Seduction Of Place The History And Future Of Cities:

The Seduction of Place Joseph Rykwert, 2013-11-06 No other place on earth is as full both of promise and of dread as the city it is at once alienating and exciting These concentrations of people have not however come about as the result of vast immutable impersonal forces but because of human choices The worsening or betterment of urban life will also be the result of choices Our choices That cities display and represent the personal desires of their inhabitants is central to Joseph Rykwert's argument in *The Seduction of Place* Insisting that they are the physical constructs of communities he travels through history to trace their roots in ancient times and outlines current attempts and future possibilities to improve the metropolis Rykwert includes a broad range of urban landscapes 18th and 19th century Paris and London the current sprawl of Mexico City and Cairo planned cities like Brasilia and finally New York the world capital Always opinionated and often controversial Rykwert assesses how and why urban projects from the past succeeded or failed and what lessons can be drawn from them for the future Ultimately *The Seduction of Place* is a deeply felt and powerfully reasoned call for a commitment by every citizen to the creation of a more humane place to live

The Seduction of Place Joseph Rykwert, 2000 Lonely and emotionally impaired everyman Jimmy Corrigan is given the opportunity to meet the father he never had This is the spark for an improvisatory romance which gingerly ignores all sense of plot and drama The reader is transported between 1890's Chicago and 1980's small town Michigan helped along by thousands of coloured illustrations and diagrams which provide a startling illusion of life and movement The bulk of the book is supported by fold out instructions an index paper cut outs and brief notes

Urban Monstrosities Joseph Lamperez, Ali McGhee, 2018-07-27 Sign of sublime excess and transgression guardian of the threshold and uncanny creature par excellence the monster of late has also become a mainstay of urban narratives even while its presence in these texts remains untheorized The authors in this collection show how artists and writers across the past two hundred years from William

Wordsworth to China Mi ville figure the monster as a barometer of changing urban patterns Here monstrosity becomes the herald of embryonic social forms and marginalized populations in portrayals of cities across media from video games film and avant garde sonic experiments to written tales of urban fantasy and gothic ruin This volume suggests that poetic and municipal structures evolve in tandem Within its chapters unearthly buildings and beings signal a host of new urban dispensations

Bodies in the Streets: The Somaesthetics of City Life ,2019-08-12 Cities are defined by their complex network of busy streets and the multitudes of people that animate them through physical presence and bodily actions that often differ dramatically elegant window shoppers and homeless beggars protesting crowds and patrolling police As bodies shape city life so the city s spaces structures economies politics rhythms and atmospheres reciprocally shape the urban soma This collection of original essays explores the somaesthetic qualities and challenges of city life in Europe Asia Africa and the Americas from a variety of perspectives ranging from philosophy urban theory political theory and gender studies to visual art criminology and the interdisciplinary field of somaesthetics Together these essays illustrate the aesthetic cultural and political roles and trials of bodies in the city streets

Urbanism Without Effort Charles R. Wolfe,2019-01-31 How do you create inviting and authentic urban environments where people feel at home Countless community engagement workshops studies by consulting firms and downtown revitalization campaigns have attempted to answer this age old question In Urbanism Without Effort Chuck Wolfe argues that unplanned places can often teach us more about great placemaking than planned ones From impromptu movie nights in a Seattle alley to the adapted reuse of Diocletian s Palace in Split Croatia Wolfe searches for the first principles of what makes humans feel happy and safe amid the hustle and bustle of urban life He highlights the common elements of cities around the world that spontaneously bring people together being inherently walkable factors that contribute to safety at night the importance of intersections and corners and more In this age of skyrocketing metropolitan growth he argues looking to the past might be our best approach to creating the urban future we dream about A whirlwind global tour Urbanism Without Effort offers readers inspiration historical context and a better understanding of how an inviting urban environment is created

The Smartification of Everything Masha Gugganig,Kelly Bronson,Vincent Mirza,2025-10-14 From the smart phone to the smart home smartness has become an almost inescapable reality of everyday life Supposedly intelligent interconnected technologies smart systems have taken on their own forms of life and it is no longer easy to determine who these systems benefit and what their long term social and ethical implications may be In twenty contributions spanning the social sciences humanities and the arts The Smartification of Everything offers a deep dive into a variety of studies that critically interrogate smartification processes and systems The book is edited by experts in science and technology studies STS anthropology and sociology and is written by academics and artists working across a diverse range of disciplines including geography architecture and urban studies among others The volume moves beyond the digital hype cycle around smart cities artificial intelligence or the Internet of Things which presents smart tech as

neat spaces of continuous improvement Instead the authors illustrate how smartness is partial messy and contested while also situated in specific sociocultural historical spatial and political realities The Smartification of Everything questions the potential and the limitations of smart systems and in doing so furthers our understanding of the complex dynamics today among technology environment and power

