Mapping the Edges and the In-between Nancy Nyquist Potter, 2009-06-25 Borderline Personality Disorder BPD is a diagnosis given to ten percent of all those seen in outpatient mental health facilities and twenty percent of those seen in inpatient psychiatric units This is a significant number of people in the Western world Yet many of the core concepts and symptoms that underlie this diagnosis are questionable Many of the attitudes and actions of carers are based on assumptions about those with BPD that cry out for analysis with both cultural and gender norms interacting with clinical diagnosis and

treatment to the detriment of both carers and patients This book considers how we diagnose BPD looking at the key constructs identity disturbance inappropriate or excessive anger unstable relationships impulsivity self injurious behaviour and manipulativity It starts by looking at the cultural and gender assumptions and norms behind BPD drawing upon philosophical clinical anthropological and sociological literature Combining philosophical analysis with clinical experience and patients writings it clarifies the constructs so that the reader can understand the messiness and complexity that frames this diagnosis and treatment After examining the current state of these constructs and their effects on carer patient interactions Part II sees an application of virtue theory to therapeutic treatment with BPD patients It looks at three virtues that are particularly important for clinicians and other carers to cultivate when working with BPD patients trustworthiness the virtue of giving uptake and empathy It argues that in their absence not only are clinicians attitudes harmful to patients but that the status of the diagnosis is actually compromised Mapping the Edges and the In Between presents a compelling argument that Borderline Personality Disorder needs to be approached in a new light one that will benefit patients
