Seismic Hazard and Building Vulnerability in Post-Soviet Central Asian Republics S.A. King, Vitaly I.

Khalturin, B.E. Tucker, 2013-06-29 This is the best compilation of current seismic and engineering data on the seismic hazard of the capitals of the Central Asian republics available in the English language. It comes to the conclusion that the risk to residents of these cities is extremely high. **Earthquake Hazard and Seismic Risk Reduction** Serguei

Balassanian, Armando Cisternas, Mikael Melkumyan, 2013-06-29 In 1998 Armenia was commemorating the tenth anniversary of the catastrophic Spitak earthquake. The Second International Conference on Earthquake Hazard and Seismic Risk Reduction sponsored by the Government of the Republic of Armenia and United Nations International Decade for Natural Disaster Reduction UN IDNDR was held in dedication to that event between 14-21 September, later referred to as Yerevan Conference. The Yerevan Conference has been organized by the National Survey for Seismic Protection NSSP of the Republic of Armenia. All level's decision makers from the ministers to the local authorities, politicians, scientists, leaders of the executive and legislative powers, psychologists, leading businessmen, representatives from the private sector and the media as well as from the International Organizations have been invited by the Armenian NSSP to take part in joint discussion of the Seismic Risk Reduction Problem for the first time in the history of such forums. Armenian NSSP's such initiative has been triggered by the experience of the Spitak earthquake and other disasters. They showed that it will be possible to reduce the risks posed by the natural disaster only through the common efforts of all the community in co-operation with the International institutions.
