How End Users and Librarians Work Together shows you that the librarian customer relationship is as synergistic as ever. It gives you timely facts about how librarians and users work together and how those partnerships are built. In it you'll encounter group projects done by faculty, students, external users, and non-librarian supervisors and discover an enlightening spirit of collaboration lacking in most research literature today. Further establishing the marketability of contemporary research librarians, *Business Reference Service and Sources* goes to the front lines of business reference service, solidifying and updating the librarian user partnership. You'll see how research librarians can reach users at the crux of their needs. Overall, individual chapters address the needs of such people as students, business school officials, and corporations. Specifically, you'll read about these areas: Internet business research and ESL students; corporate home pages as supplements to traditional business resources; networking with community business sources; synergy in the information specialist customer partnership; avoiding information overload in bibliographic instruction; the Internet's impact on government documents; assessing the validity of electronic journals; underprivileged nontraditional students; and bibliographic instruction. Today, in our climate of negative ad campaigns directed at libraries and librarians in general, business reference librarians face many challenges, academic as well as professional. But if you're one of the vocal, proactive supporters of productive librarian customer partnerships, this book will help you grow feet and move out from behind the restrictive comfort of your desk into the world's classrooms and manufacturing teams. Certainly *Business References and Sources* will convince you that collaborative projects between contemporary reference librarians and end users are alive and well.

**Business Reference Services and Sources** Katherine M. Shelfer, 1997. Contains nine contributions which range from Internet business research, ESL students, and underprivileged nontraditional students to networking with community business sources and the Internet's impact on government documents.

**The Reference Library User** William A. Katz, 1990. Provide the best possible service to your library patrons. With a healthy respect for those who seek assistance at the reference desk, a group of library and information service specialists examine the public whom they serve. *The Reference Library User* focuses on the possible interactions between the reference librarian and the library user. The authoritative contributors discuss many problems in the relationship between the public and the library and all offer suggestions that will at least help librarians to better serve the public on a daily basis. A major emphasis of *The Reference Library User* is on the various populations using the library and their particular needs. For example, one chapter examines the information needs of deinstitutionalized patrons and presents methods of providing service and a rationale for community outreach. The state program in Rhode Island is outlined, describing efforts to reach community residents through public libraries and the state-operated Bookmobile. Other chapters provide strategies for providing reference services to older adults, the learning disabled, the blind, and the physically handicapped. This informative new volume also deals with general concerns facing librarians today, including determining the audience for both public and academic libraries, educating the user, encouraging nonusers to become library users, and
