Making Hate:

Making Hate Pay Tyler O'Neil, 2020-01-20 The Southern Poverty Law Center started with noble intentions and has done much good over the years but a pernicious corruption has undermined the organization's original mission and contributed to a climate of fear and hostility in America. Hotels, web platforms and credit card companies have blacklisted law-abiding Americans because the SPLC disagrees with their political views. The SPLC's false accusations have done concrete harm costing the organization millions in lawsuits. A deranged man even attempted to commit mass murder having been inspired by the SPLC's rhetoric. How did a civil rights group dedicated to saving the innocent from the death penalty become a pernicious threat to America's free speech culture? How did an organization dedicated to fighting poverty wind up with millions in the Cayman Islands? How did a civil rights stalwart find itself accused of racism and sexism? **Making Hate Pay** tells the inside story of how the SPLC yielded to many forms of corruption and what it means for free speech in America today. It also explains why Corporate America, Big Tech, government and the media are wrong to take the SPLC's disingenuous tactics at face value and the serious damage they cause by trusting this corrupt organization. **Home-grown Hate** Abby L. Ferber, 2004 First Published in 2004 Routledge is an imprint of Taylor Francis, an informal company.

Regulating Hate Speech Created by Generative AI Jay Liebowitz, 2024-08-02 **Regulating Hate Speech Created by Generative AI** explores the new hybrid space of Human Machine Interaction (HMI) in which hate speech is represented and computed through algorithms and AI generative systems. The book is exploratory because there are still many problem-solving challenges to be faced. It is also innovative because it is not assuming that solutions lie only in technological advancements but on a broader scale. In this sense, large language models can and are being considered from a holistic view, i.e. from the different dimensions and layers of regulatory and legal governance. Highlights of the book include: Generative AI and social engines of hate; An introduction to generative Artificial Intelligence; application trends and ethics; The mechanics and validation of generative AI outcomes; An evaluation of Generative AI for hate speech detection; Best practices and key considerations for AI regulation; Using GenAI capabilities for early detection of threats in the digital environment. This book is a hard look at ways to regulate generative AI to reduce online hate and secure justice in a digital environment. Featuring research and offering practical guidelines, the book examines guidelines for regulating generative AI models so they do not contribute to online hate, disinformation and imagery.

The Globalization of Hate Jennifer Schweppe, Mark Austin Walters, 2016 **The Globalisation of Hate: Internationalising Hate Crime** is the first book to examine the impact of globalisation on our understanding of hate speech and hate crime. Bringing together internationally acclaimed scholars with researchers, policy makers and practitioners from across the world, it critically scrutinises the concept of hate crime as a global phenomenon, seeking to examine whether hate crime can or should be conceptualised within an international framework and if so, how this might be achieved. Beginning with the global dynamics of hate, the contributions analyse whether hate crime can be defined globally, whether universal

principles can be applied to the phenomenon how hatred is spread and how it impacts upon our global society The middle portion of the book moves beyond the broader questions of globalisation to jurisdictional examples of how globalisation impacts upon our understanding of and also our responses to hate crime The chapters explore in greater detail what is happening around the world and how the international concepts of hate crime are being operationalised locally drawing out the themes of globalisation and internationalisation that are relevant to hate crime as evidenced by a number of jurisdictions from Europe the US Asia and Africa The final part of the book concludes with an examination of the different ways in which hate speech and hate crime is being combatted globally International law internet regulation and the use of restorative practices are evaluated as methods of addressing hate based conflict with the discussions drawn from existing frameworks as well as exploring normative standards for future international efforts Taken together these innovative and insightful contributions offer a timely investigation into the effects of hate crime offering an interdisciplinary approach to tackling what is now a global issue It will be of interest to scholars and students of criminology sociology and criminal justice as well as criminal justice practitioners police officers and policy makers

Stirring Up Hatred Jen Neller, 2022-12-03 This book critically examines the development of the stirring up hatred offences which are currently found within the UK's Public Order Act 1986 Through a critical discourse analysis of key excerpts of parliamentary Hansard the book constructs a detailed genealogy of the offences from the perspectives that shaped them A novel application of theory on myth is used to navigate the complex arguments and to trace ideas about identity and order across parliamentary debates from fears of Fascism in the 1930s to condemnations of homophobia in the early 21st century The story of the stirring up hatred offences told in this book therefore extends far beyond the traditional frame of a dilemma between regulating hate speech and safeguarding free speech it is inextricably entwined with myths about law race and national identity and speaks to wider themes of coloniality neoliberalism white entitlement British Christian exceptionalism and the innocence of law Written in an accessible and engaging style this book challenges a wide range of assumptions about hate speech law and raises a series of considerations for developing forms of accountability that are less complicit in the harms that they are supposed to redress
