**Teach, Reflect, Learn** Pete Hall, Alisa Simeral, 2015-04-15. It's not the doing that matters; it's the thinking about the doing, said John Dewey. As a teacher, you work hard to make a positive difference in the lives of your students. But this kind of progress doesn't happen overnight and it doesn't happen accidentally. It's the result of intentionality, planning, effort, and thought. The difference between learning a skill and being able to implement it effectively resides in your capacity to engage in deep, continuous thought about that skill. In other words, recognizing why you do something is often more important than knowing how to do it. To help you deepen your thinking and reflect on your capacity as an educator, Pete Hall and Alisa Simeral return to the Continuum of Self-Reflection, which they introduced to coaches and administrators in their best-selling *Building Teachers' Capacity for Success*, and redesign its implementation so you can take charge of your own professional growth. In these pages, you'll find tools specifically made to enhance self-reflection on professional practice, including the Continuum of Self-Reflection and the Reflective Cycle. You'll be able to assess your current self-reflective tendencies, identify opportunities to reflect on your instruction, and begin to forge a path toward continuous growth and educational excellence.

**Implementing and Analyzing Performance Assessments in Teacher Education** Joyce E. Many, Ruchi Bhatnagar, 2017-12-01. Teacher education has long relied on locally developed assessments that lack reliability and validity. Rigorous performance-based assessments for preservice teachers have been advanced as one possible way to ensure that all students receive instruction from a high-quality teacher. Recently, performance-based assessments have been developed which focus on the application of knowledge of teaching and learning in a classroom setting. Our book explores factors related to the implementation of teacher performance assessments in varying state and institutional contexts. The contributors, teacher educators from across the country, focus on what was learned from inquiries conducted using diverse methodologies: quantitative, qualitative, self-studies, and mixed methods. Their research encompassed faculty supervisors, cooperating teachers, and students' perceptions and concerns of teacher performance assessments; case studies of curricular reform and/or resistance; analyses of experiences and needs as a result of the adoption of such assessments and examinations of the results of program alignment and reform. The chapters showcase experiences which occurred during high-stakes situations in implementation periods prior to high-stakes adoption and in contexts where programs adopted performance assessments as an institutional policy rather than as a result of a state-wide mandate. Endorsements. The chapters compiled for *Implementing and Analyzing Performance Assessments in Teacher Education*, edited by Joyce E. Many and Ruchi Bhatnagar, present a thoughtful look at the challenges and solutions embedded in the adoption of teacher performance
