Neurocinema Eelco F. M. Wijdicks, 2014-11-06. Film directors recognize that neurologic disease impacts mind and motility and often use it in a plot or defining scene. It should be informative and educational to deconstruct neurologic representation in film. *Neurocinema: When Film Meets Neurology* is a collection of film essays that summarize the portrayal of major neurologic syndromes and The Palgrave Handbook of the Philosophy of Film and Motion Pictures Noël Carroll, Laura T. Di Summa, Shawn Loht, 2019-10-30. This handbook brings together essays in the philosophy of film and motion pictures from authorities across the spectrum. It boasts contributions from philosophers and film theorists alike with many essays employing pluralist approaches to this interdisciplinary subject. Core areas treated include film ontology, film structure, psychology, authorship, narrative, and viewer emotion. Emerging areas of interest including virtual reality, video games, and nonfictional and autobiographical film also have dedicated chapters. Other areas of focus include the film medium's intersection with contemporary social issues, film's kinship to other art forms, and the influence of historically seminal schools of thought in the philosophy of film. Of emphasis in many of the essays is the relationship and overlap of analytic and continental perspectives in this subject. *Monsters, Demons and Psychopaths* Fernando Espi Forcen, 2016-10-14.

Descriptions of monsters, vampires, demonic possessions, and psychopaths in horror films have been inspired by psychiatric knowledge about mental illness, leading to several stereotyped models of horror that have prevailed through decades. Some scholars have proposed that horror films can be a teaching tool for psychopathology, but for the most part, the genre has been underutilized as a learning tool. This book explores the idea of relating horror films to psychiatric ideas as a way of engaging people in learning. **Performing Hysteria** Johanna Braun, 2020-11-16. A simple Google search reveals the sheer bottomless well of hysterical discussions on diverse topics such as the metoo movement, Trumpianism, border wars, Brexit, transgender liberation, Black Lives Matter, COVID 19, and climate change, to name only a few. Against the backdrop of such recent deployments of hysteria in popular discourse, particularly as they emerge in times of material and hermeneutic crisis, *Performing Hysteria* re-engages the notion of hysteria. *Performing Hysteria* rigorously mines late 20th and early 21st century, primarily visual culture, for signs of hysteria. The various essays in this volume contribute to

the multilayered and complex discussions that surround and foster this resurgent interest in hysteria covering such areas as art literature theatre film television dance crossing such disciplines as cultural studies political science philosophy history media disability race and ethnicity and gender studies and analysing stereotypical images and representations of the hysteric in relation to cultural sciences and media studies Of particular importance is the volume's insistence on taking the intersection of hysteria and performance seriously
