Wilson, 2019 Originally published by Rowman Littlefield Publishers an imprint of The Rowman Littlefield Publishing Group Inc Copyright 2000 Title page verso Contested Worlds Martin Phillips, 2017-09-29 Contested Worlds provides an introduction both to a multitude of geographical worlds which are currently being actively constructed and contested and to a range of different perspectives on these worlds being adopted and contested by geographers It is unique in its focus on the role of contestation in both the construction of geographical studies and in the geographies these studies seek to address These issues are explored through a combination of general theoretical discussion and detailed international case studies The areas discussed range in scale from the global through the regional and national to the local worlds of the inner city the neighbourhood and the village with connections drawn between these scales The book concludes that geography is being made in quite different ways It asserts that geography is intrinsically a contested enterprise and that this should be embraced as part of geographers becoming more critically involved in the making and studying of new contemporary human geographies Reading Kant's Lectures Robert R. Clewis, 2015-09-14 This important collection of more than twenty original essays by prominent Kant scholars covers the multiple aspects of Kant's teaching in relation to his published works With the Academy edition's continuing publication of Kant's lectures the role of his lecturing activity has been drawing more and more deserved attention Several of Kant's lectures on metaphysics logic ethics anthropology theology and pedagogy have been translated into English and important studies have appeared in many languages But why study the lectures When they are read in light of Kant's published writings the lectures offer a new perspective of Kant's philosophical development clarify points in the published texts consider topics there unexamined and depict the intellectual background in richer detail And the lectures are often more accessible to readers than the published works This book discusses all areas of Kant's lecturing activity Some essays even analyze in detail the content of Kant's courses and the role of textbooks written by key authors such as Baumgarten helping us understand Kant's thought in its intellectual and historical contexts Contributors Huaping Lu Adler Henny Blomme Robert Clewis Alix Cohen Corey Dyck Faustino Fabbianelli Norbert Fischer Courtney Fugate Paul Guyer Robert Loudon Antonio Moretto Steve Naragon Christian Onof Stephen Palmquist Riccardo Pozzo Frederick Rauscher Dennis Schulting Oliver Sensen Susan Shell Werner Stark John Zammito G nter Z ller **Handbook of Cultural Geography** Kay

Barcus,Keith Halfacree,2017-09-01 An Introduction to Population Geographies provides a foundation to the incredibly diverse topical and interesting field of twenty first century population geography It establishes the substantive concerns of the subdiscipline acknowledges the sheer diversity of its approaches key concepts and theories and engages with the resulting major areas of academic debate that stem from this richness Written in an accessible style and assuming little prior knowledge of topics covered yet drawing on a wide range of diverse academic literature the book s particular originality comes from its extended definition of population geography that locates it firmly within the multiple geographies of the life course Consequently issues such as childhood and adulthood family dynamics ageing everyday mobilities morbidity and differential ability assume a prominent place alongside the classic population geography triumvirate of births migrations and deaths This broader framing of the field allows the book to address more holistically aspects of lives across space often provided little attention in current textbooks Particular note is given to how these lives are shaped though hybrid social biological and individual arenas of differential life course experience By engaging with traditional quantitative perspectives and newer qualitative insights the authors engage students from the quantitative macro scale of population to the micro individual scale Aimed at higher level undergraduate and graduate students this introductory text provides a well developed pedagogy including case studies that illustrate theory concepts and issues The Oxford Handbook of Environmental History Andrew C. Malek,2016-07-27 The social sciences are still predominantly modernist disciplines and as such products of the Enlightenment Recent challenges to Enlightenment thinking thus carry with them the potential or threat to transform the social sciences radically Postmodernism and the Social Sciences examines the nature and potential of this postmodernist challenge in each of the major social sciences Starting with the practices of particular disciplines and proceeding to matters of shared concern the essays provide an accessible discussion of the contemporary impact of postmodernism on social scientific thought

**Landscape, Tourism, and Meaning** Michelle M. Metro-Roland, Daniel C. Knudsen, Charles E. Greer, 2016-04-22 How do we re theorize tourism By drawing less on the Foucauldian notion of tourism as gazing and instead focusing on the social construction of meaning in the landscape this insightful book provides an innovative and compelling new approach to tourist studies Arguing that in any view of the landscape and in tourism generally there is a multiplicity of insider and outsider meanings the book grounds tourism studies within the framework of social theory and particularly in the social theoretic approaches to landscape Bringing together specialists in tourism and landscape studies to discuss the relationships between the two it finds that issues of identity are a common thread and are raised with regard to the social construction of landscape and its portrayal through tourism The international studies range in scale from regional to national personal to political and from local residents to international tourists highlighting the multiplicity of interpretations and meanings between these scales

[The Myth of Continents](#) Martin W. Lewis, Kären Wigen, 1997-08-11 In this thoughtful and engaging critique geographer Martin W Lewis and historian K ren Wigen reexamine the basic geographical divisions we take for granted and challenge the unconscious spatial frameworks that govern the way we perceive the world Arguing that notions of East vs West First World vs Third World and even the sevenfold continental system are simplistic and misconceived the authors trace the history of such misconceptions Their up to the minute study reflects both on the global scale and its relation to the specific continents of Europe Asia and Africa actually part of one contiguous landmass The Myth of Continents sheds new light on how our metageographical assumptions grew out of cultural concepts how the first continental divisions developed from classical times how the Urals became the division between the so called continents of Europe and Asia how countries like Pakistan and Afghanistan recently shifted macroregions in the general consciousness This extremely readable and thought provoking analysis also explores the ways that new economic regions the end of the cold war and the proliferation of communication technologies change our understanding of the world It stimulates thinking about the role of large scale spatial constructs as driving forces behind particular worldviews and encourages everyone to take a more thoughtful geographically informed approach to the task of describing and interpreting the human diversity of the planet

**Region-Making and Cross-Border Cooperation** Elisabetta Nadalutti, Otto Kallscheuer, 2017-12-15 This book explores the nature of regions and how they function particularly at the local and micro level Whilst recent years have seen a resurgence in debates around the roles which regions can play in development the focus has tended to be on macro

regional institutions such as the EU ASEAN ECOWAS or MERCOSUR In contrast this book offers a nuanced analysis of the important field of sub regionalism and sub national cross border cooperation Region Making and Cross Border Cooperation takes a fresh look at both theoretical and empirical approaches to region making through cooperation activities at the micro level across national borders in Europe Southeast Asia Latin America Africa and the Middle East The book aims to explore the role that institutional dynamics play at the micro level in shaping local and global ties investigate what the formal and informal integration factors are that bolster regionalism and regionalization processes and to clarify to what extent and under what conditions cooperation at the micro level can be instrumental to solving common problems Scholars and students within politics sociology geography and economics would find this book an important guide to regionalism at a micro local level perspective