Bulwarks of Unbelief Joseph Minich,2023-04-12 How modernity creates atheists and what the church must do about it Millions of people in the West identify as atheists Christians often respond to this reality with proofs of God s existence as though rational arguments for atheism were the root cause of unbelief In **Bulwarks of Unbelief** Joseph Minich argues that a felt absence of God as experienced by the modern individual offers a better explanation for the rise in atheism Recent technological and cultural shifts in the modern West have produced a perceived challenge to God s existence As modern technoculture reshapes our awareness of reality and belief in the invisible it in turn amplifies God s apparent silence In this new context atheism is a natural result And absent of meaning from without we have turned within Christians cannot escape this aspect of modern life Minich argues that we must consciously and actively return to reality If we reattune ourselves to God s story reintegrate the whole person and reinhabit the world faith can thrive in this age of unbelief

All Roads Lead to the American City Peter Swirski,2007-04-01 All Roads Lead to the American City provides an original view of the urban culture in America seen through its irrevocable ties with the cities and roads Examining the history cinema literature cultural myths and social geography of the United States the book puts some of the greatest as well as the baddest American cities under the microscope Taking the role of the roads that crisscross and connect the cities as their shared point of reference these essays explore ways to understand the people who live commute work create govern commit crime and conduct business in them Cities for the most part are America Their values and problems define not only what the United States is but what other nations perceive the United States to be Roads and transportation on the other hand and their impact on the American culture and lifestyle form not only the integral part of the historical rise and shine of the modern city but a physical release from and a cultural antidote to its pressure cooker stresses Tracing the boundless variety and complexity of these twin themes All Roads Lead to the American City is built around an interlinked series of essays on the urban culture in America Juxtaposing the city and the road it looks alternatively at cities as historical geographical social and cultural centres of life in the land and at roads as physical as well as metaphorical arteries that lead in and out of the city

Nusantara Robert Templer,2025-01-07 INDONESIA BUILDS A NEW CAPITAL Indonesia has a new capital city deep in the lush forests of Borneo Nusantara will soon replace Jakarta a city built by the Dutch in the 17th century that has grown into one of the largest metropolises in the world with a population of over 30 million people The new capital could not be more different it is planned as a forest city with 75 per cent of the land set aside to provide access for wildlife buildings will be connected by walkways to encourage pedestrians and there is a commitment to green energy and transport from the start Nusantara s architects and planners all of them Indonesian have set out a dream of a global city to

be built over the next two decades growing to house a population of four million President Joko Widodo has even announced plans to bid for the 2036 Olympics there The ambition is a city that represents the diversity of Indonesia and balances economic development across the archipelago which for decades has been concentrated on Java That island is less than a tenth of the area of Indonesia but is home to 60 per cent of the population and the same share of the economy This has come at a high cost Jakarta is sinking more rapidly than any other city on the planet and suffers from regular floods The city was until recently the largest without a metro system now it has just one line connecting 13 stations The vast sprawl of concrete and motorways is covered most days in a thick haze it is regularly ranked as the world s most polluted city But Indonesia the country is taking a 40 billion gamble on whether moving the capital will help alleviate the problems of Jakarta and provide other benefits such as balancing economic development The site chosen for Nusantara is near the coast of Borneo close to the provincial capital of East Kalimantan and in an area with rapid economic growth due to energy and mineral extraction Purpose built capitals have a poor record of achieving their ambitions they often end up as soulless monuments to oppressive regimes They are also both a symptom and a driver of bad government by leaders who become isolated from their people Will the remoteness of Nusantara cut Indonesians off from the leaders at a time when their quality of democracy is in decline As the world s largest Muslim country and the third largest democracy it is a question that matters beyond its shores Nusantara could become a model for Indonesia and the region a carbon neutral city built not as a monument to a dictator but as a capital that respects the environment and promotes new ways of urban living for the 21st century Or if it lacks support from successive government and fails to attract the necessary investment it may become one of the many sad and empty capitals that dot the world another utopian vision fallen flat

