Big Ideas in Primary Mathematics Robert Newell, 2016-11-14 Lightbulb moments for you and your pupils This book explores the big ideas in maths to help trainee teachers confidently teach the curriculum in a way that engages children and focuses on understanding rather than memory for those lightbulb moments Covering the major concepts in simple terms whilst carefully linking to the National Curriculum it shows how they can be used to enable learning and support mathematical mastery A focus on explaining misconceptions and errors will strengthen trainees and teachers own mathematical subject knowledge while also giving them the confidence to deepen their understanding of the children they teach Key topics include Problem solving reasoning and developing fluency in maths Place value and counting systems Measuring money time and weight Geometry and understanding space and shape Fractions and statistics for the primary classroom This is essential reading for anyone studying primary mathematics on initial teacher education courses including undergraduate BEd BA with QTS and postgraduate PGCE PGDE School Direct SCITT routes and also NQTs Robert Newell is a tutor in primary education at the UCL Institute of Education London

Think Big And Live To Make It Possible Litan Bhowmik, 2016-12-09 Yes it is possible Anything and everything you can think of is possible If you want to make your life a great one it is possible if you want to waste it it is also possible Life is not a gamble to risk it randomly Life is a game to play by the rules Life is too beautiful a gift to be wasted crawling on your hands and knees Make it bigger and better with immense passion and exciting dreams Develop yourself serve others and make a significant contribution to the society to attain personal immortality It is all about preparation because preparation ignites performance and performance generates result Preparation is science and

performance is art Result becomes attractive when science is practiced with art Confidence courage and creativity convert an ordinary man into an extraordinary man The life of your dream is possible if you do ordinary things in an extraordinary way It is the achievements which make a man extraordinary not heredity Transforming your dream into reality is more a matter of courage and creativity than of talent and resources Don't let fear of failure and negative criticism hold you back on the path to success fulfillment and happiness This book serves as a splendid guide to the land of abundance and opportunities It helps you unlock your true potential unleash your creativity and confidence and lead the life of choice and not mere chance

Big Ideas for Small Mathematicians Ann Kajander, 2007-08 Introducing sophisticated mathematical ideas like fractals and infinity these hands on activity books present concepts to children using interactive and comprehensible methods With intriguing projects that cover a wide range of math content and skills these are ideal resources for elementary school mathematics enrichment programs regular classroom instruction and home school programs Reproducible activity sheets lead students through a process of engaged inquiry with plenty of helpful tips along the way A list of useful terms specific to each activity encourages teachers and parents to introduce students to the vocabulary of math Projects in this first of the two Big Ideas books include Straw Structures where children get hands on experience with measurement and 3 D visualization Kaleidoscopes in which students use geometry to build a mathematical toy and Crawling Around the Mobius Strip where kids build a physical example of infinity

SUMMARY - The Tipping Point: How Little Things Can Make A Big Difference By Malcolm Gladwell Shortcut Edition, 2021-05-29 Our summary is short simple and pragmatic It allows you to have the essential ideas of a big book in less than 30 minutes As you read this summary you will discover that the tipping

point is that detail seemingly insignificant but capable of transforming an idea a trend a movement into a real viral or social epidemic You will also discover that all epidemics are based on three determining factors the triggers of epidemics look like nothing but are out of the ordinary without a target to hold on to there is no epidemic possible we can trigger an epidemic with little means What if all the radical changes we see in everyday life were nothing more than epidemics asks journalist Malcolm Gladwell Whether they are real diseases social movements or mere fads epidemics are triggered by a trigger and spread rapidly through society But not all fads become epidemics Why do only certain products or ideas cause a general craze Would it be possible to trigger an epidemic and be able to control it constructively Buy now the summary of this book for the modest price of a cup of coffee **How to Make Big Money in Your Own Small Business** Jeffrey J.

