teachers a framework for collaborating with children to create a dynamic emergent curriculum. *Reflection, Perspective-Taking, and Social Justice* Jacky Howell, Makai Kellogg, Magy Youssef, Sabina Zeffler, 2024-05-28 This book brings readers inside the school to aid them in their own personal and professional reflections on practices and ways of being with children in this shared journey towards a better world. How can we support children and teachers continued growth as kind, caring, compassionate people that work towards equity in this world? At School for Friends in Washington DC, educators Makai Kellogg, Magy Youssef, and Sabina Zeffler, and mentor Jacky Howell have worked to nurture and strengthen children's dispositions for empathy and kindness anchored by Quaker values, the guiding principles of the Black Lives Matter movement, and mindfulness practice with a lens of social justice and equity. The authors weave real stories and reflections as they trace the learning journey of children in their program from toddlers through the time they leave for kindergarten. Magy's story of Frank the Fish opens up the world of toddlers who not only learn how to care for their classroom pet but also naturally build and display empathy as they come to understand disability. Makai highlights empathy as the first and foundational Black Lives Matter guiding principle. Using children's literature, her students develop a deeper perspective into social-emotional learning beyond being nice. In her work with the oldest preschoolers, Sabina shares in her story of the many ways she focuses on perspective-taking with her group, including stories of buddy play, heartfelt listening, holding space, and cognitive flexibility. The three educators with mentor Jacky reflect on their experiences together as they exercise the empathy and perspective-taking we ask children to practice. Participatory Research with Young Children Angela Eckhoff, 2019-08-06 This book presents a guiding framework for designing and supporting participatory research with young children. The volume shares detailed approaches to research designs that support collaborative work with young children and teachers in a wide range of early learning environments. It presents conceptual and ethical considerations for participatory work and explores children's agency through engagement in participatory practices. It examines challenges to accepted practices and understandings of young children and discusses the analysis and dissemination of participatory work with children. In doing so, the book informs readers about the conceptual understandings and methodological approaches that can be used to support participatory research investigations where the young child is viewed as knowledgeable and capable of sharing unique opinions, interpretations, and understandings of her experiences as embedded within social, cultural, and political worlds. The book sets the stage for early childhood researchers and educators to develop new understandings grounded in post-developmental, critical, and social constructivist theories while exploring supportive methodological approaches.
