Refinement Of Production Ecological Modernization Theory And The Chemical Industry:

The Refinement of Production Arthur P. J. Mol,1995 The theory of ecological modernization explains the forces mechanisms and dynamics of environmental reform in modern society Its value is illustrated in the ecological restructuring of the chemical industry on a national and global scale Detailed studies on the paint industry the plastic and polymer sector and the pesticide industry show how and to what extent the environment is becoming a crucial factor in the redesigning of the institutional order of society *Ecological Modernisation Around the World* Arthur P.J. Mol,David A. Sonnenfeld,2014-04-08

The idea of ecological modernisation originated in Western Europe in the 1980s gaining attention around the world by the late 1990s At the core of this social scientific and policy oriented approach is the view that contemporary societies have the capability of dealing with their environmental crises Experiences in some countries demonstrate that modern institutions can incorporate environmental interests into their daily routines Elsewhere economic and political interests dominate development trajectories and environmental deterioration continues challenging the premises of ecological modernisation This volume brings together research on ecological modernisation practices around the world Studies on Western Central and Eastern Europe the USA and Southeast Asia examine the applicability of this approach to advanced industrial countries transitional economies and developing countries respectively Authors critically examine the premises of ecological modernisation theory assess its value for understanding past and present environmental transformations and outline paths for designing future sustainable development Taken together the studies in collected this volume offer significant refinements extensions and critiques of ecological modernisation theory and suggest important directions for future research on social and policy dimensions of environmental change **Ecological Modernization in the United Arab Emirates?**

Helena Rietmann,2021-07-19 In 2006 the United Arab Emirates initiated the Masdar City project which was a pre planned eco city concentrating on the development and promotion of renewable energy water and waste management sustainable building transportation and material efficiency It was the flagship project of what the government considered to be a widespread environmental reform process This study examines the Masdar City project applying the analytical framework of ecological modernization with the help of five factors which help to investigate the ongoing reform process The study finds that Masdar City is more accurately described as an outcome of the Abu Dhabi government s economic diversification strategy The project is subject to the political and economic interests of the emirate s ruling family Environmental groups operating within the emirate are connected to the government and pursue policy targets determined by the government

The Emergence of Ecological Modernisation Mr Stephen C Young,2018-10-24 The Emergence of Ecological Modernisation offers a wealth of empirical research material from an international perspective bringing together previously scattered sources for the first time It addresses a series of theoretical issues that are of key contemporary relevance such as the relationship between ecological modernisation and sustainable development strategies for promoting ecological

modernisation and the extent to which it is possible to green contemporary capitalism Modernization Science Chuanqi He, 2012-02-18 Depending on their national level of income development and modernization all countries in the world can be generally categorized as either advanced or developing Studies on why advanced countries continue to develop how they maintain their level of development and how developing countries enter into the advanced club fall into the field of modernization science which is an emerging interdisciplinary science This monograph the first English book available on modernization science interprets its concepts methodologies general theories first and second modernization six level specific six field specific and three sector specific modernizations modernization policy and evaluation and the principles and methods of national development since the 18th century It provides clear systematic up to date information on this new discipline with more than 173 figures and 265 tables and covers 131 countries and 97% of the global population A comprehensive outlook on world modernization is presented from a Chinese perspective **International Encyclopedia of Environmental Politics** John Barry, E. Gene Frankland, 2014-02-25 Why care about the environment Is the earth's climate really changing for the worse What are CFCs exactly And who or what is the WTO What are the causes of environmental problems Who are the main actors and what are the main ideas and issues in international environmental politics Which countries have the best worst environmental record and policies The International Encyclopedia of Environmental Politics is the essential reference source to enable all those with an interest in the politics of the environment particularly students and academics working within political science to answer these questions and to explore many other related topics in international environmental politics It will be welcomed as an essential teaching resource and a trusty companion to independent study Written by a team of international experts the Encyclopedia is vital for fact checking provides authoritative initial orientation to a particular topic or issue and will serve as a solid starting point for wider explanation With over 300 fully cross referenced entries many of which are followed with suggestions for further reading the Encyclopedia includes Country and regional entries with country entries giving a concise overview of the history main actors issues and policies related to its environmental politics Normative and ethical dimensions of environmental politics from animal rights social and global justice to deep ecology Environmental movements organizations struggles and actors from local to international levels Issues in international environmental politics such as global warming biodiversity trade and the environment Prominent individuals historical and current who have inspired or been actively involved in international environmental politics such as Mahatma Gandhi Petra Kelly Vandana Shiva and Aldo Leopold Central topics and issues in environmental politics such as global warming globalization wildlife preservation eco taxes energy production and consumption sustainable development and the World Trade Organisation **Routledge International Handbook of Social and Environmental Change** Stewart Lockie, David A. Sonnenfeld, Dana R. Fisher, 2013-10-30 This book reviews the major ways in which social scientists are conceptualizing more integrated perspectives on society and nature from the global

to local levels The chapters in this volume by international experts from a variety of disciplines explore the challenges contradictions and consequences of socialecological change along with the uncertainties and governance dilemmas they create

