Longitude Uk Edition True Story Of A Lone Gen:

Scientifica Historica Brian Clegg, 2019-10-01 *Scientifica Historica* is an illustrated essay based review of those books that marked the development of science from ancient civilizations to the new millennium. The book is divided into five eras and explores the leading scientific pioneers, discoveries and books within them. Ancient World looks at the beginnings of language plus the first ever scientific documents produced and translated. Renaissance in Print explores the effects of the invention of the printing press and the exploration of the seas and skies. Modern Classical surveys the nineteenth century and the development of science as a profession. Post Classical dissects the twentieth century and the introduction of relativity, quantum theory and genetics. The Next Generation reviews the period from 1980 to the modern day showing how science has become accessible to the general public. Plus an introduction to the history and development of writing and books in general and a list of the 150 greatest science books published. From carvings and scrolls to glossy bound tomes, this book beautifully illustrates the evolution of scientific communication to the world. By recounting the history of science via its key works, those books written by the keenest minds our world has known, this book reflects the physical results of brilliant thought manifested in titles that literally changed the course of knowledge. Advanced General Studies for OCR John Hancock, Trevor Green, Pat Turton, 2001. This text follows the OCR specification but is also suitable for students of other exam boards. It contains a wide range of tasks which should help students develop and use critical and analytical skills.

Fundamentals of Cartography (Second Revised and Enlarged Edition) R.P. Misra, 2014-01-01. The first edition of *Fundamentals of Cartography* was published in 1969 by Prasara University of Mysore. It was reprinted by the Concept Publishing Company, New Delhi. While the book remained in currency, the cartographic processes changed drastically when information technology brought a sea of change in the sources of information, drafting of maps and printing processes. Drawing maps by hand became obsolete; surveying, whether ground or aerial, was no longer the only major source of information. In view of these changes, it became necessary to bring out a new edition. Realising that unless one knows directions, scales, projections, coordinates, ground and air surveys, one would fail to understand the proper use of modern information technology in the drawing of maps. Thus, the contents of the 1969 edition are retained and new chapters have been added to update the book. In Part II of the book, a chapter on Remote Sensing and Satellite Imagery has been added, and Part V contains chapters on Computer Aided Cartography, Geographic Information System, GIS, Land Information System, LIS, and Global Positioning System, GPS. *Tracks on the Ocean* Sara Caputo, 2024-08-29. Longlisted for the 2025 BSHS Hughes Prize. Enthralling Philip Ball. Ingenious Sujit Sivasundaram. In *Tracks on the Ocean*, Sara Caputo tells how our journeys around the globe became fixed lines on maps and how journey lines themselves reshaped maps and the way that we view the world. From Captain Cook's route across the South Seas to the disorientating power of digital technology, the tracks we've left on the oceans, trading, exploring and conquering, are a hidden record of humanity's impact on the planet. Revealing their histories

Caputo uncovers a fascinating new history of maritime travel and modernity Weaving human history cartography literature and climate science Tracks on the Ocean reveals how on the path to discovery we have changed the world **Romantic**

Cartographies Sally Bushell, Julia S. Carlson, Damian Walford Davies, 2020-12-10 Romantic Cartographies is the first collection to explore the reach and significance of cartographic practice in Romantic period culture Revealing the diverse ways in which the period sought to map and spatialise itself the volume also considers the engagement of our own digital cultures with Romanticism's map mindedness Original exploratory essays engage with a wide range of cartographic projects objects and experiences in Britain and globally Subjects range from Wordsworth Clare and Walter Scott to Romantic board games and geographical primers to reveal the pervasiveness of the cartographic imagination in private and public spheres Bringing together literary analysis creative practice geography cartography history politics and contemporary technologies just as the cartographic enterprise did in the Romantic period itself Romantic Cartographies enriches our understanding of what it means to map literature and culture

Hurricane of Independence Tony Williams, 2009-07-01 The sleeper history hit of 2008 released in paperback to coincide with the heart of hurricane season On September 2 1775 the eighth deadliest Atlantic hurricane of all time landed on American shores Over the next days it would race up the East Coast striking all of the important colonial capitols and killing more than four thousand people In an era when hurricanes were viewed as omens from God what this storm signified to the colonists about the justness of their cause would yield unexpected results Drawing on ordinary individuals and well known founders like Washington and Franklin Tony Williams paints a stunning picture of life at the dawn of the American Revolution and of the weighty choice people faced at that deciding moment Hurricane of Independence brings to life an incredible time when the forces of nature and the forces of history joined together to produce courageous stories of sacrifice strength and survival

Beyond the Line Georg Berkemer, Derek L. Elliot, Ute Fendler, Margret Frenz, Michael Mann, Ineke Phaf-Rheinberger, Sebastian R. Prange, Ana Sobral, Frank Schulze-Engler, 2014-04-23 The title of Beyond the Line refers to the imaginary Line drawn between North and South a division established by the Peace Treaty of Cateau Cambr sis in 1559 This is an early modern time and Eurocentric construction according to which the southern oceanic world has long been taken as symbol of expansionist philosophies and practices An obvious motivation for changing this Line division is the growing influence of the Global South in the contemporary economic and political setting However another motivation for changing opinions in regard to the Line is equally important We observe an emergent consciousness of the pivotal role of the oceanic world for human life This requires the reformulation of former views and raises numerous questions A diversity of connections comes to the mind which demands the composition of a catalogue of case studies with an oceanic horizon Through this operation different problems are being linked together Which problems encounter historians with their research on fishes in the archives How to trace records about pirates of non European descent in the Indian Ocean Which role play the Oceans as mediators for labor

migrations not only of the Black Atlantic but also of people moving from Asia to Africa and vice versa What do we know about workers on the oceans and their routes When considering oceans as contact zones with which criteria can their influence in different literary texts be analyzed Is it possible to study nationalisms taking into account these transoceanic relationships And how do artists address these questions in their use of the media Against the background of this catalogue of oceanic questions old stories are told anew Sometimes their cultural stereotypes are recycled to criticize political and social situations Or in other cases they are adopted for elaborating alternative options In this sense the contributions concentrate on countries like India Kenya Angola or Brazil and cover different academic fields A variety of objects and situations are explored which have been and still are determinant for the construction of cultural narratives in view of the modified relationship with the geographically southern oceanic regions

Organizational Change and Temporality Patrick Dawson, Christopher Sykes, 2016-04-28

Organizational Change and Temporality Bending the Arrow of Time looks to address the important area of time and temporality especially as it relates to frameworks and studies for explaining change processes in organizations It commences with a selective history on the science and philosophy of time before examining the place of time in work and employment and the presence and

absence of theorized time in explanations of organizational change The intention is to bring to the fore concepts and debates that have largely remained hidden furthering our knowledge and understanding of time and temporality in changing organizations The authors provide a more informed theoretical explanation of the temporal dimensions of organizational change They examine the concepts and debates behind change theories philosophical positions and scientific concerns on time and material existence drawing connections that have previously remained unexplored This book is key reading for researchers within the organizational change world and will further the academic debate of time and temporality in organizations studies
