*Stakeholder Engagement in a Sustainable Circular Economy* Johanna Kujala, Anna

Heikkinen, Annika Blomberg, 2023-06-26

The purpose of this open access edited collection is to discuss the role and importance of stakeholder engagement in a sustainable circular economy from multiple theoretical and practical perspectives. Developing and maintaining a circular economy is an essential step to a more environmentally friendly and socially inclusive society. In addition to redesigning products and business models to minimise waste and increase the reuse of materials, a transition towards a sustainable circular economy requires collaboration and co operation between various stakeholders from all parts of society. An international team of contributors explore how stakeholder engagement can foster and support sustainable change, assessing current literature and laying out guidance for future study. The collection is of interest to academics and students of sustainability management and sustainable business models, stakeholder theory and practice, and the circular economy.

**Organization Theories & Public Administration: A Critical Annotated Bibliography** Wilson McLean, 2023-03-08. This book is a compilation of critical annotated bibliographies of important and timely articles in public administration and organization theory. The bibliographies are divided into different themes and categories. Under each theme, there are between 10 and 20 annotated bibliographies, over 500 in total, with a thematic summary at the end. The contributors teach at universities in both the United States and abroad in departments ranging from public administration to education to English. Graduate students, especially doctoral students in public administration, have long wanted a book that offers critical summaries of important articles across the discipline to help them with comprehensive exams. The book will also be useful for teachers and professors as a reference work that provides reliable summaries of the key points in the most influential articles from top journals in the field. The book is about organizational theory and praxis in public administration and explores what leading scholars have reported about various aspects of organizations and organizational theories. It not only helps understand the key to organizational success but also explores leadership topics and the various roles and responsibilities of individuals in an organization. The themes into which the annotated bibliography is divided are as follows: Expectancy theory, Motivation, pay incentives and retention, Job satisfaction and quality of work life, Burnout, emotional exhaustion and stress, Realistic job previews and retention, Emotional intelligence, emotional labor and showing emotion at work, Groupthink, Equifinality, Organizational change, Organizational traps, Organizational diagnosis and Organizational learning. The articles summarized in the book help the reader understand organizations, managers, organizational and managerial behaviors, and all the other aspects that come into play in the context of organizations and public administration. The book theoretically and empirically helps readers understand problems and thus find solutions in organizations and public

administration The book reviews the conceptual theoretical and methodological discussions in the articles and presents them in the format of an annotated bibliography under different themes The articles critically discussed and summarized under each theme will give students scholars researchers bureaucrats and teachers a better grasp of the ideas concepts theories and methods needed to understand organization and leadership The book will be useful for anyone who is conducting research in public administration with a focus on organizations and organizational theory and praxis This volume fills an important gap by collecting major research articles in public administration and organizational theory and presents them in the format of a critical annotated bibliography The book is timely and contextual and the articles are discussed under different themes The lucidly written bibliographies summarize articles of 6 000 words or more in between 200 and 500 words Each chapter begins by presenting the relevance of its theme in the public administration context before the annotated bibliography and a thematic conclusion This book is ideal for bureaucrats or managers in organizations and government agencies and for students or scholars in public administration and organizational science It surveys the most important theories and practices in the field and outlines the crucial points of research articles published in leading journals

**Connecting the Dots in Physiotherapy: Reframing the Role of the Profession in the Anthropocene** Berta

Paz-Lourido, Filip Maric, 2025-10-24 For many decades physiotherapy services were characterized by rehabilitative care carried out primarily in hospitals and rehabilitation centers Despite clinical educational and research advances in many parts of the world the imagination of policymakers and administrators in health services remains irremediably linked to large rooms with dozens of stretchers and rehabilitation equipment From those black and white photographs that are part of the honorable past of the profession where physiotherapy played and still plays a crucial role in caring for victims of wars or those with consequences of polio the discipline has moved on to a painting of a multitude of colors Looking toward the future in the Anthropocene requires more than ever to delve into the roots of the etymology of the term physiotherapy much more linked to interventions connected to nature than to closed clinical spaces as much related to health promotion and early intervention as to tertiary conservative and contributory procedures The use of physical agents in their curative preventive and palliative facets is much broader in physiotherapy than in other health disciplines But it is also crucial in public health in the co design of healthy environments in health promotion in schools or in global health interventions to mention just a few Despite all this research practice and innovative education in this area is often invisible and studies that support this breadth are still scarce The current challenges posed by planetary and human health require an alternative vision of health care more linked to healthy environments home neighborhood educational institutions workplace leisure spaces etc and a perspective of health interventions as more integrated with society and the environment The role of physiotherapy in this open space enjoys a growing and strong interest anchored in part as a response to the reductionism that a relevant part of clinical research grants to physiotherapy increased with the massive inclusion of technology as a therapeutic and educational mediator

Incorporating planetary and population health as well as social and ecological perspectives into physiotherapy pedagogy would facilitate community engagement and sustainability in the field. This open approach to physiotherapy allows not only to transform people's lives but also to bring the seemingly distant premises of planetary health to local action. It is now urgently necessary to bring scientific research in this area to the surface, open new debates and create spaces for future studies based on a more systemic, relational and questioning conception of the discipline and its eco-social role and responsibilities. This Research Topic aims to highlight the role of physiotherapy in nature-based health promotion interventions in public health initiatives, global health and planetary health approaches and many more. We will accept all methodologies and study designs including theoretical perspectives. To contribute towards the development of this broad scope of physiotherapy, this Research Topic calls for submissions on physiotherapy linked to natural-based interventions and health promotion. Planetary health from a global, local and local-global perspective. Global health ethics, climate justice and human rights. Environmental physiotherapy in all its approaches. Urban planning and design, green and blue cities, zones, co-participation, governance and public policies. Healthy environments of all types from broad approaches such as healthy cities to other areas such as healthy schools, universities, workplaces, leisure places. Use of raw materials in physiotherapy, sustainability and eco-friendly strategies outdoors, natural spaces and environmentally responsible interventions. Community participation, resilience, climate change and health promotion. Service learning and community engagement. Innovative approaches in physiotherapy education. We would like to send thanks to the following organizations who are in support of this Research Topic and the articles published: iApS 2030, Environmental Physiotherapy Association and European Network of Physiotherapy in Higher Education. **The Routledge Companion to Organizational Change** David Boje, Bernard Burnes, John Hassard, 2012-10-02.
