Soft Law in European Community Law Linda Senden, 2004-09-28 This book offers the first systematic investigation of the phenomenon of soft law within the framework of the EC the first pillar of the EU and its use by the European Commission and Council of Ministers It focusses upon how soft law fits into the Community legal system and how it is used and in particular how it relates to Community legislation Differentiation of the Community instruments including the instruments of soft law is often thought to enhance the effectiveness legitimacy and transparency of the Community This book asks whether soft law indeed provides a satisfactory alternative to legislation from this perspective and if so in what cases and under what conditions Furthermore the author asks to what extent the use of soft law implies good governance and throws fresh light on this very heterogeneous

phenomenon by looking at frequently used instruments in many different areas of Community law such as competition law state aid environment social policy etc in the process identifying their different characteristics aims functions and legal effects What emerges is that the conditions under which soft law is used may be problematic in relation to increasing the legitimacy effectiveness and transparency of Community action This is a work which will interest legal practitioners confronted with the use of soft law and the question of its possible legal effect in an increasing number of sectors and academics interested in the vexed question of how the increased use of soft law can be justified in a Community legal order built upon the rule of law It is also critical of developments taking place within the framework of the European Convention and the proposed European Constitution and goes beyond the immediate problems of soft law to touch upon issues such as competence legal protection division of powers between the EC and the Member States institutional balance lawmaking by the Community Courts the scope of Community legal principles and the influence of soft law on the progressive development of both Community and national law

Centralised Enforcement, Legitimacy and Good Governance in the EU Melanie Smith, 2009-09-10 Article 226 EC is the central mechanism of enforcement in the EC Treaty and has remained unchanged since the original Treaty of Rome It provides the European Commission as guardian of the Treaty with a broad power of policing Member States conduct Article 226 has been traditionally characterised as an arena of secretive negotiation focused on the sole function of effective enforcement This study seeks to move beyond this approach by characterising Article 226 as a multi functional mechanism within the Treaty It does this by examining the central mechanism of enforcement through the normative lenses of legitimacy good administration and good governance Centralised Enforcement Legitimacy and Good Governance in the EU is interdisciplinary in nature examining law in its political context It focuses on how the institutions interact and react to competing policy pressures and explores the tensions that lie at the heart of legitimacy in the actions of public actors by engaging with concepts such as democracy legitimacy and good administration Scholars and policy makers whose work explores Article 226 will find this work especially relevant It will also appeal to those who are interested in enforcement and regulation in the international EU arena as well as those whose work considers concepts such as good governance legitimacy and accountability in the EU It is also relevant to scholars engaged in the study of institutions and processes of interaction and change

Commission has not been able adequately to perform its control function **The Palgrave Handbook of the European Administrative System** M. Bauer, J. Trondal, 2015-01-28 Drawing on research from the administrative sciences and using organizational institutional and decision making theories this volume examines the emerging bureaucratic framework of the EU and highlights that analyzing the patterns and dynamics of the EU's administrative capacities is essential to understand how it shapes European public policy **Decision-Making under Ambiguity and Time Constraints** Reimut Zohlnhöfer, Friedbert W. Rüb, 2016-02-24 Policy issues have grown ever more complex and politically more contestable. So governments in advanced democracies often do not understand the problems they have to deal with and do not know how to solve them. Thus rational problem solving models are highly unconvincing. Conversely the Multiple Streams Framework starts out from these conditions which has led to increasing interest in it. Nevertheless there has not yet been a systematic attempt to assess the potential of such scholarship. This volume is the first attempt to fill that gap by bringing together a group of international scholars to assess the strengths and weaknesses of the Framework from different angles. Chapters explore systematically and empirically the Framework's potential in different national contexts and in policy areas from climate change and foreign policy to healthcare and the welfare state **The Politics of Europeanization** Kevin Featherstone, Claudio M. Radaelli, 2003-06-05 The Politics of Europeanization looks at the political aspects of European integration from the point of view of domestic politics. In doing so it goes beyond the classic analysis of how policies are made in Brussels and raises instead the question what is the power of Europe in national contexts. The questions at the heart of this volume are crucial both for our understanding of European integration and for their policy implications. What does Europeanization really mean? How can it be measured? How is the European Union affecting domestic politics and policies in member states and candidate countries? Is Europeanization an irreversible process? Does it mean convergence across Europe? How and why do differences remain? The contributors explain and question the power of Europe by providing theoretical and empirical perspectives on domestic politics and institutions, government and administration, public policies, political actors and business groups. The volume contains a new research agenda for the nascent literature on Europeanization *The SAGE Handbook of European Union Politics* Knud Erik Jørgensen, Mark Pollack, Ben Rosamond, 2007-01-03 This volume is one to which anyone trying to make sense of the EU of the early 21st century will return again and again. A terrific line up that combines diverse talents from North America and Europe. Few books of this kind could live up to the billing: definitive benchmark, but this one certainly does. John Peterson, University of Edinburgh. A most useful book that can be highly recommended. A strong analytical framework coupled with unparalleled coverage of the major issues of the political science research of the EU makes this volume a formidable tool for teaching and a significant input to new scholarly research. It is both relatively sophisticated and very accessible to graduate students and advanced researchers. The clear writing style and the richness of information presented will certainly make this book interesting for non-academic readers. Igor Vidacak

The European Union and Turkey Mehmet Ugur, 2019-05-23 First published in 1999 this volume draws on the theories of integration credible policy commitments and convergence this book demonstrates that the problematic evolution of the EU Turkey relations has been due to an anchor credibility dilemma neither Turkey's European orientation was a credible commitment nor was the EU's anchoring capacity resolute enough to make policy reversals in Turkey less likely The way out of this dilemma is to re write the existing contracts so that non transparency and the scope for discretion are minimised
