Making Capitalism In China:

Making Capitalism in China You-tien Hsing, 1998-04-30 Even as relations between Taiwan and the People's Republic of China continue to be strained investment by Taiwanese businesses in China is growing every year Between 1978 and 1994 Taiwan businesses invested 10 billion in China 10% of the total foreign investment during that period This study describes the magnitude and importance of this investment Hsing demonstrates the role of a shared cultural heritage and language and the role of Chinese local government in building networks of firms in the two countries

As such, it will prove a fascinating and thought provoking read for undergraduates, postgraduate students and researchers within economics, Asian studies, development studies and geography.

The Making of China's Foreign Policy in the 21st century Suisheng Zhao, 2018-02-02. This book is a study of the making of foreign policy of China, a rising power in the 21st century. It examines three sets of driving forces behind China's foreign policy making. One is historical sources including the selective memories and reconstruction of the glorious empire with an ethnocentric world outlook and the century of humiliation at the hands of foreign imperialist powers. The second set is domestic institutions and players, particularly the proliferation of new party and government institutions and players such as the national security commission, foreign policy think tanks, media and local governments. The third set is Chinese perception of power relations, particularly their position in the international system and their position relations with major powers. This book consists of articles from the *Journal of Contemporary China*.

Chinese Capitalisms Y. Chu, 2010-01-13. In *Chinese Capitalisms*, experts examine the rise of capitalism on China and Taiwan, analyzing impacts exerted by global capitalism, Chinese civilization and remnants of socialist practice. In focusing on these, they also address longstanding issues such as Weber's China Thesis, state-business relationships and China's civil society among others.

Marxism and the Making of China J. Gregor, 2014-02-19. An assessment of the influence of the Marxism of Karl Marx and Friedrich Engels on revolutionary developments in China. The work covers the period from the first appearance of the Chinese Communist Party under Mao Zedong until its full transformation by Deng Xiaoping into a nationalist developmental single party developmental dictatorship.

Internationalizing China David Zweig, 2018-05-31. China began opening to the outside world in 1978. This process was designed to remain under the state's control. But the relative value of goods and services inside and outside China drove cities, enterprises, local governments and individuals with comparative advantage in international transactions to seek global linkages. These contacts, David Zweig asserts, led to the deregulation of China's mercantilist regime. Through extensive field research, Zweig surveys the extraordinary changes in four sectors of China's domestic political economy: the establishment of development zones, rural joint ventures, the struggle over foreign aid and higher education. He also addresses the crucial question of whether, on balance, internationalization weakens or strengthens state power.

China's Transition from Communism - New Perspectives Guoguang Wu, Helen Lansdowne, 2015-11-06. As China moved from a planned to a market economy, many people expected that China's political system would similarly move from authoritarianism to democracy. It is now clear, however, that political liberalisation does not necessarily follow economic liberalisation. This book explores this apparent contradiction, presenting many new perspectives and new thinking on the subject. It considers the path of transition in China, historically, makes comparisons with other countries and examines how political culture and the political outlook in China are developing at present. A key feature of the book is the fact that most of the contributors are China-born, Western-trained scholars who bring

deep knowledge and well informed views to the study **China's Reforms and International Political Economy** David Zweig, Zhimin Chen, 2009-05-21 Written by an international team of experts this important and interesting text gives vital insights into China's likely development and international influence in the next decade **Christianity in Contemporary China** Francis Khok Gee Lim, 2013-05-07 Christianity is one of the fastest growing religions in China. Despite its long history in China and its significant indigenization or intertwinement with Chinese society and culture, Christianity continues to generate suspicion among political elites and intense debates among broader communities within China. This unique book applies socio-cultural methods in the study of contemporary Christianity. Through a wide range of empirical analyses of the complex and highly diverse experience of Christianity in contemporary China, it examines the fraught processes by which various forms and practices of Christianity interact with the Chinese social, political and cultural spheres. Contributions by top scholars in the field are structured in the following sections: Enchantment, Nation and History, Civil Society and Negotiating Boundaries. This book offers a major contribution to the field and provides a timely wide-ranging assessment of Christianity in Contemporary China **China's Reforms and International Political Economy**, **Understanding Globalization** Robert K. Schaeffer, 2016-01-14 Understanding Globalization introduces students to the concept of globalization, providing an essential history overview of key themes and theories and a wealth of engaging examples. The fifth edition has been completely revised to connect with students today, opening with a discussion of the far-reaching causes and effects of the recent financial crisis and including new material on global migration patterns, ISIS and more, while maintaining the book's accessible and student-friendly style. The book begins by examining the roots of the recent global financial crisis, looking at the roles of inflation, the housing crisis, Wall Street, policy makers and more. It also explores the varying impact of globalization from democratization and equality in some countries to destabilization and inequality in others. The fifth edition of Understanding Globalization is a compelling and current introduction to the myriad influences of globalization in our lives.

