**DIGGING FOR DINOSAURS** Judy Farrell, Georgina Kucherik, 2016-01-01. Dinosaurs roamed the earth for about 160 million years. Most were quiet plant eaters. Some were fierce meat eaters. Dinosaurs were like reptiles and laid eggs. Some of their eggs turned into fossils, and so did their bones. This is how scientists have learned about them. Information sheets and activities are included in this resource to reinforce skills in reading, math, research, writing, phonics, and creativity. Some of the activities include dinosaur riddles, rhymes, rebus stories, book making, plasticine models, pipe cleaner skeleton, and many more. Challenge your beginning readers and researchers with today's most mesmerizing topic and go Digging for Dinosaurs.

*Flying Dinosaurs* John Pickrell, 2020-07-15. It will be difficult for any reader to think about dinosaurs or birds in the same ways they had before. Publishers Weekly: The discovery of stunning feathered dinosaur fossils coming out of China in the twentieth century suggests that these creatures were much more bird-like than paleontologists previously imagined. Further evidence, bones, genetics, eggs, behavior, and more, has shown a seamless transition from fleet-footed carnivores to the ancestors of modern birds. Mixing colorful portraits with news on the latest fossil findings and interviews with leading paleontologists in the United States, China, Europe, and Australia, John Pickrell explains and details dinosaurs' development of flight. This special capacity introduced a whole new range of abilities for the animals and helped them survive a mass extinction when thousands of other dinosaur species that once populated Earth did not. Pickrell also turns his journalistic eye toward the stories behind the latest discoveries, investigating the role of the Chinese black market in trading fossils, the controversies among various dinosaur hunters, the interference of national governments' intent on protecting scientific information, and the race to publish findings first that make this research such a dynamic area of science. Fascinating.
