Husserl, Heidegger and the Crisis of Philosophical Responsibility R.P. Buckley,2012-12-06 The guiding dictum of phenomenology is to the things themselves This saying conveys a sense that the things the phenomena with which we are confronted and into which we seek some insight are not as immediately accessible as may be imagined Phenomena however are often hidden not by their distance from us but by their very proximity by the fact that they are taken for granted as being

self evident and understood by all Even the most common everyday phenomena and the words used to describe them often reveal upon closer inspection a degree of complexity which had previously been unsuspected Upon interrogation that which had been taken to be self evident and widely understood shows itself otherwise assumed self evidence frequently masks unintelligibility and common understanding can be a sign of a lack of understanding One phenomenon which is extremely proximate in our times is the phenomenon of crisis To be sure one can hardly avoid the word these it abound in periodicals and newspapers but also in days Not only does the learned journals of medicine political science economics art and law barely does an edition appear without the discussion of a crisis of one sort or another within these respective fields One is tempted to remark along with Umberto Eco that crisis sells well l One is also inclined to be suspicious of the collective malaise of academics

Tome VI: Kierkegaard Secondary Literature Jon Stewart,2017-02-24 In recent years interest in the thought of Kierkegaard has grown dramatically and with it the body of secondary literature has expanded so quickly that it has become impossible for even the most conscientious scholar to keep pace The problem of the explosion of secondary literature is made more acute by the fact that much of what is written about Kierkegaard appears in languages that most Kierkegaard scholars do not know Kierkegaard has become a global phenomenon and new research traditions have emerged in different languages countries and regions The present volume is dedicated to trying to help to resolve these two problems in Kierkegaard studies Its purpose is first to provide book reviews of some of the leading monographic studies in the Kierkegaard secondary literature so as to assist the community of scholars to become familiar with the works that they have not read for themselves The aim is thus to offer students and scholars of Kierkegaard a comprehensive survey of works that have played a more or less significant role in the research Second the present volume also tries to make accessible many works in the Kierkegaard secondary literature that are written in different languages and thus to give a glimpse into various and lesser known research traditions The six tomes of the present volume present reviews of works written in Catalan Chinese Czech Danish Dutch English Finnish French Galician German Greek Hebrew Hungarian Italian Japanese Norwegian Polish Portuguese Romanian Russian Slovak Spanish and Swedish

conflict and crisis management Abstract *Rationing Medical Care on the Basis of Age* Eric Matthews, Elizabeth Russell, 2018-10-08 *Rationing Medical Care on the Basis of Age* explores this highly topical issue and presents a critical argument on the nature of the possible crisis. Its in-depth philosophical analysis of the main ethical positions adopts an interdisciplinary and international approach. This book is important reading for healthcare policy makers and shapers and healthcare managers. Academics in ethics, philosophy, economics, and all healthcare disciplines will find it useful, as will public health specialists, health economists, and social scientists with an interest in health and medicine. The authors of this book have opened up significant new perspectives on many important issues which in practice confront politicians, managers, professionals, patients, and the public today. They have done this moreover in a way that is highly accessible to a non-specialist readership.

Russian and Soviet Views of Modern Western Art, 1890s to Mid-1930s Ilia Dorontchenkov, 2009-06-10 From the first Modernist exhibitions in the late 1890s to the Soviet rupture with the West in the mid-1930s, Russian artists and writers came into wide contact with modern European art and ideas. Introducing a wealth of little-known material set in an illuminating interpretive context, this sourcebook presents Russian and Soviet views of Western art during this critical period of cultural transformation. The writings document complex responses to these works and ideas before the Russians lost contact with them almost entirely. Many of these writings have been unavailable to foreign readers and until recently were not widely known even to Russian scholars. Both an important reference and a valuable resource for classrooms, the book includes an introductory essay and shorter introductions to the individual sections.

Language, Meaning, Interpretation Guttorm Fløistad, 2005-12-07 Philosophy of logic and language and of meaning and communication are central to this volume. The discussion of these issues involves analytical approaches including semantics and semiotics, philosophy of science, mathematical logic, phenomenology, hermeneutics, and some aspects of philosophical anthropology and aesthetics. Philosophy of the Absolute also belongs to this broad repertoire of philosophical problems and disciplines. A number of problems and viewpoints derive from the metaphysical system; any relativistic view on ethical values, for instance, makes sense in relation to some absolute. Metaphysical system building may have come to an end, but after all it belongs to philosophy to remind us of our past.
