**Re-envisioning Education & Democracy** Ruthanne Kurth-Schai,Charles R. Green,2016-04-01 The future of public education and democracy is at risk Powerful forces are eroding commitment to public schools and weakening democratic resolve Yet even in deeply troubling times it is possible to broaden social imagination and empower effective advocacy for systemic progressive reform Re envisioning Education and Democracy explores challenges and opportunities for restructuring public education to establish and sustain more broadly inclusive deeply democratic and effectively transforming approaches to social inquiry and civic participation Re envisioning Education and Democracy adopts a non traditional format to extend social awareness and imagination Within each chapter one episode of an evolving strategic narrative traces the life cycle of a systemic reform initiative This is followed by an exploratory essay that draws from theory research criticism and practice to prompt consideration of focal issues Woven through each chapter is a poetically framed meditative stream informed by varied historical and cultural conceptions of oracles A developmental sequence of social learning strategies exploratory democratic practices accompanied by thematic bibliographic references are included to model democratic teaching and learning applicable in classroom and community settings **Closing the Achievement Gap from an International Perspective** Julia V. Clark,2013-10-24 In a changing world that demands new skills a vital concern of public education is the gap in academic performance between low and high achieving students There is no excuse for the achievement gaps that persist among poor and minority students in schools today All students can succeed at high levels regardless of race ethnicity and economic background Several countries have successfully confronted inequities in achievement demonstrating that any school can close achievement gaps regardless of the community they serve and that all students can achieve at high levels when they are provided with the right opportunities This book is about understanding what factors selected countries have applied to promote progress and what factors contribute to progress in the closing of achievement gaps It is about creating opportunities for all students Closing the Achievement Gap from an International Perspective Transforming STEM for Effective Education is written in response to rising concern for the improvement of quality education especially in mathematics and science provided to all students The contributors take a systematic view of the subject beginning with a cross national analysis of teacher qualifications and the achievement gap that spans 50 countries The content of the book is organized in sections describing education around the globe North and South America

Europe Asia Africa and Australia Individual chapters offer close up analysis of efforts to close achievement gaps in the U S and Canada Mexico England Turkey China South Africa and Australia among many others The contributors provide information on the achievement gap in mathematics and science review current research and present strategies for fostering improvement and raising performance with a focus on school related variables that adversely affect educational outcomes among poor and minority students The authors of the various chapters looked at how students data correlated with classroom practices teacher instruction and academic programming as part of their efforts to measure student growth Qualitative and quantitative data are provided to provide evidence not only of the problem but also for the solution The book concludes with a chapter on promoting equality and equity to shrink the achievement gap worldwide *US Black Engineer & IT* ,2001-06 Urban Anthropology and Studies of Cultural Systems and World Economic Development ,1997

EBOOK: Analysing Exemplary Science Teaching Steve Alsop,Larry Bencze,Erminia Pedretti,2004-12-16 I read lots of books in which science education researchers tell science teachers how to teach This book refreshingly is written the other way round We read a number of accounts by outstanding science and technology teachers of how they use new approaches to teaching to motivate their students and maximise their learning These accounts are then followed by some excellent analyses from leading academics I learnt a lot from reading this book Professor Michael Reiss Institute of Education University of London Provides an important new twist on one of the enduring problems of case based learning This is a book that deserves careful reading and re reading threading back and forwards from the immediate and practical images of excellence in the teachers cases to the comprehensive and scholarly analyses in the researchers thematic chapters Professor

William Louden Edith Cowan University Australia Through a celebration of teaching and research this book explores exemplary practice in science education and fuses educational theory and classroom practice in unique ways Analysing Exemplary Science Teaching brings together twelve academics ten innovative teachers and three exceptional students in a conversation about teaching and learning Teachers and students describe some of their most noteworthy classroom practice whilst scholars of international standing use educational theory to discuss define and analyse the documented classroom practice Classroom experiences are directly linked with theory by a series of annotated comments This distinctive web like structure enables the reader to actively move between practice and theory reading about classroom innovation and then theorizing about the basis and potential of this teaching approach Providing an international perspective the special lessons described and analysed are drawn from middle and secondary schools in the UK Canada and Australia This book is an invaluable resource for preservice and inservice teacher education as well as for graduate studies It is of interest to a broad spectrum of individuals including training teachers teachers researchers administrators and curriculum coordinators in science and technology education

*Science Education in Canada* Christine D. Tippet, Todd M. Milford, 2019-07-01 This book offers a meso level description of demographics science education and science teacher education Representing all 13 Canadian jurisdictions the book provides local insights that serve as the basis for exploring the Canadian system as a whole and function as a common starting point from which to identify causal relationships that may be associated with Canada's successes The book highlights commonalities consistencies and distinctions across the provinces and territories in a thematic analysis of the 13 jurisdiction specific chapters Although the analysis indicates a network of policy and practice issues warranting further consideration the diverse nature of Canadian science education makes simple identification of causal relationships elusive Canada has a reputation for strong science achievement However there is currently limited literature on science education in Canada at the general level or in specific areas such as Canadian science curriculum or science teacher education This book fills that gap by presenting a thorough description of science education at the provincial territorial level as well as a more holistic description of pressing issues for Canadian science education
