Governing Higher Education: National Perspectives on Institutional Governance Alberto Amaral, Glen Jones, B. Karseth, 2013-11-11 Over the last decades higher education has gone through an unprecedented growth period and as a result the average university or college has now more students and a larger output than ever before At the same time the socio economic and political demands with respect to higher education have grown dramatically These developments have taken place without a proportional increase of the budgets and facilities of the higher education institutions This has created an imbalance between the expectations with respect to higher education and the institutional capacities in the sector One of the underlying trends is that the traditional pact between higher education and society has become problematic Society no longer accepts the rather special and protected position that universities have had for a very long time in our societies The knowledge based social and cultural missions of higher education institutions are no longer taken for granted as the main legitimacy bases for public investments in higher education Universities and colleges are at present expected to function efficiently to contribute to sustainable economic growth at various levels and to add to national and even supranational trade balances On top of this they have to prove that they maintain a high level of quality in their primary activities i e teaching research and services while adapting and responding to the expectations expressed so vehemently in their environments and to a decreasing per capita funding basis

Narrative Management in Corporate Japan Chie Yorozu, 2015-11-19 Scandals and failures in some of the best known international Japanese owned companies have shown that there is sometimes a considerable difference between the public and internal narratives of Japanese firms This book explores the extent to which Japanese firms public claims reflect wider reality Exploring how and why corporate narrative management is accepted or rejected by external and internal audiences in Japan the book clarifies what narrative management means for Japanese organizations It argues that the role of narrative management has become much more prevalent in Japan in recent years but that it does not serve quite the same role as it does in the Western environments where the theory and practice first emerged The author presents interview based case studies within four very different large Japanese organisations all of which have deployed and loudly announced new restructuring plans based largely on Western models of corporate best practice The book aims to describe and account for these Japanese corporate narratives and asks what they are why they are deployed and who believes in them As the first narrative related work in the Japanese context this volume provides an insight into the development of Japanese narrative management It will appeal to students and scholars of Japanese Business International Business and Organizational Studies

Management Lives David Knights, Hugh Willmott, 1999-08-30 The authors bring a spark of vitality and life to an area that could be cynically viewed as a series of conflicting fads and fashions I would recommend anyone in the process of reviewing or designing an entrepreneurship development course to consider the benefits that this book would bring to the teaching process Entrepreneurship and Innovation Using fiction in the classroom as an approach to stimulating the study of people in organizations is well established What this book contributes is a way of exploring some of the existential elements of life in organizations which are typically difficult to study It will be on my reading lists Hopefully this example and regrettably few others which exist will contribute in the long term to the reformulation of how the lived experience of organizational life may be explored in the classroom Leadership consumption and bureaucracy rational choice and meaning all through the medium of characters and situations in contemporary literature The clear theoretical framework supported by footnotes summaries and further reading guides makes this an introduction to management the student will find useful as well as enjoyable

Shire, Ursula Holtgrewe, Christian Kerst, 2017-09-29 This title was first published in 2002 Call centres are a type of service work that stand at the interface between corporations and consumers They exemplify more general tendencies present within service work They also have a particular public image being associated in the public mind with low skilled and regimented work This volume presents contributions from British and German management academics and industrial sociologists based on primary research on call centres in both countries The contributions cover the genesis and development of call centres as a new form of organization or indeed a new industry the rationalization and control strategies of organizations that establish call centres and the nature of service work and service interactions The findings of this volume challenge the common public image of call centres and finds that call centre employment is in fact very diverse So for example skilled advising and consulting services are often performed over the phone Along with the sometimes skilled nature of call centre work work organization and working conditions vary as well The text also seeks to contrast the British and German experience of call centre work and employment In Germany clerical work has traditionally been embedded in the specific traditions of co operative industrial relations that define the German model Call centres present a strategic challenge to this model and the expansion of call centres has been at the forefront of changes aimed at making employment more flexible in Germany This work offers a choice of country cases which permit a comparison of service employment within both a liberal capitalist and a socially embedded economy
