**Regards d'un biologiste** Marc Klein,1980 Becoming a Physician Thomas Neville Bonner,2000 Focusing on the social intellectual and political context in which medical education took place Thomas Neville Bonner offers a detailed analysis of transformations in medical instruction in the United Kingdom France Germany and the United States between the Enlightenment and World War II From a unique comparative perspective this study considers how divergent approaches to medical instruction in these countries mirrored as well as impacted their particular cultural contexts The book opens with an examination of key developments in medical education during the late eighteenth century and continues by tracing the evolution of clinical teaching practices in the early 1800s It then charts the rise of laboratory based teaching in the nineteenth century and the progression toward the establishment of university standards for medical education during the early twentieth century Throughout the author identifies changes in medical student populations and student life including the opportunities available for women and minorities **Regards d'un biologiste** Marc Klein,1980 Discovering Life, Manufacturing Life Pierre V. Trained as a medical doctor as well as a philosopher he combined these practices to demonstrate to philosophers that there could be no epistemology without concrete study of the actual development of the sciences and to historians that there could be no worthwhile history of science without a philosophical understanding of the conceptual basis of all knowledge. A Vital Rationalist brings together for the first time a selection of Canguilhem's most important writings including excerpts from previously unpublished manuscripts and a critical bibliography by Camille Limoges. Organized around the major themes and problems that have preoccupied Canguilhem throughout his intellectual career the collection allows readers whether familiar or unfamiliar with Canguilhem's work access to a vast array of conceptual and concrete meditations on epistemology methodology science and history. Canguilhem is a demanding writer but Delaporte succeeds in marking out the main lines of his thought with unrivaled clarity readers will come away with a heightened understanding of the complex and crucial place he holds in French intellectual history. *Revue d'histoire des sciences*, 1982. **National Union Catalog**, 1980.
