Working with Child Abuse and Neglect Vernon R. Wiehe, 1996-06-24 How do you intervene in abusive and neglectful families or prevent maltreatment in families at risk How can you find the answers you need in the overwhelming array of information now available on the subject In *Working with Child Abuse and Neglect* author Vernon R Wiehe helps you focus by evaluating a wealth of references to current published literature and pinpointing the practical applications that put these findings into action Condensing the explosion of knowledge about child maltreatment into one provoking yet accessible primer Wiehe first offers a historical perspective on child maltreatment and an assessment of the scope of the problem He also discusses theoretical perspectives for understanding the problem and specific treatment and prevention techniques Information on state and national organizations working in the field illustrates not only the size of the problem but also the mobilized efforts to stem child abuse and neglect As well as a balanced introduction *Working with Child Abuse and Neglect* serves as a springboard to important sources of additional knowledge Ideal for upper division undergraduates as well as graduate students and anyone in the helping professions who is beginning to work with victimized children *Working with Child Abuse and Neglect* provides a sound assessment of the state of the literature and application in this expanding area of study and practice In addition the handy reference value of this volume will appeal in particular to social workers counseling and clinical psychologists and nurses

Ending the Cycle of Violence Einat Peled, Peter G. Jaffe, Jeffery L. Edleson, 1995 This work covers the complex issues involved in intervention with children of battered women and provides an overview of current practice including strategies and program models

Handbook of Family Violence Alan S. Bellack, Michel Hersen, R.L. Morrison, Vincent B. Van Hasselt, 2013-06-29 In the last decade there has been heightened clinical and investigative activity in the area of family violence This of course is partly attributable to recent surveys showing a high incidence of family violence in the United States For example there are indications that nearly 30% of married women in this country are victims of physical abuse by spouses at some point in their marriage Further FBI statistics show that approximately 13% of all homicides are husband wife killings Moreover it has been projected that such figures are likely to increase over the next several years Consistent with these trends funding of family violence research by both federal and private agencies has increased Indeed federal agencies such as the National Institute of Mental Health and the National Institute of Law Enforcement and Criminal Justice have provided considerable support for work in this area In addition family violence

particularly wife battering child abuse and sexual abuse of children has been the focus of media attention at the national level and has generated intensive interest in both lay and professional publications. Moreover, there have been several recent governmental hearings and investigations regarding the prevalence of these problems.

Abusive Policies Mical Raz, 2020-10-12 In the early 1970s a new wave of public service announcements urged parents to help end an American tradition of child abuse. The message relayed repeatedly over television and radio urged abusive parents to seek help. Support groups for parents including Parents Anonymous proliferated across the country to deal with the seemingly burgeoning crisis. At the same time an ever increasing number of abused children were reported to child welfare agencies due in part to an expansion of mandatory reporting laws and the creation of reporting hotlines across the nation. Here Mical Raz examines this history of child abuse policy and charts how it changed since the late 1960s specifically taking into account the frequency with which agencies removed African American children from their homes and placed them in foster care. Highlighting the rise of Parents Anonymous and connecting their activism to the sexual abuse moral panic that swept the country in the 1980s Raz argues that these panics and policies as well as biased viewpoints regarding race class and gender played a powerful role shaping perceptions of child abuse. These perceptions were often directly at odds with the available data and disproportionately targeted poor African American families above others.

Children at Risk Robert T. Ammerman, Michel Hersen, 2013-03-09 During the past decade a dramatic increase in research and clinical interest has risen in child abuse and neglect. This recent growth in awareness is due at least partly to the alarming statistics documenting the incidence of child maltreatment. Almost one million children are reported to be abused and neglected each year and many experts believe that this figure underestimates the true incidence. Indeed recent surveys suggest that almost 1.5 million children are the targets of domestic violence every year. A significant proportion of these children die as a function of this maltreatment whereas the remainder suffer a variety of short and long term deleterious medical and psychosocial consequences. Child maltreatment is a universal problem that has precipitated a mobilization of effort from a variety of disciplines including psychology medicine psychiatry social work sociology and criminology. Particular attention has been directed toward the prevention and treatment of child abuse and neglect. Such endeavors require the screening of large groups in order to identify families that are at high risk for engaging in such behavior. Delineating those characteristics that differentiate high from low risk families and children is one of the obvious priorities for researchers and clinicians in the future. This book therefore carefully considers the status of research on risk factors of abuse and neglect in children. Adduced data undoubtedly will have practical value for subsequent intervention efforts.

Child Abuse Brian Corby, David Shemmings, David Wilkins, 2012-11-01 This book is an accessible knowledge base for the whole area of child abuse and child protection now fully updated in terms of policy cases and research.

