses of light from a ventilation shaft To the directors of early railway companies planning a route was governed by expense and the most direct way Avoiding hills could add miles but tunnelling through them could involve vast expense as the Great Western Railway found at Box and the London and Birmingham at Kilsby Creating a cutting as an alternative was also costly not only in labour and time but also in compensation for landowners who opposed railways on visual and social grounds having seen their land divided by canals Construction involved millions of bricks or blocks of stone for sufficiently thick walls to withstand collapse However the entrance barely seen from the carriage window might be an impressive Italianate arch as at Primrose Hill or a castellated portal worthy of the Middle Ages as at Bramhope This book sets out to tell the story of tunnelling in Britain up to about 1870 when it was a question of burrowing through earth and rock with spade and explosive powder with the constant danger of collapse or flooding leading to injury and death It uses contemporary accounts from the dangers of railway travel by Dickens to the excitement of being drawn through the Liverpool Wapping Tunnel by the young composer Mendelssohn It includes descriptions from early railway company guide books newspapers and diaries It also includes numerous photographs and colored architectural elevations from railway archives
