Loeb,2010-09-15 A unifying theme of Loeb s work is epistemological that Descartes and Hume advance theories of knowledge that rely on a substantial naturalistic component adopting one or another member of a cluster of psychological properties of beliefs as the goal of inquiry and the standard for assessing belief forming mechanisms Thus Loeb shows a surprising affinity between the epistemologies of the two figures surprising because they are often thought of as polar opposites in this respect Descartes and Hume are unique in that their philosophical texts are accessible beyond just a narrow audience in the history of philosophy their ideas continue to be a vital part of the field at large This volume will thus appeal to advanced students and scholars not just in the history of early modern philosophy but in epistemology and other core areas of the discipline **Handbook of Research on Facilitating Collaborative Learning Through Digital Content and**

Learning Technologies Keengwe, Jared,2022-12-28 Digital content and learning technologies are now the norm at all levels of education However there is evidence to suggest that this digital shift is on a spectrum and the spectrum impacts learners in different ways This means that some instructors who seek to integrate digital content may do so using traditional teaching methods while others use innovative practices to engage learners Those who integrate innovative digital practices align their instructional practice with theories to facilitate student centered pedagogies that support and improve the depth and scope of student learning A primary characteristic of student centered learning is facilitating collaborative learning using digital content and learning technologies to engage students as well as to enhance meaningful learning The Handbook of Research on Facilitating Collaborative Learning Through Digital Content and Learning Technologies provides K 20 educators with alternative pedagogical and andragogical models that are innovative and incorporate digital content and learning technologies that promote constructive learning Further this book explores the relationship between constructivist learning digital content and learning technologies A primary argument in this book is that constructivist teaching strategies such as collaborative learning coupled with digital content and purposeful learning technologies could benefit student learning in ways that are different from those practiced in traditional non digital learning environments Covering topics such as instructional design self efficacy and library engagement this major reference work is an essential resource for pre service teachers teacher educators faculty and administrators of K 20 education librarians researchers and academicians

Intentionality in Husserl and Heidegger B.C. Hopkins,2013-04-17 1 Remarks on the Current Status of the

Problematic The literature treating the relationship between the phenomenologies of Husserl and Heidegger has not been kind to Husserl Heidegger's devastating phenomenologically ontological critique of traditional epistemology and ontology advanced under the rubric of fundamental ontology in *Being and Time* has almost been universally received despite the paucity of its references to Husserl as sounding the death knell for Husserl's original formulation of phenomenology The recent publication of Heidegger's lectures from the period surrounding his composition of *Being and Time* lectures that contain detailed references and critical analyses of Husserl's phenomenology and which in the words of one respected commentator Rudolf Bernet offer at long last insight into the principal sources of fundamental ontology² will if the conclusions reached by the same commentator are any indication serve only to reinforce the perception of Heidegger's phenomenological superiority over Husserl This is not to suggest that the tendency toward Heidegger partisanship in the literature treating the relationship of his phenomenology to Husserl's has its basis in extra philosophical or extra phenomenological concerns and considerations Rather it is to draw attention to the undeniable fact that Heidegger's reformulation of Husserl's phenomenology has cast a spell over all subsequent discussions of the basic problems and issues involved in what has become known as their controversy

Intuition and Reflection in Self-Consciousness Kitarō Nishida, 1987-01-01 Nishida Kitarō's reformulation of the major issues of Western philosophy from a Zen standpoint of absolute nothingness and absolutely contradictory self identity represents the boldest speculative enterprise of modern Japan continued today by his successors in the Kyoto School of philosophy This English translation of Intuition and Reflection in Self Consciousness evokes the movement and flavor of the original clarifies its obscurities and eliminates the repetitions It sheds new light on the philosopher's career revealing a long struggle with such thinkers as Cohen Natorp Husserl Fichte and Bergson that ended with Nishida's break from the basic ontological assumptions of the West Throughout labyrinthine arguments Nishida never loses sight of his theme the irreducibility and unobjectifiability of the act of self consciousness which constitutes the self Extensive annotation is provided for the first time in any edition of Nishida's work Historians of Japanese philosophy and

culture and all those interested in the interaction of Eastern and Western thought forms now have a document which highlights many of the cultural psychological and intellectual dynamics that have shaped Japanese intellectual life in one of its most fascinating and ambitious manifestations
