Eastern Europe Since 1970 Bulent Gokay, 2015-12-22 From the hardening grip of Soviet domination under Brezhnev to the collapse of communism and its aftermath Bulent Gokay provides the essential introduction to Eastern Europe in the last quarter of the twentieth century The Soviet invasion of Czechoslovakia in 1968 spelt the end of reformist communism and the tightening of Soviet control throughout Eastern Europe In spite of this several countries within the Soviet Bloc managed to retain varying degrees of independence over the next two decades Focusing on the struggle towards economic and social modernisation in the region and the competing influences of East and West in a dangerous Cold War Bulent Gokay shows how individual circumstances and diverse national characteristics made a uniform application of the Soviet model impossible and charts the growing resistance to domination and the momentous events which finally toppled Soviet power in the region

First published in 1948 as *World Economic Report*, WESS is the oldest continuous post World War II publication recording and analysing the performance of the global economy and social development trends. It offers relevant policy recommendations and highlights how well the United Nations' UN annual report has tracked global economic and social conditions and how its analyses influenced and were influenced by the prevailing development discourse during the past seven decades. It also critically reflects on its policy recommendations and their influence on actual policy making and the shaping of the world economy. *The World Economy through the Lens of the United Nations* reflects on this report amongst others to provide valuable insights on global economic challenges and their differential impacts on different groups of countries requiring global policy coordination as well as context specific policy responses. It demonstrates that UN reports have often been ahead of the curve and played a critical role in policy debate especially in the area of international policy coordination and coherence for balanced global development and offers rich and path breaking analyses of contemporary problems of growth, development, trade and stabilization. Investment Decisions in the Nationalised Fuel Industries Robin Bates, Neil Fraser, 1974 Monograph on public investment planning and decision making in the gas and electric power public enterprises in the UK. Studies applications of investment criteria and covers choice of a discount rate, separation of investment and pricing decisions etc. Bibliography pp 177 to 188. Markets William A. Jackson, 2019-04-18 Defining markets has never been an easy task. Despite their importance for economic theory and practice, they are hard to pin down as

a concept and economists have tended to adopt simplified axiomatic models or rely on piecemeal case studies This book argues that an extended range of theory social as well as economic can provide a better foundation for the portrayal of markets The book first looks at the definition of markets their inadequate treatment in orthodox economic theory and their historical background in the pre capitalist and capitalist eras It then assesses various alternatives to orthodox theory categorised as social cultural structural functional and ethical approaches Among the alternatives considered are institutionalist accounts Marxian views network models performativity arguments field theories Austrian views and ethical notions of fair trade A key finding of the book is that these diverse approaches valuable as they are could present a more effective challenge to orthodoxy if they were less disparate Possibilities are investigated for a more unified theoretical alternative to orthodoxy Unlike most studies of markets this book adopts a fully interdisciplinary viewpoint expressed in accessible non technical language Ideas are brought together from heterodox economics social theory critical realism as well as other social sciences such as sociology anthropology and geography Anybody seeking a broad critical survey of the theoretical analysis of markets will find this book useful and it will be of great interest to economists social scientists students and policy makers