Child Protection in America John E.B. Myers, 2024-10-11 Child abuse and neglect are tragically common. Each year more than 1,000 American children die due to maltreatment. Thousands more suffer physical abuse sexual abuse

and neglect Across the country every community has a system of government operated and funded child protective services CPS But given that social workers of CPS have the authority to remove children from unsafe parents it is no surprise that CPS is controversial Does CPS protect children Does CPS do more good than harm Is CPS fundamentally racist as some critics argue Should CPS be abolished To answer these questions it is essential to understand the origins of child protection in America How did we arrive at the child protection system in place today This book traces the history of child protection from colonial times to the present and provides the most in depth analysis ever published of the origins of child protection

Contemporary Public Opinion Maxwell McCombs,2017-10-03 This book discusses the public opinion process with a focus on the role that the news media play in shaping public opinion Although heavily influenced by the agenda setting perspective the view that the news media define the important issues of the day and determine how these issues are presented the authors neither support nor refute this claim They present instead a variety of contemporary scholarship integrated into a coherent picture of public opinion for a general audience

Motivation and Child Maltreatment David J. Hansen,2000-01-01 In this volume the concept of motivation is used to shed light on a range of complex issues surrounding the maltreatment of children Cathy Spatz Widom investigates the role of motivation in the intergenerational transmission of violence where victimized children themselves become perpetrators of violence as adults Joel S Milner looks at the way abusive parents process social information related to children The biological psychological and social contextual regulatory processes in maltreated children are considered by Dante Cicchetti and Sheree L Toth Deborah Daro discusses the current status of efforts to eliminate maltreatment of children and offers an alternative model for approaching the concept and practice of prevention John R Lutzker addresses the challenges of and procedures for applied research on the treatment of abusive parents In his concluding essay Ross A Thompson highlights the important themes focusing on child maltreatment that underlie this volume

Policy Problems and Policy Design B. Guy Peters,2018-07-27 Public policy can be considered a design science It involves identifying relevant problems selecting instruments to address the problem developing institutions for managing the intervention and creating means of assessing the design Policy design has become an increasingly challenging task given the emergence of numerous wicked and complex problems Much of policy design has adopted a technocratic and engineering approach but there is an emerging literature that builds on a more collaborative and prospective approach to design This book will discuss these issues in policy design and present alternative approaches to design

Thinking About Social Problems Donileen Loseke,2017-07-05 The new second edition of this distinctive and widely adopted textbook brings into the classroom an overview of how images of social problems can shape not only public policy and social services but also the ways in which we make sense of ourselves and others It introduces two primary changes First some attention is devoted to the new social movements that emphasize social change through identity transformation rather than through structural change Second the text now also looks more closely at the importance of emotions in constructing

public consciousness of social problems When the first edition was published Teaching Sociology noted Loseke does a superb job explaining the relationship between sociology and social problems in a text that is very well researched and engaging yet with tremendous attention to detail and accuracy We would provide a solid base for any social problems class Contemporary Sociology wrote that the book is engagingly well written in a personal unpretentious style and well informed by the author's knowledge of the professional literature

Hiding Politics in Plain Sight Patricia Strach, 2016-08-02 As late as the 1980s breast cancer was a stigmatized disease so much so that local reporters avoided using the word breast in their stories and early breast cancer organizations steered clear of it in their names But activists with business backgrounds began to partner with corporations for sponsored runs and cause marketing products from which a portion of the proceeds would benefit breast cancer research Branding breast cancer as pink hopeful positive uncontroversial on the products Americans see every day these activists and corporations generated a pervasive understanding of breast cancer that is widely shared by the public and embraced by policymakers Clearly they have been successful today more Americans know that the pink ribbon is the symbol of breast cancer than know the name of the vice president Hiding Politics in Plain Sight examines the costs of employing market mechanisms especially cause marketing as a strategy for change Patricia Strach suggests that market mechanisms do more than raise awareness of issues or money to support charities they also affect politics She shows that market mechanisms like corporate sponsored walks or cause marketing shift issue definition away from the contentious processes in the political sphere to the market where advertising campaigns portray complex issues along a single dimension with a simple solution breast cancer research will find a cure and Americans can participate easily by purchasing specially marked products This market competition privileges even more specialized actors with connections to business As well cooperative market activism fundamentally alters the public sphere by importing processes values and biases of market based action into politics Market activism does not just bring social concerns into market transactions it also brings market biases into public policymaking which is inherently undemocratic As a result industry and key activists work cooperatively rather than contentiously and they define issues as consensual rather than controversial essentially hiding politics in plain sight

Child Abuse And Neglect Richard J. Gelles, Jane Beckman Lancaster, *Child Abuse and Neglect* is the third volume sponsored by the Social Science Research Council The goals of these volumes include the development of a biosocial perspective and its application to the interface between biological and social phenomena in order to advance the understanding of human behavior *Child Abuse and Neglect* applies the biosocial perspective to child maltreatment and maladaptation in parent child relations The biosocial perspective is particularly appropriate for investigating parent behavior since the family is the universal social institution in which children are born and reared in which cultural traditions and values are transmitted and in which individuals fulfill their biological potential for reproduction growth and development The volume examines biological substrates and social and environmental contexts as determinants of parent behavior By

identifying areas in which contemporary human parent behaviors conform with and depart from evolutionary and historical patterns and assessing the overall costs and benefits it permits their objective assessment in terms of modern circumstances In analyzing evolutionary and historical variations in parent behavior and assessing their costs and benefits the book makes possible an objective assessment of contemporary variations Its analysis of the occurrence of child abuse in past history and in other cultures and species advances our ability to predict the probability of child abuse and neglect in various social and ecological contexts
