Make A Difference:

Making All the Difference Martha Minow, 1990 Martha Minow here takes a hard look at the way our legal system functions She confronts a variety of dilemmas of difference resulting from contradictory legal strategies strategies that attempt to correct inequalities by sometimes recognizing and sometimes ignoring differences Minow argues in effect for a reconstructed jurisprudence based on the ability to recognize and work with perceptible forms of difference

aimed at anyone who wants to understand why change happens how it happens and what needs to be done to make change a welcome rather than a dreaded concept Dialogue and Difference in a Teacher Education Program Marilyn Johnston-Parsons, 2012-05-01 This book is a longitudinal study of a 10 year experimental teacher education program Follow up studies and writing continued for 6 years after the program closed This case study describes a search for effective and socially just practices within a long term reform initiative intended to prepare teachers for urban schools The program was run through a Professional Development School a collaboration between a university program and a diverse group of practicing teachers and the book was written collaboratively by many of the participants faculty mentor teachers doctoral students and teacher candidates graduates There are few longitudinal studies of teacher education programs especially ones that focus on what was learned and told by those who did the learning The narratives here are rich diverse and multivocal They capture the complexity of a reform initiative conducted within a democratic context It's difficult messy and as varied as is democracy itself The program was framed by a sociocultural perspective and the focus was on learning through difference Dialogue across difference which is more than just talk was both the method for doing research and the means for learning The program described here began in the ferment of teacher education reform in the early 1990s responding to the critics of the mid 1980s and this account of it is finished at a time when teacher education is again under attack from a different direction Criticized earlier for being too progressive teacher education is now seen as too conservative The longitudinal results of this program show high retention rates and ground the argument that quality teacher preparation programs for teaching in urban schools may well be cost effective as well as provide increased student learning This is counter to the current move to shorten teacher preparation programs at a time of low teacher retention in our under resourced urban schools The book does not advocate a model for teacher education but it aims to provide principles for practice that include school university collaboration democratic dialogue across differences and inquiry as a way to guide reform *Ontario. Bodone,2005 Education is a discipline that is constantly emerging and for which there are more questions than answers Beyond the research reports the articles in refereed journals and the well crafted presentations what is happening in education What difference does our work make in the lives of those we research How is education as a whole different because of our effort And what is the nature of the difference we make This book provides some answers to those questions based on engaged and critical research from around the world It is also a critical reflection on new possibilities for qualitative research its implications and relevance to educational practice Andrew Hargreaves Enora Brown Graham Hingagaroa Smith Jack Whitehead Mutindi Mumbua Andrew Gitlin Phil Carspecken and others invite readers to join the conversation and take it beyond these pages by

enriching and extending the discourse within their communities of practice *Cline Electric Manufacturing Company V. Kohler* ,1927 *The Art of War for Talent. How Companies Can Gain a Competitive Advantage by Fostering a Culture of Intrinsic Motivation and Meaningful Work* Niklas Baier,2020-04-23 Bachelor Thesis from the year 2019 in the subject Business economics Review of Business Studies grade 1 3 Technical University of Munich TUM School of Management Chair for Management Accounting language English abstract The bachelor thesis combines theories literature lab and field experiments event studies from the industry and its very own empirical research to argue from both a strategic as well as a financial perspective that an inimitable organizational culture of intrinsic motivation and meaningful work may constitute a source of competitive advantage within the War for Talent The thesis strives at highlighting the importance for firms to adapt to the newly emerged competitive environment that the ongoing War for Talent has created by considering their people as their most valuable asset for the success of the organization as already hinted at throughout *The Art of War* by Sun Tzu in 500 BC hence the reference in the title of this thesis After a brief review of the circumstances that led to the emergence of the War for Talent and first implications for the industry it is argued from a strategic perspective why motivated talent depicts the key resource for competitive advantage and why conventional extrinsic incentive measures aimed at maximizing productivity are no longer effective Afterwards a proposition will be made of how capitalizing on intrinsic motivation human s inner drive to accomplish inherently interesting and challenging tasks fostered through a framework of meaningful work might be the decisive driver to get ahead in the quest for talent A second string of argumentation draws a connection between meaningful work and superior financial performance This proposition is then tested by an empirical analysis comparing the financial performance of publicly traded companies featured on the 2017 Fortune 100 Best Companies to Work For list against a control portfolio and the broad market confirming significant differences for cumulative stock returns
