Foltz,2013-06-03 Can Orthodox Christianity offer spiritual resources uniquely suited to the environmental concerns of today This book makes the case emphatically that it can indeed In addition to being the first substantial and comprehensive collection of essays in any language to address environmental issues from the Orthodox point of view this volume with contributions from many of the most influential theologians and philosophers in contemporary world Orthodoxy will engage a wide audience in academic as well as popular circles resonating not only with Orthodox audiences but with all those in search of a fresh approach to environmental theory and ethics that can bring to bear the resources of ancient spirituality often virtually unknown in the West on modern challenges and dilemmas *Is It Too Late?* John B. Cobb Jr.,2021-04-20 In the fifty years since its initial publication Is It Too Late has proven its prescience in ways both significant and dire As the first book length philosophical and theological analysis of the environmental crisis this work introduced a generation to the key elements of crisis while suggesting ways that religion can be a force for hope rather than an instrument of despair Covering an ambitious range of issues from deforestation to abortion from religious views of the natural world to the need for technological innovation to avoid nature s destruction John Cobb moves deftly from philosophical to theological to scientific learning and integrates these interdisciplinary insights into a compelling vision for what he calls a new Christianity Comprehensive in scope non technical in expression and concise in length Is It Too Late provides the scholar and the student alike with a readable and compelling orientation to the philosophical and theological stakes of ecology This Fortress edition includes a new preface in which Cobb reflects on the current situation the specific promises and perils we now face and how his own thinking on matters theological and ecological has evolved in the last half century *Biblical Counsel* ,1993 The Oxford Handbook of Religion and Ecology Roger S. Gottlieb,2006-11-09 Ecologically oriented visions of God the Sacred the Earth and human beings The proposed handbook will serve as the definitive overview of these exciting new developments Divided into three main sections the books essays will reflect the three dominant dimensions of the field

Part I will explore *Living in the Lamblight* Hans Boersma, 2001-01-08 In recent decades many fundamental Christian assumptions about the nature of God and the world have come under attack No longer can one assume even in many church circles that historic Christian beliefs about the Trinity and providence are generally accepted or understood Scientific knowledge and new technologies have also presented challenges for the church How for example should Christians understand the ecological crisis And how should the opening chapters of Genesis be understood in an age of genetic research and evolutionary science This collection of essays attempts to chart a faithful path for postmodern Christians exploring the foundational ideas and concepts of a Christian worldview and suggesting their implications for Christian living today Contributors Hans Boersma John Cooper Marva J Dawn Michael W Goheen Christopher D Marshall Arnold E Sikkema John G Stackhouse Jr Rikki E Watts John R Wood

True North Mark Liederbach, Seth Bible, 2012-11-01 Because the Bible describes the second person of the Trinity as the key agent in creation redemption and the restoration of all things it is imperative that Christians seeking conformity to the image of Christ root their understanding of and motivation for creation care in a theology and ethic that seeks to maximize the worship of Christ throughout all creation Discussions related to creation care and environmental ethics have become both politically charged and highly controversial Unfortunately while a growing number of Christian books address various aspects of creation care that either support or deny the reality of global warming or perhaps advocate various policies and practices there is very little work available seeking to focus on clarify and establish the biblical and theological foundations upon which Christians ought to care for God's world Even more specifically there seems to be almost a complete dearth of accessible works in theology or ethics that offers a Christology of creation

care Thus the purpose of True North is to explore the person and work of Christ in creation redemption and the restoration of all things so as to establish the idea that caring for God s creation depends not upon prognostications for or against a global warming crisis Rather the motivation for Christians to care for creation flows from the created purposes established in the very fabric of the universe faithful discipleship in Christ and the inherent goal to return to God all the glory he is due from every corner and aspect of creation
