Levelt,2013-03-12 It is obvious that the growing child manifests an increasing understanding of his language and facility to use it A major part of the child language literature is concerned with the child s developing linguistic and communicative competence Scattered evidence also shows however that children become progressively more aware of language as language It is interesting to consider in what ways the internal

structure and mechanisms of language become more accessible Little is known about linguistic awareness of this kind the role it plays or how it develops When the new Projektgruppe fUr Psycholinguistik of the Max Planck Gesellschaft was founded the child's conception of language in analogy to Piaget's child's conception of the physical world became one of the research unit's topics of study As previous work on linguistic awareness was largely amorphous we first organized a kind of conference workshop with some of those who had worked in the area The aims of this meeting were to map out the field of study detail the phenomena of interest and define major theoretical issues The meeting took place just after the creation of the project group on May 3-7 1977 The participants were psychologists and linguists who had either published work on metalinguistic issues in child language or who could be expected to contribute substantially to the discussion This book is a direct outcome of that conference though it is not a complete reflection of the papers presented or of the discussion that took place *Bureau publication (United States. research project exploring the relationship between children's vernacular play cultures and their media based play this collection challenges two popular misconceptions about children's play that it is depleted or even dying out and that it is threatened by contemporary media such as television and computer games A key element in the research was the digitization and analysis of Iona and Peter Opie's sound recordings of children's playground and street games from the 1970s and 1980s This framed and enabled the research team's studies both of the Opies' documents of mid twentieth century play culture and through a two year ethnographic study of play and games in two primary school playgrounds contemporary children's play cultures In addition the research included the use of a prototype computer game to capture playground games and the making of a documentary film Drawing on this extraordinary data set the volume poses three questions What do these hitherto unseen sources reveal about the games songs and rhymes the Opies and others collected in the mid twentieth century What has happened to these vernacular forms How are the forms of vernacular play that are transmitted in playgrounds homes and streets transfigured in the new media age In addressing these questions the contributors reflect on the changing face of childhood in the twenty first century in relation to questions of gender and power and with attention to the children's own participation in producing the ethnographic record of their lives
