Reform Of Retirement Income Policy International And Canadian Perspectives:

Reform of Retirement Income Policy Keith G. Banting, Robin W. Boadway, Queen's University (Kingston, Ont.). School of Policy Studies, 1997 The retirement income system has been hailed as one of the great successes of Canadian social policy. However, contemporary pressures have generated a vigorous debate about the way ahead. Fundamental reforms are being proposed and Canadians face important choices.

Ageing and Pension Reform Around the World Giuliano Bonoli, Toshimitsu Shinkawa, 2006-01-01 This is an admirable example of a multi-authored comparative book. The two editors set the scene very carefully in the opening chapter and the subsequent chapters follow the framework set out and use the concepts explored there. In this never-simple policy area, national systems are explained as clearly as possible by each author. Michael Hill, *Journal of Social Policy*. This is an enlightening introduction to the global dimensions and complexity of pension reform. Recommended. J. F. O'Connell. Choice. Population ageing and the resulting pressures on existing pension systems constitutes one of the most important challenges modern societies will have to face over the coming decades. Although governments have responded to such pressures by adopting a plethora of pension reforms, the adaptation process is far from over. This book comprehensively documents developments in pension policy in eleven advanced industrial countries in Western Europe, East Asia, and North America. In order to explore what population ageing means for the sustainability of pension systems, the authors present a detailed review of pension policy making over the past two decades and provide up-to-date analysis of current pension legislation. They examine the factors that can facilitate or impede the adaptation of pension systems and the features that shape and determine reforms. They also highlight the fact that although the path of reform taken by each country is somewhat different, the processes at work are often very similar. Ageing populations throughout the world are extremely reluctant to see their pension systems dismantled and are therefore prepared to mobilise in their defence. This process of mobilisation interacts with demographic pressures and institutional constraints to help determine the future direction of pension policy. The breadth of geographic coverage provides an almost global picture of the impact of ageing on pension reform at least in terms of high-income countries. Academics and students with an interest in economics, social policy, sociology, and political science will find this a worthwhile and rewarding volume. It will also be of value to policymakers interested in how the problem of unsustainable pension systems can be resolved.

Beyond the Welfare State Sirvan Karimi,2017-01-18 Neoliberal calls for welfare state reforms especially cuts to public pensions are a contentious issue for employees employers and national governments across the western world But what are the underlying factors that have shaped the response to these pressures in Canada and Australia In *Beyond the Welfare State* Sirvan Karimi utilizes a synthesis of Marxian class analysis and the power resources model to provide an analytical foundation for the divergent pattern of public pension systems in Canada and Australia Karimi reveals that the postwar social contract in Australia was market based and more conducive to the privatization of retirement income In Canada the social contract emphasized income redistribution that resulted in strengthening the link between the state and the citizen By shedding light on the impact of national settings on public pension systems *Beyond the Welfare State* introduces new conceptual tools to aid our understanding of the welfare state at a time when it is increasingly under threat

Pension Systems and Retirement Incomes Across OECD Countries Richard Disney,Paul Johnson,2001-01-01 An analysis of the pension reform process in nine countries It examines the policy reform process in each country against the background of the fiscal stresses arising from ageing populations It also explores whether different pension delivery systems generate different standards of living *Universality and Selectivity in Income Support* Sheila Shaver,2019-05-20 First published in 1997 this report examines the classic social policy question of whether pensions should be paid only to those with relatively few other resources so that scarce funds go to the people who need them most or whether it is more just and pensions are more willingly funded when everyone can expect to get one in their turn Since the 1980s the scale of social expenditure has come into question in most advanced industrial nations The large share of this expenditure devoted to the support of the aged amidst growing numbers of old and very old people has put age pensions at the centre of this discussion Sheila Shaver examines this classic question in a comparative analysis of income support in six countries drawing on data from the Luxembourg Income Study and the International Social Survey Programme The statistical studies are embedded in a discussion of social policy and citizenship need poverty and social cohesion and the structure and restructuring of welfare states **Ageism and Mistreatment of Older Workers**

Patricia Brownell,James J. Kelly,2012-12-11 This book promotes an understanding of ageism discrimination and mistreatment of older adult workers incorporating an international human rights perspective The impact of ageism on the mistreatment of older adult workers has not to date been examined in depth through the lens of international human rights instruments nor has discrimination against older adults in the workplace been framed as a form of elder abuse for research and policy making purposes This book presents a multi disciplinary exploration of these themes as they affect work and retirement of older adults It reflects the view that older people who choose to work into old age should be able to do so in enabling work environments that promote dignity and are free of abuse The contributing authors come from many disciplines including law psychology social work business and international affairs Many are members of the International Network for the Prevention of Elder Abuse INPEA a non governmental organization with consultative status at the United Nations and have devoted their professional careers to increase awareness and understanding of elder abuse in order to prevent it The editors hope that broadening the framework within which elder abuse in the workplace is understood will stimulate further research policy and program development to address this troubling social problem
