Secular Buildings In The Crusader Kingdom Of Jerusalem An Archaeological Gazetteer:

Secular Buildings in the Crusader Kingdom of Jerusalem Denys Pringle, 1997-12-11 A descriptive gazetteer of all the secular buildings known to have existed within the Crusader Kingdom of Jerusalem The Conquest of the Holy Land by Salāh al-Dīn Keagan Brewer, James Kane, 2019-04-25 The *Libellus de expugnatione Terrae Sanctae per Saladinum* or Little Book about the Conquest of the Holy Land by al al D n is the most substantial contemporary Latin account of the conquest of the Kingdom of Jerusalem in 1187. Seemingly written by a churchman who was in Jerusalem itself when the city was besieged and captured, the *Libellus* fuses historical narrative and biblical exegesis in an attempt to recount and interpret the loss of the Holy Land, an event that provoked an outpouring of grief throughout western Christendom and sparked the Third Crusade. This book provides an English translation of the *Libellus* accompanied by a new comprehensive critical edition of the Latin text and a detailed study in the introduction.

The Crusades and Visual Culture Laura J. Whatley, 2017-07-05 The crusades, whether realized or merely planned, had a profound impact on medieval and early modern societies. Numerous scholars in the fields of history and literature have explored the influence of crusading ideas, values, aspirations, and anxieties in both the Latin States and Europe. However, there have been few studies dedicated to investigating how the crusading movement influenced and was reflected in medieval visual cultures. Written by scholars from around the world working in the domains of art history and history, the essays in this volume examine the ways in which ideas of crusading were realized in a broad variety of media, including manuscripts, cartography, sculpture, mural paintings, and metalwork. Arguing implicitly for recognition of the conceptual frameworks of crusades that transcend traditional disciplinary boundaries, the volume explores the pervasive influence and diverse expression of the crusading movement from the twelfth through the fifteenth centuries.

Medieval Warfare 1000-1300 John France, 2017-05-15 The study of medieval warfare has developed enormously in recent years. The figure of the armoured mounted knight, who was believed to have materialized in Carolingian times, long dominated all discussion of the subject. It is now understood that the knight emerged over a long period of time and that he was never alone on the field of conflict. Infantry at all times played a substantial role in conflict, and the notion that they were in some way invented only in the fourteenth century is no longer sustainable. Moreover, modern writers have examined campaigns which for long seemed pointless because they did not lead to spectacular events like battles. As a result, we now understand the pattern of medieval war, which often did not depend on battle but on exerting pressure on the opponent by economic warfare. This pattern was intensified by the existence of castles, and careful study has revealed much about their development and the evolving means of attacking them. Crusading warfare pitted westerners against a novel style of war and affords an opportunity to assess the military effectiveness of European methods. New areas of study are now developing. The logistics of medieval armies was always badly neglected, while until very recently there was a silence on the victims of war. Assembled in this volume are 31 papers which represent milestones in the development of the new ideas about medieval warfare set in

