Major Topics In Pediatric And Adolescent Oncology:

Major Topics in Pediatric and Adolescent Oncology Cameron K. Tebbi, 1982 **Major Topics in Adolescent Oncology** Cameron K. Tebbi, 1987 **Cancer in Adolescents and Young Adults** Archie Bleyer, Ronald Barr, Lynn Ries, Jeremy Whelan, Andrea Ferrari, 2016-11-17 This is the second edition of the only book to be devoted exclusively to the total cancer picture in adolescents and young adults AYA now expanded from the age range 15-29 to that of 15-39 years For each of the diverse spectrum of cancers encountered in the AYA group the epidemiology natural progression diagnostic approaches and treatment options are described with special emphasis on strategies for early detection and prevention Comparison is made with management of both younger and older patients and model programs are presented that address common diagnostic staging treatment and psychosocial shortcomings in the AYA group Detailed attention is also paid to principles and practices of care with consideration of psychosocial and quality of life issues social support systems rehabilitation late effects insurance and economic aspects of health care among other topics The authors make compelling arguments for integrated strategies that allow young adults to benefit from the combined expertise of pediatric and adult oncologists in systems that identify both the complex disease and the social issues specific to this population The proposed models of care include relationships with other specialties that do not specifically target this age group i.e. infectious disease endocrinology pulmonary medicine nephrology gastroenterology thoracic and abdominal surgery urology otolaryngology and neurosurgery New patterns of communication are advocated and endorsed as essential for productive interaction involving these specialties References are extensive and are oriented toward users in pediatric hematology oncology medical oncology radiation oncology surgical oncology gynecologic oncology oncology nursing psycho-oncology social work epidemiology public health and health services research The contributing authors are from the United States the United Kingdom Canada Italy France Israel Switzerland and Australia Germany Japan and the Netherlands p Pediatric Oncology Robert Arceci, 2006 Pediatric Oncology Compendium guidelines for clinical practice Compact presentation of commonly encountered pediatric oncological diseases and their care Pediatric oncology at a glance Optimal orientation ensured by clear and consistent layout and concise lucid style Pediatric oncology is teamwork Fundamental facts for all those involved in treatment hospital physicians specialist nurses psychooncologists and physiotherapists family doctors and pediatricians

Cancer in Adolescents and Young Adults Archie W. Bleyer, Ronald Duncan Barr, 2007-09-23 This is the first comprehensive book devoted exclusively to cancer in adolescents and young adults It compiles medical epidemiological biological psychological and emotional issues of young adults oncology The emphasis is on the differences of the same cancer in younger and older patients Model programs specially designed to care for patients in the age group and surveillance of long term adverse effects are reviewed *National Library of Medicine Current Catalog* National Library of Medicine (U.S.), 1982 **Research in Clinical Pragmatics** Louise Cummings, 2017-01-05 This is the first volume to present

individual chapters on the full range of developmental and acquired pragmatic disorders in children and adults. In chapters that are accessible to students and researchers as well as clinicians, this volume introduces the reader to the different types of pragmatic disorders found in clinical populations as diverse as autism spectrum disorder, traumatic brain injury, and right hemisphere language disorder. The volume also moves beyond these well-established populations to include conditions such as congenital visual impairment and non-Alzheimer dementias in which there are also pragmatic impairments. Through the use of conversational and linguistic data, the reader can see how pragmatic disorders impact on the communication skills of the clients who have them. The assessment and treatment of pragmatic disorders are examined, and chapters also address recent developments in the neuroanatomical and cognitive bases of these disorders.

Current Catalog National Library of Medicine (U.S.), 1982. First multi-year cumulation covers six years 1965-70. *Handbook of Acquired Communication Disorders in Childhood* B. E. Murdoch, 2011-03-01

Handbook of Clinical Behavioral Pediatrics Alan M. Gross, Ronald S. Drabman, 2013-03-07. Since 1978 the editors have collaborated on several research projects and spent many hours at conventions discussing research, graduate education, and patient care. The idea for this volume arose when we both concluded that the area of behavioral pediatrics needed a how-to book. Several important scholarly reviews had recently appeared. They presented excellent summary information concerning the general assumptions and theories underlying the area of behavioral medicine with children. But these volumes devote very little attention to the application of clinical methods. What was needed, we thought, was a book that would allow graduate students and practicing clinicians the opportunity to peer into the minds of eminent practitioners and understand their thinking. Thus the book was conceived. Editing books represents a special kind of challenge. One has to sell an idea to a group of distinguished colleagues. They have to believe enough in that idea to devote the considerable time and effort necessary to bring thought into reality. In this case there were two ideas we tried to sell to our colleagues.

Cancer Care for Adolescents and Young Adults Daniel Kelly, Faith Gibson, 2008-04-30

Cancer in Adolescents and Young Adults is a practical guide to cancer care in adolescents and young adults. It considers the impact of diagnosis on individuals and their families as well as examining the impact on the health professionals responsible for their care. There are sections focussing on the adolescent's experience of cancer and ongoing care needs during treatment and on life after cancer including rehabilitation and palliative care. Builds on the forthcoming NICE guidelines on Supportive Cancer Care for Children, Young People, and recent Department of Health guidelines policy initiatives. Adopts an integrated inter-professional approach. Contains evidence-based contributions from leading professionals in cancer care.

