Have you ever wondered how a work of art could be worth millions Has the world gone mad when Damien Hirst sells a dead shark for 12 million or a Picasso painting goes for 20 million Some people think that art has nothing to do with money that true art does not have a price tag but it is really difficult to believe this in a world where the contemporary art market is worth 62 billion a year The problem says philosopher Daniel Barnes is that nowadays it is more difficult than ever to tell the difference between good art and expensive art In *The Value Industry* Barnes explores the relationship between art and money He argues that art is valuable as both culture and economics but these are radically different things and the art market constantly attempts to blur the boundaries Through a heady mixture of art market news art criticism and philosophy Barnes demonstrates that despite all the money and headlines art will always survive the ravages of capitalism because it is worth so much more than money High auction prices billionaire collectors celebrity endorsements and artists publicity stunts only serve to create the myth that the value of art is monetary but the true value lies in the way that art enriches human existence      Three Reflections on Contemporary Art History Amelia Barikin,Ian McLean,Terry E.