context by an introductory essay Western Warfare In The Age Of The Crusades, 1000-1300 John France,2020-09-16 In 1095 the First Crusade was launched establishing a great military endeavour which was a central preoccupation of Europeans until the end of the thirteenth century In Western warfare in the age of the Crusades 1000 1300 John France offers a wide ranging and challenging survey of war and warfare and its place in the development of European Society culture and economy in the period of the Crusades Placing the crusades in a wider context this book brings together the wealth of recent scholarly research on such issues as knighthood siege warfare chivalry and fortifications into an accessible form Western warfare in the age of the Crusades 1000 1300 examines the nature of war in the period 1000 1300 and argues that it was primarily shaped by the people who conducted war the landowners John France illuminates the role of property concerns in producing the characteristic instruments of war the castle and the knight This authoritative study details the way in which war was fought and the reasons for it as well as reflecting on the society which produced the crusades The Southern Transjordan Edomite Plateau and the Dead Sea Rift Valley Burton MacDonald,2015-03-12 Burton MacDonald presents an in depth study of the archaeology and history of human presence over the past five six thousand years in the southern segment of the Transjordan Edomite Plateau and the Dead Sea Rift Valley to the west The evidence from archaeology for the area spans the entire period though the time for which literary evidence is available is only the past 4000 years from the Middle Bronze Age 2000 1550 BC Once literary evidence is available however it complements the archaeological record and as can be amply demonstrated the written records can be clarified only through the archaeological data These two sources are thus used to describe environments resources industries settlement patterns and the lifestyles of the inhabitants of this pivotal region The result is a story of the people who lived in the area from the Bronze Age through the Islamic period What is evident is that there were differences in certain archaeological periods in settlement patterns as well as lifestyles between those who lived on the southern segment of the Plateau and those who lived in the Dead Sea Rift Valley or in the lowlands immediately to the west Moreover it is obvious that when there were periods of trade and industry for example the spice trade and copper mining and processing the population of the area was higher Stable governance brought about growth in population and prosperity But other factors also played their part in these ebbs and flows of population climatic fluctuations affecting the availability of water and arable land the development and adoption of new technologies in farming practices raw material extraction and industrial methods processes and transportation and political change resulting in periods of relative stability and instability in government The Templars Jochen Burgdorf,Shlomo Lotan,Enric Mallorquí-Ruscalleda,2021-04-14 As the oldest of the military religious orders and the one with an unexpected and dramatic downfall the knighthood of the Templars continues to fascinate academics and students as well as the public at large A collection of fifteen chapters accompanied by a historical introduction The Templars The Rise Fall and Legacy of a Military Religious Order recounts and analyzes this community s rise and establishment in both the crusader states of the eastern

Archaeology and Architecture of the Military Orders Mathias Piana, Christer Carlsson, 2016-04-08 As elite communities in medieval societies the Military Orders were driven by the ambition to develop built environments that fulfilled monastic needs as well as military requirements and in addition residential and representational purposes Growing affluence and an international orientation provided a wide range of development potential That this potential was in fact exploited may be exemplified by the advanced fortifications erected by Templars and Hospitallers in the Levant Although the history of the Military Orders has been the subject of research for a long time their material legacy has attracted less attention In recent years however a vast range of topics concerning the Orders building activities has become the object of investigation primarily with the help of archaeology They comprise the choice of sites and building materials provision and storage of food and water aspects of the daily life the design and layout of commanderies churches and fortifications their spatial arrangement and the role these buildings played in their environmental context This volume contains ten articles

discussing the archaeology and architecture of buildings erected by the three major Military Orders in different geographical regions They cover most countries of Western Europe and include a number of important fortifications in the Levant These studies break new ground in the investigation of the built fabric of the Military Orders Written by noted international scholars this publication is an important contribution to modern research on these institutions which in their association of monasticism and knighthood were so typical for the Middle Ages The Military Orders Volume VII Nicholas

Morton, 2019-08-05 The Military Orders essay collections arising from the quadrennial conferences held at Clerkenwell in London have come to represent an international point of reference for scholars This present volume brings together twenty nine papers given at the seventh iteration of this event The studies offered here cover regions as disparate as Prussia Iberia and the Eastern Mediterranean and chronologically span topics from the Twelfth to the Twentieth century They draw attention to little used textual and non textual sources advance challenging new methodologies and help to place these military religious institutions in a broader context **Muslims of Medieval Latin Christendom, c.1050-1614** Brian A.

Catlos, 2014-03-20 Through crusades and expulsions Muslim communities survived for over 500 years thriving in medieval Europe This comprehensive study explores how the presence of Islamic minorities transformed Europe in everything from architecture to cooking literature to science and served as a stimulus for Christian society to define itself Combining a series of regional studies Catlos compares the varied experiences of Muslims across Iberia southern Italy the Crusader Kingdoms and Hungary to examine those ideologies that informed their experiences their place in society and their sense of themselves as Muslims This is a pioneering new narrative of the history of medieval and early modern Europe from the perspective of Islamic minorities one which is not as we might first assume driven by ideology isolation and decline but instead one in which successful communities persisted because they remained actively integrated within the larger Christian and Jewish societies in which they lived *Pilgrims' Castle ('Atlit), David's Tower (Jerusalem) and Qal'at ar-Rabad ('Ajlun)* C.N. Johns, Denys

