Making Mountains:

Making Mountains David Stradling, 2009-11-23 For over two hundred years the Catskill Mountains have been repeatedly and dramatically transformed by New York City In *Making Mountains* David Stradling shows the transformation of the Catskills landscape as a collaborative process one in which local and urban hands capital and ideas have come together to reshape the mountains and the communities therein This collaboration has had environmental economic and cultural consequences Early on the Catskills were an important source of natural resources Later when New York City needed to expand its water supply engineers helped direct the city toward the Catskills claiming that the mountains offered the purest and most cost effective waters By the 1960s New York had created the great reservoir and aqueduct system in the mountains that now supplies the city with 90 percent of its water The Catskills also served as a critical space in which the nation's ideas about nature evolved Stradling describes the great influence writers and artists had upon urban residents especially the painters of the Hudson River School whose ideal landscapes created expectations about how rural America should appear By the mid 1800s urban residents had turned the Catskills into an important vacation ground and by the late 1800s the Catskills had become one of the premiere resort regions in the nation In the mid twentieth century the older Catskill resort region was in steep decline but the Jewish Borscht Belt in the southern Catskills was thriving The automobile revitalized mountain tourism and residence and increased the threat of suburbanization of the historic landscape Throughout each of these significant incarnations urban and rural residents worked in a rough collaboration though not without conflict to reshape the mountains and American ideas about rural landscapes and nature *The Mountains That Remade America* Craig H. Jones, 2020-02-25 From ski towns to national parks fresh fruit to environmental lawsuits the Sierra Nevada has changed the way Americans live Whether and where there was gold to be mined redefined land mineral and water laws Where rain falls and where it doesn't determines whose fruit grows on trees and whose appears on slot machines All this emerges from the geology of the range and how it changed history and in so doing changed the country *The Mountains That Remade America* combines geology with history to show how the particular forces and conditions that created the Sierra Nevada have effected broad outcomes and influenced daily life in the United States in the past and how they continue to do so today Drawing connections between events in historical geology and contemporary society Craig H Jones makes geological science accessible and shows the vast impact this mountain range has had on the American West *The Making of The Wandering Earth* Jiaren Wang, Regina Kanyu Wang (Storycom), 2022-03-15 This handbook takes us through the making of *The Wandering Earth* one of the highest grossing non English films of all time It is a rare in depth behind the scenes study of the making of a masterpiece taking the reader through the entire production process of a landmark Chinese science fiction film The book brings to life how *The Wandering Earth* was created from words to images by a young and innovative professional team assembled by director Frant Gwo It discusses specialized details of the filmmaking process and the collaborative work of the

crew and the cast involved to present an intuitive feeling of the film's production. A step by step guide on the making of a radical large scale film, this handbook critically examines its various stages such as its development and production stages, the planning, preparing, recruiting, setting up departments and processes, writing the screenplay, creating a visual style and the production design and the principal photography, its challenging post production stages, the editing, visual effects, production color mixing, dubbing, sound editing, publicity etc. Further, the chapters in volume also explore how Chinese science fiction films disrupt the Western narrative context and provide the larger discourse on Chinese science fiction. Richly illustrated with exclusive first hand visuals from the making of the film, this handbook, part of the Studies in Global Genre Fiction series, will be an essential read for professionals, scholars, researchers and students of film and media production, film studies, popular culture, cultural studies, Chinese studies, world literature and science fiction. It will also be of interest to the general reader interested in filmmaking.

Can't See the Wood for the Trees? Alison Smith, 2018-08-21. A guide to using the metaphorical language of a stuck situation to discover the solution. Shares an easy fun process of exploring well known sayings as a means to identify new solutions and get unstuck in life and work. Explains how to bring clarity to a problem, highlight alternative perspectives, bypass any conscious resistance to finding a solution and allow solutions to emerge organically from within ourselves. Details the author's Landscaping Your Life method, which has been used successfully in business strategy development, team development, project problem resolution and in one to one coaching. If you can't see the wood for the trees, feel like a fish out of water or are going around in circles, we've got good news for you: that saying is also a clue to where you'll find the solution. Yes, you read right: you can use the language you're using to describe the stuck situation to discover the solution. It's not even the language as much as the landscape contained within your description of the situation that can give you pointers. As Alison Smith explains, "If a picture paints a thousand words, then a metaphor paints a thousand pictures." In other words, the metaphor in the saying you're using will provide a million words that will undoubtedly have the solution contained within them. That's what this book is all about: taking these sayings that you're using to describe being stuck and using them to get unstuck again. The language you apply provides clues to how you perceive the current situation. Subconsciously, you know the solution. Exploring the metaphors contained within your language allows your subconscious to communicate to your conscious awareness more easily. The metaphor reduces resistance and the barriers we put up to change. It's as if we enjoy exploring the metaphor and forget what it means in reality and before we know it, we have a metaphorical solution that we cannot help but translate into real life. Offering an effective, easy process based on the power of metaphors, Alison Smith introduces her Landscaping Your Life method as a means to bring clarity to a problem, highlight alternative perspectives and allow solutions to emerge organically from within ourselves.

The Origin of Mountains Cliff Ollier, Colin Pain, 2004-08-02 The Origins of Mountains approaches mountains from facts about mountain landscapes rather than theory The book illustrates that almost everywhere mountains arose by vertical uplift of a former plain and by a mixture of cracking and warping by earth movements and erosion by rivers and glaciers the present mountainous landscapes were created It also gives evidence that this uplift only occurred in the last few million years a time scale which does not fit the plate tectonics theory Another fascinating part of the evidence shows that mountain uplift correlates very well with climatic change Mountain building could have been responsible for the onset of the ice age It certainly resulted in the creation of new environments Fossil plants and animals are used in places to work out the time of mountain uplift which in turn helps to explain biogeographical distributions
