Reforming Retirement Policies:

Reforming Pensions: Principles and Policy Choices Nicholas Barr, Peter Diamond, 2008-09-17 Mandatory pensions are a worldwide phenomenon. However, with fixed contribution rates, monthly benefits, and retirement ages, pension systems are not consistent with three long-run trends: declining mortality, declining fertility, and earlier retirement. Many systems need reform. This book gives an extensive nontechnical explanation of the economics of pension design. The theoretical arguments have three elements: Pension systems have multiple objectives: consumption smoothing, insurance, poverty relief, and redistribution. Good policy needs to bear them all in mind. Good analysis should be framed in a second-best context: simple economic models are a bad guide to policy design in a world with imperfect information and decision making, incomplete markets, and taxation. Any choice of pension system has risk sharing and distributional consequences, which the book recognizes explicitly. Barr and Diamond's analysis includes labor markets, capital markets, risk sharing, and gender and family, with comparison of PAYG and funded systems, recognizing that the suitable level of funding differs by country. Alongside the economic principles of good design, policy must also take account of a country's capacity to implement the system. Thus, the theoretical analysis is complemented by discussion of implementation and of experiences, both good and bad, in many countries, with particular attention to Chile and China.

Pension Reforms in Central, Eastern, and Southeastern Europe Igor Guardiancich,2013 This book traces and analyzes the legislation and implementation of pension reforms in four Central Eastern and Southeastern European countries Croatia Hungary Poland and Slovenia By comparing the political economy of their policymaking processes it seeks to pinpoint regularities between institutional settings actor constellations decision making strategies and reform Guardiancich employs a historical institutionalist framework to analyze the policies actors and institutions that characterized the period between the collapse of socialism and the global financial crisis of 2008 2011 He argues that viable pension reforms should not be seen simply as an event but rather as a continuing process that must be fiscally socially and politically sustainable In particular the primary goal of a pension scheme is to reduce poverty provide adequate retirement income and insure against the risks of old age within given fiscal constraints and this will happen only if the scheme enjoys continuing political support at all levels To this end the author individuates those institutional characteristics of countries that increase the consistency of reforms and lower the likelihood of policy reversals in time Pension Reforms in Central Eastern and Southeastern Europe will be of interest to students and scholars of political science political economy social policy and economics