Pringle, 2019-05-23 First published in 1997 this collection includes papers on Crusader era architecture in Palestine with a focus on Atlit the castle of Ajlun and on the Citadel of Jerusalem both the papers and sites of which have previously been difficult to access The volume is presented partly to repair the very real deficit in the literature on Crusader architecture and partly as a fitting memorial to the author who died in 1992 Atlit in particular held a special significance for C N Johns being the site of his first major project as a field archaeologist His Guide to Atlit a masterly summary of his findings remains the most complete and comprehensive account of the castle and its suburb The studies collected here pay tribute to their author's enduring contribution to the medieval archaeology of the Near East The first part of the book deals with the Pilgrim's Castle the great Templar fortress and town at Atlit The significance of Johns excavations at this site has been relatively neglected because it remains in a military area inaccessible to visitors and because almost the entire stock of his major publication was lost in 1947 This Guide to Atlit a synthesis of historical archaeological and architectural research on the

monument is reprinted here together with all the interim reports relating to the medieval period Also included are Johns studies on the Citadel of Jerusalem the Tower of David and on the Islamic castle of Ajlun Together they represent a fundamental contribution to the study of the period of the Crusades and to the military architecture of the Middle Ages The notes by Denys Pringle bring the accounts up to date in the light of recent research

Artillery in the Era of the Crusades Michael S. Fulton, 2018-08-13 Artillery in the Era of the Crusades provides a detailed examination of the use of mechanical artillery in the Levant through the twelfth and thirteenth centuries Rather than focus on a selection of sensational anecdotes Michael S Fulton explores the full scope of the available literary and archaeological evidence reinterpreting the development of trebuchet technology and the ways in which it was used during this period Among the arguments put forward Fulton challenges the popular perception that the invention of the counterweight trebuchet was responsible for the dramatic transformation in the design of fortifications around the start of the thirteenth century See inside the book

The Chronicle of Ibn al-Athir for the Crusading Period from al-Kamil fi'l-Ta'rikh. Part 3 D.S. Siege Warfare During the Crusades Michael S. Fulton, 2020-02-19 An extensive study of the strategy and technology employed by the Franks and Muslims as they fought each other in the Holy Land Sieges played a key role in the crusades but they tend to be overshadowed by the famous battles fought between the Franks and the Muslims and no detailed study of the subject has been published in recent times So Michael Fulton s graphic wide ranging and thought provoking book is a landmark in the field Fulton examines the history of siege warfare in the Holy Land from every angle the tactics and technology the fortifications the composition of the opposing armies and the ways in which sieges shaped Frankish and Muslim strategy at each stage of the conflict The differences and similarities between the Eastern and Western traditions are explored as is the impact of the shifting balance of power in the region The conclusions may surprise some readers Neither the Muslims nor the Franks possessed a marked advantage in siege technology or tactics their fortifications reflected different purposes and an evolving political environment and although there were improvements in

technologies and fortifications the essence of siege warfare remained relatively consistent Essential reading for medieval and military historians A lavishly illustrated text full of original photographs of sites many of which are inaccessible and hard to find images of guides the reader through the strategies tactics and weaponry of offense and defense in the Latin East The Society for Medieval Archaeology This is a book you will read once and continually return to not only as an invaluable reference but as a cracking good read Michael McCarthy battlefield guide *Remembering the Crusades* Nicholas Paul, Suzanne Yeager, 2012-04-02 Its unprecedented multidisciplinary and cross cultural approach points the way to a complete reevaluation of the place of the crusades in medieval and modern societies Egypt and Syria in the Fatimid, Ayyubid and Mamluk Eras IV Urbain Vermeulen, J. van Steenbergen, 2005 Each volume deals with a wide variety of scholarly subjects all revolving around the central theme of Syro Egypt s high and late medieval history Topics dealt with include archaeology architecture codicology economic political and religious history as well as belles lettres