Fox,2004-05-19 Ever dream of starting your own business According to USA Today more than 47 million people want to own their own businesses and over 20 million actually do In How to Make Big Money in Your Own Small Business bestselling business author Jeffrey Fox offers sound rules to succeeding in small business whether you re running a bookstore consulting business or restaurant In short chapters that range from administration and cash flow to marketing and hiring Fox reminds entrepreneurs what s important and what s not what makes a business succeed and what causes it to fail **Big Science**

for Growing Minds Jacqueline Brooks,2015-04-25 Strong evidence from recent brain research shows that the intentional teaching of science is crucial in early childhood Big Science for Growing Minds describes a groundbreaking curriculum that invites readers to rethink science education through a set of unifying concepts or big ideas Using an integrated learning approach the author shows teachers how to use readily available low cost items to create a safe classroom setting that fosters hands on learning and exploration of real life problems The text includes classroom activities that connect science learning to mathematics technology art and literacy Book Features Shows teachers how to address fundamental biology chemistry physics and Earth science concepts using easy to find objects Describes constructivist learning environments that are aligned with emerging data on brain development Includes guidance for adopting approaches and instructional strategies consistent with NSTA NSES and NAEYC guidelines We need to celebrate the birth of this book It is a vivid embodiment of how young children learn scientific ideas when their teachers create conditions that match the ways youngsters are able to integrate meaning Constructivist practice comes to life in these pages At a time of narrow high stakes tests here is a model that preserves truly professional practice From the Foreword by Doris Pronin Fromberg Hofstra University Big Science for Growing Minds is a wonderful jam packed storehouse of research based ideas for the effective teaching of science The author is masterful in her ability to clearly explain current brain research and cognitive science studies and to exemplify the research through practical classroom applications Lawrence Lowery Professor emeritus Graduate School of Education and the Lawrence Hall of Science University of California at Berkeley **How to Make Big Decisions Wisely** Alan

Ehler,2020-02-25 Our decisions determine our lives Invest in a company that goes bankrupt and you lose your life savings

Say the wrong thing in an interview and you miss the job of the lifetime Make no decisions and you miss every opportunity In today's rapidly changing world the cost of poor decisions and no decisions is higher than ever In *How to Make Good Decisions Wisely* author and scholar Alan Ehler lays out a clear approach to making big decisions based on the Bible and recent discoveries in neuroscience and decision science He presents a simple four step process that can be followed to make any kind of decision whether personal professional or relational Making big decisions can rewrite lives careers families churches and businesses A lot is at stake Learn how to choose well

Using Mobile Technologies in the Teaching and Learning of Mathematics Nigel Calder, Kevin Larkin, Nathalie Sinclair, 2018-08-09 Mobile technologies influence the way that we interact with the world the way that we live We use them for communication entertainment information and research In education settings there has been substantial investment in mobile devices often without a concomitant investment in developing pedagogy and practices With mobile technologies evolving rapidly and the number of educational apps growing there is a need for research into how they facilitate mathematics learning Such research is of particular importance regarding how such devices may be used to open up new ways of envisaging mathematics and mathematics education and to help develop conceptual rather than procedural or declarative knowledge This volume draws upon international research and reports on a range of research projects that have incorporated mobile technologies for mathematics education It presents research on the use of mobile technologies such as iPads iPods iPhones Androids and Tablets across a diverse range of cultures year levels and contexts It examines the ways in which mobile technologies including apps might influence students engagement cognition collaboration and attitudes through the reshaping of the learning experience In addition the book presents appropriate ways to integrate mobile technologies into teaching and learning programmes It is a significant reference book for those involved with teaching mathematics or using mobile technologies in education while also offering insights and examples that are applicable to the use of digital technologies in education generally

Enjoying the Melody of Term: An Psychological Symphony within **Making Bigs With Children**

In a world taken by screens and the ceaseless chatter of quick communication, the melodic beauty and psychological symphony created by the prepared term often fade in to the background, eclipsed by the persistent sound and disruptions that permeate our lives. Nevertheless, nestled within the pages of **Making Bigs With Children** a wonderful literary value filled with raw thoughts, lies an immersive symphony waiting to be embraced. Crafted by a masterful musician of language, this interesting masterpiece conducts viewers on an emotional journey, skillfully unraveling the hidden songs and profound affect resonating within each carefully constructed phrase. Within the depths of this moving examination, we shall discover the book is main harmonies, analyze its enthralling writing model, and surrender ourselves to the profound resonance that echoes in the depths of readers souls.
