Where the Waters Divide Michael Mascarenhas, 2012-07-13 This timely and important scholarship advances an empirical understanding of Canada s contemporary Indian problem *Where the Waters Divide* is one of the few book monographs that analyze how contemporary neoliberal reforms in the manner of de regulation austerity measures common sense policies privatization etc are woven through and shape contemporary racial inequality in Canadian society Using recent controversies in drinking water contamination and solid waste and sewage pollution *Where the Waters Divide* illustrates in concrete ways how cherished notions of liberalism and common sense reform neoliberalism also constitute a particular form of racial oppression and white privilege *Where the Waters Divide* brings together theories

and concepts from four disciplines sociology geography Aboriginal studies and environmental studies to build critical insights into the race relational aspects of neoliberal reform In particular the book argues that neoliberalism represents a key moment in time for the racial formation in Canada one that functions not through overt forms of state sanctioned racism as in the past but via the morality of the marketplace and the primacy of individual solutions to modern environmental and social problems Furthermore Mascarenhas argues because most Canadians are not aware of this pattern of laissez faire racism and because racism continues to be associated with intentional and hostile acts Canadians can dissociate themselves from this form of economic racism all the while ignoring their investment in white privilege Where the Waters Divide stands at a provocative crossroads Disciplinarily it is where the social construction of water an emerging theme within Cultural Studies and Environmental Sociology meets the social construction of expertise one of the most contentious areas within the social sciences It is also where the political economy of natural resources an emerging theme in Development and Globalization Studies meets the Politics of Race Relations an often understudied area within Environmental Studies Conceptually the book stands where the racial formation associated with natural resources reform is made and re made and where the dominant form of white privilege is contrasted with anti neoliberal social movements in Canada and across the globe OECD Environmental Performance Reviews: Australia 2007 OECD,2008-03-19 OECD s periodical review of Australia s environmental policies and programmes This edition reviews progress since the last review in 1998 and in relation to the 2001 OECD Environmental Strategy The AALS Directory of Law Teachers ,2003 *Planning Law and Practice in Northern Ireland* Stephen McKay,Michael Murray,2017-02-03 Each of the jurisdictions within the UK and Ireland is refining the operational characteristics of its planning system and while there are some common practices it is also the case that there are substantive divergences In each territory the planning template is fundamentally shaped within a dynamic legal context and thus students and practitioners of planning need accessible informative and up to date literature dealing with this matter *Planning Law and Practice in Northern Ireland* provides an interpretive narrative of the statutes case law and planning procedures that have shaped its planning system with due regard being given to the combined influences emanating from European Union UK and Northern Ireland planning governance The contributions in this book explore the evolution of planning in Northern Ireland and discuss key facets of development management enforcement environmental law equality property law and professional ethics This book makes an important contribution to the wider literature in this field and provides an essential reference to students planning practitioners and researchers **Environmental Law in Serbia** Vid Vukasović,Dragoljub Todić,2017-06-20 Derived from the renowned multi volume International Encyclopaedia of Laws this book provides ready access to legislation and practice concerning the environment in Serbia A general introduction covers geographic considerations political social and cultural aspects of environmental study the sources and principles of environmental law environmental legislation and the role of public authorities The main body of the book deals first with laws

aimed directly at protecting the environment from pollution in specific areas such as air water waste soil noise and radiation Then a section on nature and conservation management covers protection of natural and cultural resources such as monuments landscapes parks and reserves wildlife agriculture forests fish subsoil and minerals Further treatment includes the application of zoning and land use planning rules on liability and administrative and judicial remedies to environmental issues There is also an analysis of the impact of international and regional legislation and treaties on environmental regulation Its succinct yet scholarly nature as well as the practical quality of the information it provides make this book a valuable resource for environmental lawyers handling cases affecting Serbia Academics and researchers as well as business investors and the various international organizations in the field will welcome this very useful guide and will appreciate its value in the study of comparative environmental law and policy Federal Register ,2003 *Sustainable Development Critical Issues* OECD,2001-07-11 How can we meet the needs of today without diminishing the capacity of future generations to meet theirs This is the central question posed by sustainable development OECD countries committed themselves to sustainable development at the 1992 UN