Psychoanalysis and Ecology Cosimo Schinaia, 2022-03-31 Cosimo Schinaia and *Psychoanalysis and Ecology* are winners of the IPA Climate Award This book presents the psychoanalyst with the question of how our enormously modified environmental conditions determine our subjective mental changes and vice versa The gravity of the environmental crisis is amply clear and yet in the face of such incontrovertible evidence there is an emotional more than cognitive difficulty in comprehending the present reality and its future consequences In understanding the collective imagination as permeating the individual one and vice versa this book investigates this relationship of mutual co determination between the individual traumatic stories told and experienced in the consulting room and the positive or negative environmental attitudes exhibited by patients The pairing of clinical vignettes with dispatches from the collective imagination sheds light on the confused affective investments and anxieties that propel pathological defenses such as negation suppression intellectualization displacement and disavowal The final chapter concludes with notes on the role of hope in a damaged world and the importance of integrity within the psychoanalytic field and beyond This book will be of great interest to psychoanalysts psychotherapists and psychiatrists as well as anthropologists environmentalists and ecologists

The Art of the City Raffaele Milani, 2017-12-12 In *The Art of the City* Raffaele Milani reflects on the ways in

which inhabitants of the cityscape have interacted on a spiritual psychological and philosophical level with the architecture that surrounds them Working with the premise that the city has a soul which is externalized in the physical structures of its urban space Milani expresses alarm in the face of sprawling megacities that typify the postmodern age and endanger the survival of cities distinctiveness While he laments that the nature surrounding cities is disappearing under concrete his concern is counterbalanced by the realization that there are ongoing projects of urban reclamation renewal and reutilization aimed at preserving an ancient almost mystical rapport between the citizen and the lived space Milani illustrates his argument by citing the works of modern architects including Emilio Ambasz Massimiliano Fuksas Frank Gehry Rem Koolhaas Kisho Kurokawa Daniel Libeskind and Renzo Piano Rather than a history of architecture *The Art of the City* is a compelling and timely reflection on the important challenge of insuring the continued liveability and aesthetic valorization of public spaces

Knowledge And Civilization Barry Allen, 2018-02-15 Offers a new original way of framing questions about knowledge Knowledge and Civilization advances detailed criticism of philosophy's usual approach to knowledge and describes a redirection away from textbook problems of epistemology toward an ecological philosophy of technology and civilization Rejecting theories that confine knowledge to language or discourse Allen situates knowledge in the greater field of artifacts technical performance and human evolution His wide ranging considerations draw on ideas from evolutionary biology archaeology anthropology and the history of cities art and technology

Shattered Pictures of Places and Cities in George Santayana's Autobiography Graziella Fantini, 2011-11-28 Shattered Pictures of Places and Cities se adentra por las páginas autobiográficas filosóficas y narrativas más relevantes de George Santayana discurrendo por sus viajes y geografías físicas en paralelo a sus viajes y geografías morales Es un intento de ir más allá de la reflexión entorno a los orgenes biográficos del filosofar de ahí que se recupere una indagación sobre su habitar el lenguaje y el arte Santayana reconsidera los fundamentos del arte de la memoria clásica en su autobiografía para formular una nueva propuesta estética donde el arte y la vida se funden y se confunden estimulándose recíprocamente Hila una filosofía del viaje y del lugar donde se privilegia una noción del habitar que ilumina nuestra condición de humanas en la vida y en el pensamiento y nuestra trágica estable inestabilidad en este mundo

Cultural Landscapes of Post-Socialist Cities Mariusz Czepczynski, 2016-04-22 The cultural landscapes of Central European cities reflect over half a century of socialism and are marked by the Marxists vision of a utopian landscape Architecture urban planning and the visual arts were considered to be powerful means of expressing the people's power However since the velvet revolutions of 1989 this urban scenery has been radically transformed by new forces and trends infused by the free market democracy and liberalization This has led to landscape cleansing and recycling as these former communist nations used new architectural functional and social forms to transform their urbanscapes their meanings and uses Comparing case studies from different post socialist cities this book examines the culturally conditional variations between local powers and structures despite the similarities in the general processes and systems It considers the

contemporary cultural landscapes of these post socialist cities as a dynamic fusion of the old communist forms and new free market meanings features and democratic practices of global influences and local icons The book assesses whether these urbanscapes clearly reflect the social cultural and political conditions and aspirations of these transitional countries and so a critical analysis of them provides important insights
