

The background of the cover is a photograph of a dense rainforest. Large, vibrant green leaves, likely from banana trees, dominate the foreground and middle ground. Sunlight filters through the canopy, creating a dappled light effect. A solid black horizontal band runs across the center of the image, serving as a background for the text.

## **Rainforest Politics Ecological Destruction In South East Asia:**

Rainforest Politics Philip Hurst,1990      Environmental Challenges in South-East Asia Victor T. King,2013-01-11 This volume discusses environmental change natural resource exploitation and the prospect for ecological sustainability in Southeast Asia The contributors including sociologists geographers anthropologists economists political economists and historians presents the findings of recent archival and field research mainly from ongoing programmes of team research based in European universities and institutes Among the themes discussed are European and indigenous perceptions of the environment historical processes of environmental change the politics of resource use ecotourism and development deforestation and smallholding land use strategies migration and environmental degradation disease environment and human geography demography sustainability and resource exploitation      Environmental Management in ASEAN Maria Seda,1993 The problem of environmental degradation in the ASEAN region cannot be underestimated The articles in this book examine some of the common environmental issues faced by countries in the region They provide a brief overview of some major environmental problems such as fisheries management tropical deforestation and pollution in urban areas and highlight some of the research policy and institutional constraints in the region      **Loggers and Degradation in the Asia-Pacific** Peter Dauvergne,2001-10-15 Corporate loggers have damaged much of the tropical forest throughout the Asia Pacific over the last four decades Despite a steady rise in global and local concern few firms have changed their practices Loggers and Degradation in the Asia Pacific examines why and how loggers have resisted and ignored calls for environmental reforms Concentrating on the period after 1990 the book explains what is happening on the ground and highlights the structures within which firms and governments operate Within this broader context the author considers a range of factors including the science of tropical forest management the capacity of states to regulate and enforce rules the relative power of environmental reformers and the 1997 Asian financial crisis This is a constructive insightful approach to a depressing yet urgent problem It will be accessible to academic and student readers as well as those in corporations government and NGOs

*The Physical Geography of Southeast Asia* Avijit Gupta,2005-02-24 This will be the first comprehensive and detailed volume on the physical environment of Southeast Asia and will be essential reading for geographers ecologists and environmental managers As the definitive reference work on the region it will cover all aspects of the biophysical environment and its current environmental problems and management practices The topics discussed range from a regional view of landforms and vegetation to specific cases including urban environments coral reefs volcanic hazards and the Mekong River Basin The contributors are distinguished scholarly and have a long association with Southeast Asia This is the fourth volume to be published in the Oxford Regional Environment series      *Environmental Cooperation in Southeast Asia* Paruedee Nguitragool,2010-10-04 One of the most challenging environmental threats to the ten countries of the Association of Southeast Asian Nations ASEAN has been the haze the sickening and deadly cloud of smoky pollution caused by

widespread burning of land and forests in Indonesia This book examines both the threat and response to it by analysing environmental cooperation in Southeast Asia from an international regime perspective Tracing the development of regional cooperation on the haze and evaluating the effectiveness of the cooperation the author argues that the haze crisis combined with the economic crisis of 1997 has profoundly challenged the ASEAN modus operandi and resulted in ASEAN s efforts to establish an environmental regime to cope with environmental challenges The emerging ASEAN haze regime is a unique case study of a regional environmental institution in multi levelled global environmental governance Based on in depth original research this case study is integrated into international relations political science and comparative political analysis literatures and contributes to a better understanding of processes within the regional organisation

**Histories of Health in Southeast Asia** Tim Harper, Sunil S. Amrith, 2014-10-01 Health patterns in Southeast Asia have changed profoundly over the past century In that period epidemic and chronic diseases environmental transformations and international health institutions have created new connections within the region and the increased interdependence of Southeast Asia with China and India In this volume leading scholars provide a new approach to the history of health in Southeast Asia Framed by a series of synoptic pieces on the Landscapes of Health in Southeast Asia in 1914 1950 and 2014 the essays interweave local national and regional perspectives They range from studies of long term processes such as changing epidemics mortality and aging and environmental history to detailed accounts of particular episodes the global cholera epidemic and the hajj the influenza epidemic of 1918 WWII and natural disasters The writers also examine state policy on healthcare and the influence of organizations from NGOs such as the China Medical Board and the Rockefeller Foundation to grassroots organizations in Thailand Indonesia and the Philippines

*The End of the Peasantry in Southeast Asia* R.E. Elson, 2016-01-13 This book analyses the changing context and conditions of production and livelihood amongst Southeast Asia s peasants since the beginning of the nineteenth century It argues that with demographic growth and the nineteenth century development of great global markets based on small scale production the size and economic significance of peasantries throughout the region was magnified However such changes brought with them new forces stronger states more regular legal systems a revolution in communications intensive commercialisation which themselves worked to undermine the foundations of peasant society and eventually to transform peasants into farmers workers and citizens

**The Cardamom Conundrum** Timothy J. Killeen, 2012-02-01 A conundrum is a puzzle whose solution requires the resolution of a paradox In this instance the paradox lies in two widely held and conflicting assumptions that the pathway to a modern economy requires exploiting and monetizing a country s natural resources and that the long term prosperity of a nation depends on the conservation of those same resources This book consciously seeks to avoid the mentality of trade offs where pro development advocates view conservation efforts as impediments and conservationists are convinced that development inevitably leads to a loss for nature Instead through an evaluation of opportunities in the still pristine forests of the Cardamom Mountains and surrounding

landscapes the author seeks to demonstrate that wise management of a nation's renewable natural resources will facilitate economic growth. Resolving the Cardamom Conundrum demands an economic model that provides robust growth and that alleviates poverty over the short term and eradicates it over the medium term. Any other solution is impractical and morally unacceptable. The author points the way by identifying innovative options linked to climate finance and low carbon development strategies that span the economic, social, and environmental dimensions of sustainable development.