Cancer in Adolescents and Young Adults is an essential resource for all those involved with the provision of care and support for adolescents and young adults with cancer. About the Editors: Dr Daniel Kelly is Reader in Cancer Palliative Care, Middlesex University, London. Dr Faith Gibson is Senior Lecturer in Children's Nursing, Research Institute of Child Health, Great Ormond Street Hospital and King's College London.

Supportive Care in Cancer Therapy Donald J. Higby,2012-12-06 Where do you begin to look for a recent authoritative

article on the diagnosis or management of a particular malignancy The few general oncology textbooks are generally out of date Single papers in specialized journals are informative but seldom comprehensive these are more often preliminary reports on a very limited number of patients Certain general journals frequently publish good in-depth reviews of cancer topics and published symposium lectures are often the best overviews available Unfortunately these reviews and supplements appear sporadically and the reader can never be sure when a topic of special interest will be covered Cancer Treatment and Research is a series of authoritative volumes which aim to meet this need It is an attempt to establish a critical mass of oncology literature covering virtually all oncology topics revised frequently to keep the coverage up to date easily available on a single library shelf or by a single personal subscription We have approached the problem in the following fashion First by dividing the oncology literature into specific subdivisions such as lung cancer genitourinary cancer pediatric oncology etc Second by asking eminent authorities in each of these areas to edit a volume on the specific topic on an annual or biannual basis Each topic and tumor type is covered in a volume appearing frequently and predictably discussing current diagnosis staging markers all forms of treatment modalities basic biology and more Handbook of Depression in Children and Adolescents William M. Reynolds, Hugh F. Johnston, 2013-11-22 Anyone who has ever been close to a seriously depressed child has undoubtedly been affected by the youngster's vulnerability misery and pain Indeed it is much like caring for a child who is in physical pain For the child in the depths of depression no activity is fun nothing can be enjoyed and no one can provide enough consolation or comfort At times the youngster may cry or whimper There may be fits of defiance or rage and sometimes withdrawal into a numb sullen silence A child in this state tries the patience of parents and siblings Remedies of every sort are tried including gifts punishments bribes lectures pleading and a host of others Such efforts occasionally provide temporary relief but more often they seem to make matters worse Commonly there is an emotional wall of anger and frustration between a depressed child and other family members that may inevitably lead to further isolation and withdrawal If too much time passes without their being helped many depressed children and adolescents come to believe that suicide offers the only real relief for their pain Currently there is a Depression Awareness Week that includes free screening at participating health and mental health settings around the United States and is designed to identify depression in adults suggesting that society's awareness of depression and psychiatric disorders is focused to a large extent on adults Acquired Neurological Speech/Language Disorders In Childhood Bruce E Murdoch, 2017-07-28 The long held belief that acquired aphasia in children is primarily of the non fluent type has been challenged in recent years This book discusses language problems arising from cerebrovascular accidents occurring in childhood and from other Radiation Therapy in Pediatric Oncology J. Robert Cassady, 2012-12-06 The diagnosis of cancer in a child is a devastating finding not only to the parents but often to the child Even though the situation is relatively easy to accept among adults it is difficult to accept among children because of their general helpless state The advances that have

been made in the management of a child with cancer in the last 20 years have been dramatic in character. These have occurred not only by virtue of the contributions from early diagnosis and more precise staging but also from the contributions made by surgery, radiation therapy and the more widespread utilization of chemotherapy regimens. This volume by J Robert Cassady sets forth the position of radiation oncology in the management of the child with cancer. Radiation therapy remains an important and significant part of the treatment of this group of diseases. The book presents the basic knowledge with regards to pediatric oncology and how it relates to radiation therapy. It gives a timely overview on the topic and is essential for all radiation oncologists involved in the management of children with cancer. Hamburg Philadelphia June 1994 H P HEILMANN LUTHER W BRADY Preface This book provides a thorough review of the role that radiation therapy currently plays in the management of most childhood tumors. Extensively augmented with figures and tables where appropriate it also provides a concise review of current diagnostic and therapeutic approaches for major childhood malignancies. Extensive and up to date reference lists are an added benefit. The Cancer Patient and Supportive Care Donald J. Higby, 2012-12-06 During the course of editing Supportive Care in Cancer Therapy Martinus Nijhoff Publishers 1983 it became apparent that several topics would have to await a second volume. Furthermore development of new information and evolution of ideas continues. This volume continues the intent of the first to present reviews of issues relating to supportive care and to identify areas where further definition and further research is needed. The physician reading this volume will find the contents thought provoking. In addition to reviews authored by physicians there are chapters authored by non physicians who present a different perspective and a different style of writing. Reverend Bigler writes from his long experience as a chaplain for cancer patients and tries to identify the changes that take place in the personality of the chaplain who works with dying patients. Ms Kil lion and Ms Powell try to describe what an Oncology Nurse is rather than what one does. Attorneys Reese and Price present a very practical summation of issues which face the cancer patient and their chapter could easily be copied and offered to one's patients. Furthermore this chapter gives direction to the physician who is frequently called upon for advice regarding issues which lie entirely outside his/her formal training. Excellent reviews on more medical subjects are here. Cancer in the Elderly should provoke oncologists to re-examine their approach to the geriatric patient.
