Kway Nicole Tarulevicz, 2013-12-15 Discovering Singaporean identity through cooking and cuisine While eating is a universal experience for Singaporeans it carries strong national connotations The popular Singaporean English phrase Die die must try is not so much hyperbole as it is a reflection of the lengths that Singaporeans will go to find great dishes In *Eating Her Curries and Kway A Cultural History of Food in Singapore* Nicole Tarulevicz argues that in a society that has undergone substantial change in a relatively short amount of time food serves Singaporeans as a poignant connection to the past Eating has provided a unifying practice for a diverse society a metaphor for multiracialism and recognizable national symbols for a

fledgling state Covering the period from British settlement in 1819 to the present and focusing on the post 1965 postcolonial era Tarulevicz tells the story of Singapore through the production and consumption of food Analyzing a variety of sources that range from cookbooks to architectural and city plans Tarulevicz offer a thematic history of this unusual country which was colonized by the British and operated as a port within Malaya Connecting food culture to the larger history of Singapore she discusses various topics including domesticity and home economics housing and architecture advertising and the regulation of food related manners and public behavior such as hawking littering and chewing gum Moving away from the predominantly political and economic focus of other histories of Singapore Eating Her Curries and Kway provides an important alternative reading of Singaporean society

Three Squares
 Abigail Carroll, 2013-09-10 We are what we eat as the saying goes but we are also how we eat and when and where Our eating habits reveal as much about our society as the food on our plates and our national identity is written in the eating schedules we follow and the customs we observe at the table and on the go In Three Squares food historian Abigail Carroll upends the popular understanding of our most cherished mealtime traditions revealing that our eating habits have never been stable far from it in fact The eating patterns and ideals we've inherited are relatively recent inventions the products of complex social and economic forces as well as the efforts of ambitious inventors scientists and health gurus Whether we're pouring ourselves a bowl of cereal grabbing a quick sandwich or congregating for a family dinner our mealtime habits are living artifacts of our collective history and represent only the latest stage in the evolution of the American meal Our early meals Carroll explains were rustic affairs often eaten hastily without utensils and standing up Only in the nineteenth century when the Industrial Revolution upset work schedules and drastically reduced the amount of time Americans could spend on the midday meal did the shape of our modern three squares emerge quick simple and cold breakfasts and lunches and larger sit down dinners Since evening was the only part of the day when families could come together dinner became a ritual as American as apple pie But with the rise of processed foods snacking has become faster cheaper and easier than ever and many fear for the fate of the cherished family meal as a result The story of how the simple gruel of our forefathers gave way

to snack fixes and fast food Three Squares also explains how Americans eating habits may change in the years to come Only by understanding the history of the American meal can we help determine its future *Networks of Design* Jonathan Glynne, Fiona Hackney, Minton, Viv, 2010-06 *Networks of Design* maps a new methodological territory in design studies conceived as a field of interdisciplinary inquiry and practice informed by a range of responses to actor network theory It brings together a rich body of current work by researchers in the social sciences technology material culture cultural geography information technology and systems design and design theory and history This collection will be invaluable to students and researchers in many areas of design studies and to design practitioners receptive to new and challenging notions of what constitutes the design process Over ninety essays are thematically organised to address five aspects of the expanded notions of mediation agency and collaboration posited by network theory Ideas Things Technology Texts and People The collection also includes an important new essay on rethinking the concept of design by Bruno Latour one of the most influential figures in the philosophy and sociology of science and technology and a pioneer of actor network theory and essays deriving from forum discussions involving designers and designer makers responsive to actor network theory Rather than an anthology of previously published essays *Networks of Design* presents work in progress on design theory and its applications It is the outcome of a live and vigorous debate on the possibilities and actualities offered by actor network led conceptualisations of the relationships and processes constituting design All the essays many collaborative derive from papers presented at the international conference of the Design History Society held at University College Falmouth UK in the Autumn of 2008 **Food and Knowledge in Renaissance Italy** Deborah L Krohn, 2016-04-15 Though Bartolomeo Scappi's *Opera* 1570 the first illustrated cookbook is well known to historians of food up to now there has been no study of its illustrations unique in printed books through the early seventeenth century In *Food and Knowledge in Renaissance Italy* Krohn both treats the illustrations in Scappi's cookbook as visual evidence for a lost material reality and through the illustrations including several newly discovered hand colored examples connects Scappi's *Opera* with other types of late Renaissance illustrated books What emerges from both of these approaches is a new way of thinking about the place of cookbooks in the history of knowledge Krohn argues that with the increasing professionalization of many skills and trades Scappi was at the vanguard of a new way of looking not just at the kitchen as workshop or laboratory but at the ways in which artisanal knowledge was visualized and disseminated by a range of craftsmen from engineers to architects The recipes in Scappi's *Opera* belong on the one hand to a genre of cookery books household manuals and courtesy books that was well established by the middle of the sixteenth century but the illustrations suggest connections to an entirely different and emergent world of knowledge It is through study of the illustrations that these connections are discerned explained and interpreted As one of the most important cookbooks for early modern Europe the time is ripe for a focused study of Scappi's *Opera* in the various contexts in which Krohn frames it book history antiquarianism and visual studies *Meals in Science*

and Practice H L Meiselman, 2009-03-26 The meal is the key eating occasion yet professionals and researchers frequently focus on single food products rather than the combinations of foods and the context in which they are consumed Research on meals is also carried out in a wide range of fields and the different disciplines do not always benefit from each others expertise This important collection presents contributions on meals from many perspectives using different methods and focusing on the different elements involved Two introductory chapters in part one summarise the key findings in *Dimensions of the Meal* the first book to bring an interdisciplinary perspective to meals and introduce the current publication by reviewing the key topics discussed in the following chapters Parts two to four then consider how meals are defined studied and taught Major considerations include eating socially and eating alone the influence of gender and the different situations of home restaurant and institutional settings Part five reviews meals worldwide with chapters on Brazilian Indian Chinese and Thai meals among others The final parts discuss meals from further perspectives including those of the chef product developer and meal setting designer With its distinguished editor and international team of contributors *Meals in science and practice* is an informative and diverse reference for both professionals and academic researchers interested in food from disciplines such as food product development food service nutrition dietetics sociology anthropology psychology public health medicine and marketing Summarises key findings in dimensions of the meal Considers how meals are defined studied and taught including eating alone and socially and the influence of gender Reviews the meaning of meals in different cultures

Eating Culture Gillian Crowther, 2018-05-15 From ingredients and recipes to meals and menus across time and space *Eating Culture* is a highly engaging overview that illustrates the important role that anthropology and anthropologists have played in understanding food as well as the key role that food plays in the study of culture The new edition now with a full color interior introduces discussions about nomadism commercializing food food security and ethical consumption including treatment of animals and the long term environmental and health consequences of meat consumption *Grist to the Mill* sections at the end of each chapter provide further readings and *Food for Thought* case studies and exercises help to highlight anthropological methods and approaches By considering the concept of cuisine and public discourse this practical guide brings order and insight to our changing relationship with food
