Nature, Human Nature, & Human Difference Justin E. H. Smith,2015-06-30 People have always been xenophobic but an explicit philosophical and scientific view of human racial difference only began to emerge during the modern period Why and how did this happen Surveying a range of philosophical and natural scientific texts dating from the Spanish Renaissance to the German Enlightenment Nature Human Nature and Human Difference charts the evolution of the modern concept of race and shows that natural philosophy particularly efforts to taxonomize and to order nature played a crucial role Smith demonstrates how the denial of moral equality between Europeans and non Europeans resulted from converging philosophical and scientific developments including a declining belief in human nature s universality and the rise of biological classification The racial typing of human beings grew from the need to understand humanity within an all encompassing system of nature alongside plants minerals primates and other animals While racial difference as seen through science did not arise in order to justify the enslavement of people it became a rationalization and buttress for the practices of trans Atlantic slavery From the work of Fran ois Bernier to G W Leibniz Immanuel Kant and others Smith delves into philosophy s part in the legacy and damages of modern racism With a broad narrative stretching over two centuries Nature Human Nature and Human Difference takes a critical historical look at how the racial categories that we divide ourselves

into came into being *Personal Journals of a Would-Be Philosopher* George Lysloff,2014-03-13 The book is a sequence of personal reflections covering a recent period of close to half a year almost forgotten memories that rose from the authors childhood and adolescence periods covering the Second World War in France and later the eastern part of the Third Reich Most of the pages however are concerned with the mostly unorthodox philosophical considerations that have preoccupied him over the most part of his life attempting to clarify some terms or notions that characterize his views of existence reality and his and mans relationship to God and calls it transcendence The positions he expresses are continuation to comments and ideas he expressed in previous books he wrote in the last decade **Memory in the Ontopoiesis of Life** Anna-Teresa Tymieniecka,2009-09-30 From Aristotle to the present memory has been grasped as a trace or impression of lost reality bridging physiological experience and consciousness Philosophers have vainly sought the nature of this bridge The present day physiologizing naturalizing of consciousness is not resolving their congenital continuity in which the very existence and practice of life is rooted We have to change our approach Erwin Straus The Aristotelian congenital ties between memory and temporality acquire crucial significance in our primogenital ontoipoiesis of life Tymieniecka It reveals memory to be the factor that carries this coalescence and the becoming of life itself This can be the fruit only of the generative springs of life first phenomenology philosophy the ontoipoietic logos of life In this collection we explore memory in the constitution of reality remembering and interpretation consciousness action facts imagination history myths self realization metamorphosis
