have warned of the perils of a life spent without reflection but what constitutes reflective inquiry and why it's necessary in our lives can be an elusive concept. Synthesizing ideas from minds as diverse as John Dewey and Paulo Freire, the *Handbook of Reflection and Reflective Inquiry* presents reflective thought in its most vital aspects not as a fanciful or nostalgic exercise but as a powerful means of seeing familiar events anew, encouraging critical thinking and crucial insight teaching and learning. In its opening pages, two seasoned educators, Maxine Greene and Lee Shulman, discuss reflective inquiry as a form of active attention, Thoreau's wide awakeness, an act of consciousness and a process by which people can understand themselves, their work, particularly in the form of life projects, and others. Building on this foundation, the *Handbook* analyzes through the work of 40 internationally oriented authors definitional issues concerning reflection, what it is and is not, worldwide social and moral conditions contributing to the growing interest in reflective inquiry in professional education, reflection as promoted across professional educational domains including K-12 education, teacher education, occupational therapy, and the law, methods of facilitating and scaffolding reflective engagement, current pedagogical and research practices in reflection, approaches to assessing reflective inquiry, educators across the professions as well as adult educators, counselors, and psychologists, and curriculum developers concerned with adult learning. Those who will find the *Handbook of Reflection and Reflective Inquiry* an invaluable teaching tool for challenging times.

Learning and Leading with Habits of Mind
Bena Kallick, 2008-12-15

In *Learning and Leading with Habits of Mind*, noted educators Arthur L. Costa and Bena Kallick present a comprehensive guide to shaping schools around Habits of Mind. The habits are a repertoire of behaviors that help both students and teachers successfully navigate the various challenges and problems they encounter in the classroom and in everyday life. The Habits of Mind include: Persisting, Managing impulsivity, Listening with understanding and empathy, Thinking flexibly, Thinking about thinking (metacognition), Striving for accuracy, Questioning and posing problems, Applying past knowledge to new situations, Thinking and communicating with clarity and precision, Gathering data through all senses, Creating, imagining, innovating, Responding with wonderment and awe, Taking responsible risks, Finding humor, Thinking interdependently, Remaining open to continuous learning. This volume brings together in a revised and expanded format concepts from the four books in Costa and Kallick's earlier work *Habits of Mind: A Developmental Series*. Along with other highly respected scholars and practitioners, the authors explain how the 16 Habits of Mind dovetail with up-to-date concepts of what constitutes intelligence, present instructional strategies for activating the habits, and creating a thought-full classroom environment. They offer assessment and reporting strategies that incorporate the habits and provide real-life examples of how communities, school districts, building administrators, and teachers can integrate the habits into their school culture. Drawing upon their research and work over many years in many countries, Costa and Kallick present a compelling rationale for using the Habits of Mind as a foundation for leading teaching, learning, and living well in a complex world.
