Reflections On Reasoning:

Reflections on Reasoning Raymond S. Nickerson, 2019-06-19 This book is an adaptation of a report entitled Notes about Reasoning prepared under a project on The Training of Higher Cognitive Learning and Thinking Skills that was sponsored by the National Institute of Education My purpose in producing the notes was to help me clarify my own thinking about reasoning and how the ability to reason effectively might be enhanced in the classroom I did not intend to write a textbook on reasoning or a scholarly review of research on reasoning processes and this book is not presented as either now It still has the character of a collection of thoughts it is being published with the hope that some of the ideas and suggestions in it may stimulate some others especially teachers and students to reflect more than they otherwise might have upon what it means to reason effectively One does not of course become an effective reasoner by reading a book on reasoning or by taking a course in reasoning Learning to reason well is surely a lifelong process or at least a lifelong challenge If this book is useful in helping some readers to see the value of an enduring commitment to that challenge it will have served its purpose I wish to thank the NIE Project Officers Patricia Butler and Joseph Psotka for their support and encouragement I am grateful also to John Swets Richard Herrnstein David Perkins and Carol Chomsky for helpful comments on an early draft of the manuscript to Anne Kerwin and Patricia Carroll for typing the manuscript and to Brenda Starr and Frank DiPace for making electronic delivery of it to the printer possible by working around the differences between the sending and receiving systems Special thanks to my wife Doris for her constant help of countless types and most especially for bringing into the world the four beautiful people to whom this book is dedicated

Self-Reflection for the Opaque Mind T. Parent, 2016-12-01 This volume attempts to solve a grave problem about critical self reflection The worry is that we critical thinkers are all in epistemic bad faith in light of what psychology tells us After all the research shows not merely that we are bad at detecting ego threatening thoughts la Freud It also indicates that we are ignorant of even our ordinary thoughts e g reasons for our moral judgments of others Haidt 2001 and even mundane reasons for buying one pair of stockings over another Nisbett Wilson 1977 However reflection on one s thoughts requires knowing what those thoughts are in the first place So if ignorance is the norm why attempt self reflection The activity would just display naivety about psychology Yet while respecting all the data this book argues that remarkably we are sometimes infallible in our self discerning judgments Even so infallibility does not imply indubitability and there is no Cartesian ambition to provide a foundation for empirical knowledge The point is rather to explain how self reflection as a rational activity is possible

Leibniz on Apperception, Consciousness, and Reflection Mark Kulstad, 1991 This work represents an investigation of the most important properties of the human mind consciousness apperception and reflection and of their significance for Leibnizian philosophy The development of Leibniz's thinking in the course of his treatment of these themes receives especially detailed treatment and is thoroughly documented on the basis of the original texts The concepts of consciousness and reflection were the object of intensive discussion in the 17th century Starting out from the problem of the distinction between humans and brutes Descartes view of animals as mere machines was always decisively rejected by Leibniz Kulstad shows the significance of these concepts in the early writings of Leibniz He shows how Leibniz was then stimulated by Locke to add the word apperception into his philosophy The author sets out the influence of Locke on Leibniz and demonstrates how Leibniz adopted a firmer and more constant position as to the relation

between consciousness and reflection than one finds in Locke's own writings. From the beginning to the end of his life, Leibniz defends the thesis that both consciousness and reflection consist in the memory of one mental act via another. The author shows how Leibniz hereby aligns himself with an European philosophical tradition which can be traced back to Plato, Aristotle and Aquinas. Of course a clarification of the meanings of words such as consciousness, reflection and apperception is important not only for an understanding of Leibniz's philosophy but also for contemporary metaphysics and theory of knowledge. Leibniz certainly recognized and thought through the problems associated with these words but he never developed a final coherent theory, a fact which certainly reflects in part the complexity of the underlying problems. By exploiting not only all the relevant Leibnizian writings but also the results of more recent philosophy in this field, Kulstad is able to draw a reliable picture both of Leibniz's treatment of these problems and of the influence of his views on his contemporaries and successors.

The Psychoanalytic Craft Laurence Spurling, 2017-09-16. This book identifies and explores what is missing in therapy practice, namely the craft aspects of skilled psychoanalytic work: how theories and models are actually used in practice, what kind of reasoning is employed in conducting a session and how interventions are composed and evaluated. The text shows how these features of clinical thinking, which normally operate below the level of awareness, can be identified and explored in clinical practice, in supervision and in teaching. This clear and vividly written book addresses the needs of practitioners and trainees moving beyond beginner level to more skilled and attuned practice.
