Major Social Problems:

A Comparative Perspective on Major Social Problems Rita James Simon, 2001-01-01 In this volume Rita J Simon brings together a clearly organized and accessible collection of scholarly essays on the world's most pressing social problems. Each of the contributors address a specific issue: gambling, prisons, alcohol, AIDS, rape, juvenile justice, abortion, and guns, by examining the institutions and laws different societies have developed for containing them. Each of the countries selected represents a range of variations in political, economic, religious, ethical, social orientations and characteristics. This comparative and interdisciplinary world perspective makes Simon's edited volume uniquely relevant to political scientists, sociologists, criminologists, psychologists, and the broader audience of scholars and laypeople interested in the study of contemporary social problems.

Major Social Problems Rudolph Michael Binder, 2015-06-14 Excerpt from *Major Social Problems*: Plans and schemes by the hundred have been worked out to meet the new conditions growing out of the World War. They attack this evil and remedy that situation. On the whole, they leave us where we were because they deal with what may be called minor social problems. Underlying these minor problems are the major social problems which deal with fundamental principles and attitudes. The author has attempted to discuss these in the following pages. Unless we face the facts as we find them and try to find solutions for them, we may never succeed in evolving a better society. This task demands courage and an open mind. The author wishes to acknowledge his indebtedness directly to the late Frank Lester Ward, to Professors Franklin H. Giddings of Columbia University and Edward A. Ross of Wisconsin University, and to many other writers indirectly, although with no less

sincere appreciation The material of this book has been used in classes at New York University References and questions for each chapter have been added at the end of the volume in the hope that other teachers may find them of use in their classes About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works

Loseke,Joel Best,2017 This collection of focused essays is directed at several levels of students of social problems It is accessible to the uninitiated who are not familiar with the constructionist literature and aimed at those who are not particularly interested in subtle theoretical and empirical issues of concern to academics studying social problems from constructionist perspectives Some readings focus on the construction of problems by scientists and other professionals others examine the work of social activists mass media and social service personnel Among the topics included are studies of social inequalities and individual deviance a comparison of the images of social problems in the United States with those in other countries and an examination of the importance of politics and power in constructing public images of social problems Constructionist perspectives have become the leading theoretical approach for

sociology and allied fields in studying social problems Yet constructionists impact on the teaching of social problems has been far less dramatic Undergraduate courses on social problems are often subject to a theoretical barrage of eclectic perspectives Just as the first social problems textbooks did almost a century ago textbooks continue to present a series of unrelated chapters each devoted to a particular social problem Social Problems is an effort at systematic analysis rather than random thought on the subject Social Problems presents detailed case studies demonstrating how constructionist perspectives can actually be applied to understand particular social problems While these articles can be read alone the editors have organized these selections to correspond with the chapter topics in the second edition of Donileen Loseke's Thinking about Social Problems an accessible introduction to constructionist approaches At the same time some instructors who use this edited collection might wish to provide their own mix to the selection process Many of the contributions make multiple points and so reasonably could be used to illustrate other basic texts or classic studies in the field of social problems Donileen R Loseke is professor of sociology at the University of South Florida Joel Best is professor and chair Department of Sociology and Criminal Justice University of Delaware He has also served as an advisory editor for Aldine in the area of social problems