Environmental Sociology Matthias Groß, Harald Heinrichs, 2010-06-17 Despite being a relatively young sub discipline European environmental sociology has changed considerably in the last decades towards more interdisciplinary collaborations and problem solving Current trends such as global environmental modernization and processes of economic political and socio cultural globalization fuelled by developments of transport environmental flows scientific uncertainty and information technologies have fostered new conceptual approaches that move beyond classical sociological mind sets toward broader attempts to connect to other disciplines

Electric Mountains Shaun A. Golding, 2021-07-16 Climate change has shifted from future menace to current event As eco conscious electricity consumers we want to do our part in weening from fossil fuels but what are we actually a part of Committed environmentalists in one of North America s most progressive regions desperately wanted energy policies that address the climate crisis For many of them wind turbines on Northern New England s iconic ridgelines symbolize the energy transition that they have long hoped to see For others however ridgeline wind takes on a very different meaning When weighing its costs and benefits locally and globally some wind opponents now see the graceful structures as symbols of corrupted energy politics This book derives from several years of research to make sense of how wind turbines have so starkly split a community of environmentalists as well as several communities In doing so it casts a critical light on the roadmap for energy transition that Northern New England s ridgeline wind projects demarcate It outlines how ridgeline wind conforms to antiquated social structures propping up corporate energy interests to the detriment of the swift de carbonizing and equitable transformation that climate predictions warrant It suggests therefore that the energy transition of which most of us are a part is probably not the transition we would have designed ourselves if we had been asked

An Invitation to Environmental Sociology Michael Bell, 2009 I love your book it is one of the most fascinating I have ever read certainly the most riveting textbook The ideas you present are so on key I just wanted to let you know how incredible you book is Thank you for writing it Student at U Mass Boston Michael Bell covers the broad range of topics in environmental sociology with a personal passion rarely seen in sociology texts An Invitation to Environmental Sociology 3 e challenges readers with the complexity of environmental puzzles After reading this book students will be informed and enabled to make their own private and public choices and inspired to care about the social footprints on the planet

Transnational Buildings in Local Environments Luciana Melchert Saguas Presas, 2017-11-22 By focusing on the skyscraping transnational building this book bridges two key debates on the transformation and emerging problems besetting major cities globalization and ecological and sustainable building design While such structures tend to be constructed and or used by transnational companies and are generally viewed as emblems of a global city they nevertheless impact seriously on their local environment posing numerous environmental burdens on it By examining office blocks held by

multinational firms in Amsterdam S o Paolo and Beijing the book analyses how transnational buildings might be made sustainable It compares and contrasts the different social mechanisms that are or may be in place and how sustainable building practices that are being activated in certain locations could be adopted elsewhere The Oxford Handbook of Environmental Political Theory Teena Gabrielson, Cheryl Hall, John M. Meyer, David Schlosberg, 2016 This volume defines illustrates and challenges the field on environmental political theory Through a broad range of approaches it shows how scholars have used concepts methods and arguments from political theory and closely related disciplines to address contemporary environmental problems The Ecological Modernisation Reader Arthur P.J. Mol, David A. Sonnenfeld, Gert Spaargaren, 2020-11-25 Structural environmental reform by firms and industries governmental and intergovernmental agencies non governmental organisations NGOs and others is a worldwide phenomenon and the focus of this definitive collection Includes a comprehensive introduction to and overview of Ecological Modernisation Theory original state of the art review essays by distinguished international scholars a selection of the best published works and debates from a quarter century of related social science scholarship an emphasis on environmental issues in Asian and other emerging economies and an agenda for continued scholarship policymaking and practice Accessible to students policymakers professionals executives and others interested in deeply understanding contemporary environmental issues and taking effective action for environmental solutions Rigorous and sophisticated for use in graduate and advanced studies Appropriate for courses in Sociology Political Science Policy Studies Geography Environmental Studies Environmental Planning Business Economics Asian Studies Development Studies and other fields **Governing Sustainable Energies in China** Geoffrey Chun-fung Chen, 2016-06-29 This book examines sustainable energy development in China a non liberal state as a counterexample to conventional wisdom that effective policy outcomes are premised on the basis of decentralized governance The use of sustainable energies as part of the solution for stabilising global warming has been promoted in industrialised countries for the past three decades In the last ten years China has expanded its renewable energy capacity with unprecedented speed and breadth This phenomenon seems to contradict the principle of orthodox environmental governance in which stakeholder participation is deemed a necessary condition for effective policy outcomes Based upon policy documents news report and interviews with 32 policy makers business leaders and NGO practitioners in selected subnational governments this book examines the politics of sustainable energy in China It engages debates over the relationships among democratic prioritisation environmental protection and economic empowerment arguing that China s quasi corporatist model in the sustainable energy field challenges Western scholars dominant assumptions about ecopolitics **Understanding Industrial Transformation** Xander Olsthoorn, Anna J. Wieczorek, 2006-02-21 A system is just like truth s tail but the truth is like a lizard It will leave the tail in your hand and escape it knows that it will soon grow another one Ivan Sergeevich Turgenev 1818 1883 Letter Paris January 3 1857 to Count Lev Nikolaevich Tolstoy Turgenev Letters ed David a scientist can

