Christianity and Democracy John W. De Gruchy, 1995-06 The need for global democratisation is now widely recognised but there is considerable debate about what this means and how it can be achieved In this important study John de Gruchy examines the historic and contemporary roles of Christianity in the development of democracy He traces the gestation of modern democracy in medieval Christendom and then describes the virtual breakdown of the relationship as democracy becomes the polity of modernity Five twentieth century case studies the USA Nicaragua sub Saharan Africa Germany and South Africa demonstrate the extent to which ecumenical Christianity has begun to reconnect with democracy and act as its contemporary midwife De Gruchy argues that democracy needs to rediscover its spiritual heritage while Christianity needs to develop a theology adequate for its participation in the realisation of a just democratic world order

Navigating Reformed Identity in the Rural Dutch Republic Kyle Dieleman, 2025-10-01 Through an examination of Dutch Reformed church records and theological texts Kyle Dieleman explores the local dynamics of religious life in the early modern Dutch Republic The book argues that within the religiously plural setting of the Dutch Republic church officials used a variety of means to establish a Reformed identity in their communities As such the book explores the topics of church orders elders and deacons intra confessional and inter confessional conflicts and Sabbath observance as local means by which small rural communities negotiated and experienced their religious lives In exploring rural Dutch Reformed congregations the book examines the complicated relationships between theology and practice and lay and elite religion and highlights challenges rural churches faced As they faced these issues Dieleman demonstrates that local congregations exercised agency within their lived religious experiences as they

sought unique ways to navigate their own Reformed identity within their small rural communities Preachers and People in the Reformations and Early Modern Period Larissa Taylor, 2021-10-01 Sermons are an invaluable source for our knowledge of religious history and sociology anthropology and the mental landscape of men and women in pre modern Europe of what they were taught and what they practiced But how did an individual process the preached message from the pulpit How exactly do written sermons duplicate the preached Word Do they at all The 11 leading scholars who have contributed to this book do not offer uniform answers or an all encompassing study of preaching in the Reformations and early modern period in Europe They do however provide new insights on Catholic Lutheran and Reformed preaching in Western and Central Europe Part One examines changes in sermon structure style and content in Christian sermons from the thematic sermon typical of the Middle Ages to the wide variety of later preaching styles Catholic preaching after Trent proves not to be monolithic and intolerant but a hybrid of forms past and present applied as needed to particular situations Lutheran homiletic theory is traced from Luther and through Melancthon the intention of the sermon being to transform the worship service based on exegesis of Scripture In Reformed worship the expository sermon often given on a daily basis with a continuing exegesis was designed to communicate the tenets of the faith in terms that the laity could understand plain style Part Two deals with the social history of preaching in France where preachers often incited their hearers to attack human beings or holy objects or were themselves attacked in Italy where preaching became a collective and home grown product in early modern Germany where the authorities strove for uniformity of preaching practice and the preacher was seen as a moral guardian in Switzerland where leaders from Zwingli on sought to bring religious practice conduct and government in line with biblical teaching and propagated a pastoral vision of preaching in England where after the Reformation preachers became the indispensable agents of salvation but clergy and congregations were often ill prepared for the task in Scandinavia where post Reformation sermons have a clear didactic aim teaching obedience to the authorities and in the Low Countries characterized by its numerous denominations all with their own churches and particular practices in terms of preaching The volume ends with a consideration of the influence of late medieval preaching on the Reformation concluding that the diversity of emphasis on how the practice of penance was preached and received very likely affected the appeal or not of the Lutheran Reformed message in a given country Covenant and Commonwealth Daniel Elazar, 2018-02-06 At the very beginning of the history of the covenant idea human beings were conceived as entering into a morally grounded and informal pact with God Politically this pact or covenant involves the coming together of basically equal humans who consent with one another through a morally binding pact setting the partners on the road to a new task As a theological and political concept covenant is designed to keep the peace in the face of conflicting human interests needs and demands This pioneering continuation of Daniel J Elazar's work is concerned with political uses of the idea of covenant and the political arrangements that flow from it Covenant and Commonwealth is the second in a series of volumes exploring the covenantal tradition in Western politics The

first Covenant and Polity in Biblical Israel analyzed how the Bible set forth ideas of covenant in ancient Israel and the Jewish political tradition In this volume those themes are taken a step further to examine covenant as a political idea and tradition along with the culture and behavior that they produced The book focuses on the struggle in Europe to produce a Christian covenantal commonwealth a struggle that climaxed in the Reformed Protestantism of the sixteenth and seventeenth centuries It also briefly examines covenant and hierarchy in Islam and other premodern polities that shape our present The third volume in this series will examine the progressive secularization of the covenant idea in the seventeenth and eighteenth centuries Covenant and Commonwealth is a fundamental and original contribution to the scholarship of Western civilization It ranks with commensurate efforts of Ferdinand Braudel and Joseph Needham As such it will be of deep interest to historians social scientists and theologians of all persuasions
