Engineering Tools for Environmental Risk Management Katalin Gruiz, Tamás Meggyes, Éva Fenyvesi, 2019-01-08 The four volumes of the book series Engineering Tools for Environmental Risk Management deal with environmental management assessment monitoring tools environmental toxicology and risk reduction technologies This last volume focuses on engineering solutions usually needed for industrial contaminated sites where nature s self remediation is inefficient or too slow The success of remediation depends on the selection of an increasing number of conventional and innovative methods This volume classifies the remedial technologies and describes the reactor approach to understand and manage in situ technologies similarly to reactor based technologies Technology types include physicochemical biological or ecological solutions where near natural sustainable remediation has priority A special chapter is devoted to natural attenuation where natural changes can help achieve clean up objectives Natural attenuation and biological and ecological remediation establish a serial range of technologies from monitoring only to fully controlled interventions using just the natural ecosystem or sophisticated artificial living systems Passive artificial ecosystems and biodegradation based remediation in addition to natural attenuation demonstrate the use of these green technologies and how engineering intervention should be kept at a minimum to limit damage to the environment and create a harmonious ecosystem

Remediation of sites contaminated with organic substances is analyzed in detail including biological and physicochemical methods Comprehensive management of pollution by inorganic contaminants from the mining industry leaching and bioleaching and acid mine drainage is studied in general and specifically in the case of an abandoned mine in Hungary where the innovative technology of combined chemical and phytostabilization has been applied The series of technologies is completed by electrochemical remediation and nanotechnologies Monitoring verification and sustainability analysis of remediation provide a comprehensive overview of the management aspect of environmental risk reduction by remediation This book series focuses on the state of knowledge about the environment and its conscious and structured application in environmental engineering management and decision making *New Publications of the U.S. Geological Survey*, 2000

Sprayed Concrete Lined Tunnels Alun Thomas, 2008-10-08 Practising engineers on site in the design office or in client organizations will find this book an excellent introduction to the design and construction of sprayed concrete lined SCL tunnels The complex behaviour of the early age behaviour of the sprayed concrete requires careful management This book covers all aspects of SCL tunnelling from the constituents of sprayed concrete to detailed design and management during construction Although there is a close interdependence between all the facets of sprayed concrete few engineers have the right breadth of experience and expertise and this urgently needs to be transferred to the wider engineering community Disseminating essential information for tunnelling engineers Sprayed Concrete Lined Tunnels is key reading for all involved in or studying the process *Chemical Exposure Predictions* Davide Calamari, 1992-12-15 Chemical Exposure Predictions discusses the challenges of analyzing biological and geological cycles of various chemical substances and evaluating their potential exposure from the cradle to the grave The book examines physico chemical properties the possibilities for predicting degradation and partition coefficients and kinetics of distribution phenomena It also covers how to validate predictions and presents examples of hazard assessment Chemical Exposure Predictions will be an indispensable reference for environmental chemists environmental toxicologists ecotoxicologists occupational health specialists regulatory personnel and environmental consultants