only come to a partial understanding of industrial transformation processes This is so not only because of the vastness of the topic but because of the inherent limitations of each scientific discipline The common ground which scientists of different disciplines may endeavour to find when approaching some problem is often slight A scientist entering such grounds runs the risk of getting lost losing understanding and only catching the loose tail mentioned above Secondly sciences to make a difference must impress their importance upon the public and convince scientific and policy institutions in order to obtain the means to carryout their mission The editors consider that there has been progress and that this book is a sign of such progress and hope that it provides a further contribution to such advancement Their hope is that this book will also foster co operation among those approaching this area from dissimilar disciplines and scientific traditions and that it will stimulate progress for all scientists advancing on the international road to global sustainability

Globalization and the Environment, 2006-06-01 What is missing in the mounting literature on globalization is a focused theoretical foundation with parallel empirical examinations of global structures and their environmental consequences The articles in this volume examine how the world economy and related non economic forms of global structuring impact the natural environment and the living conditions of human populations living across the globe Environmental dynamics in areas as diverse as Ancient Egypt and the Modern Amazon are presented for readers who are new to the world systems approach and for others interested in recent efforts to link environmental outcomes and antecedents to global processes

Politicization of Ecological Issues Gabrielle Bouleau, 2019-09-04 The legitimacy of environmental policies is an issue of increasing concern for analysts Ecological stakes are deemed to be global but global public decisions are rare and implemented with difficulty Dissensus prevails on environmental ethics and there is little evidence of any greening of policy tools The global framing of the environment fails to account for how people relate to the ecological realities which surround them Rather than placing the environment at a distance *Politicization of Ecological Issues* advocates for building legitimacy from people s perceptions of singular forms and patterns in their environment Based on scholarly literature in political ecology and empirical cases of water policy in Europe the book shows how the qualification of environmental realities has been politicized and translated into motives for public action Similarly it argues that theoretical debates addressing the ecological crisis are not only dealing with ideas but rather advocating for specific environmental forms that are deemed to be motives of hope or worry

Arts, P.

Leroy, 2013-03-14 Recent years have witnessed a substantial change in both the organisation and substance of environmental policy both national and international Western societies have seen a change in the relationships between the state the market and civil society leading to new conceptions of governance a process here called political modernisation that gives rise to the institutionalisation of new policy arrangements An environmental policy arrangement refers to the organisation and substance of a policy domain in terms of policy coalitions policy discourses rules of the game and resources The book uses these theoretical notions to analyze changes in organisation substance and governance in several environmental policy domains such as infrastructure policies global policies on climate change and biodiversity green planning and agriculture policy Changing relationships between the state the market and civil society caused by processes of globalization privatisation and individualisation have resulted in a plurality of policy arrangements in different domains Despite the fact that environmental politics has been substantially renewed there is a delicate balance between traditional and new policy arrangements One of the main themes of the book is the explanation of this balance *Philosophy, Technology, and the Environment* David M. Kaplan, 2017-03-03 Contributions by prominent scholars examining the intersections of environmental philosophy and philosophy of technology Environmental philosophy and philosophy of technology have taken divergent paths despite their common interest in examining human modification of the natural world Yet philosophers from each field have a lot to contribute to the other Environmental issues inevitably involve technologies and technologies inevitably have environmental impacts In this book prominent scholars from both fields illuminate the intersections of environmental philosophy and philosophy of technology offering the beginnings of a rich new hybrid discourse All the contributors share the

intuition that technology and the environment overlap in ways that are relevant in both philosophical and practical terms. They consider such issues as the limits of technological interventions in the natural world, whether a concern for the environment can be designed into things, how consumerism relates us to artifacts and environments, and how food and animal agriculture raise questions about both culture and nature. They discuss among other topics the pessimism and dystopianism shared by environmentalists, environmental philosophers, and philosophers of technology; the ethics of geoengineering and climate change; the biological analogy at the heart of industrial ecology; green products and sustainable design; and agriculture as a bridge between technology and the environment.