The Making of the State Enterprise System in Modern China Morris L. Bian, 2005-04-30 The conventional argument is that China borrowed its economic system and development strategy wholesale from the U.S.S.R. in the 1950s. Bian shows instead that basic state-owned enterprise, bureaucratic governance, management and incentive mechanisms and provision of social services and welfare developed in China during the war years 1937-1945 *Knowing China* Frank N. Pieke, 2016-07-28 Contemporary China appears both deceptively familiar and inexplicably different. China is a cauldron of forms of entrepreneurship, social organization, ways of life and governance that are at once new and unique, recognizably Chinese and generically modern. In analyzing and interpreting these developments, Frank N. Pieke adopts a China-centric perspective to move beyond Western preoccupations, desires or fears. Each chapter starts with a key question about China, showing that such questions and assumptions are often based on a misunderstanding or misconception of what China is today. Pieke explores twenty-first century China as a unique kind of neo-socialist society combining features of state socialism.

neoliberal governance capitalism and rapid globalization Understanding this society not only helps us to know China better but takes us beyond the old dichotomies of West versus East developed versus developing tradition versus modernity democracy versus dictatorship and capitalism versus socialism

China's Urban Space Terry McGee, George C.S. Lin, Mark Wang, Andrew Marton, Jiaping Wu, 2007-10-18 China's urban growth is unparalleled in the history of global urbanization and will undoubtedly create huge challenges to China as it modernizes its society Adopting an interdisciplinary approach this book presents an overview of the radical transformation of China's urban space since the 1970s arguing that to study the Chinese urbanization process one must recognize the distinctive political economy of China After a long period as a planned socialist economy China's rapid entry into the global economy has raised suggestions that modernization in China will inevitably result in urban patterns and features like those of cities in developed market economies This book argues that this is unlikely in the short term because processes of urban transition in China must be interpreted through the lens of a unique and unprecedented juxtaposition of socialism and the market economy which is leading to distinctive patterns of Chinese urbanization Richly illustrated with maps diagrams and in depth case studies this book will be an invaluable resource to students and scholars of urban economics and policy geography and the development of China

Varieties of Capitalism, Types of Democracy and Globalization Masanobu Ido, 2012-03-29 This book combines two strands of international political economy examining how capitalism and democracy shape and are shaped by each other Although until now considered separately this path breaking book proposes an innovative view of a political economic system that inextricably links the model of capitalism to the type of democracy where continuation is mutually reinforced Advanced countries have achieved post war affluence by adopting one of two contrasting models of capitalism liberal market economies or coordinated market economies and two opposing types of democracies consensus or majoritarian democracies Expert contributors in the field consider the question of whether and how globalization is transforming the post war political economic systems of advanced countries such as Britain France Germany Italy and Japan as well as the question of how it is shaping democracy and capitalism combinations in former socialist countries in Eastern Europe and the new capitalist China The book examines various topics including party system change a political dilemma of the established party and corporate governance reforms to posit an original an innovative theory of international political economy Variety of Capitalism Types of Democracy and Globalization will be of interest to students and scholars of comparative politics political economy and globalization

The Global Rise of China Alvin Y. So, Yin-Wah Chu, 2015-12-08 This book sets out to unravel and explain the puzzle of the global rise of China how in just forty years China has been quickly transformed from a poor backward third world country to one of the world's core economic powerhouses Exactly how did this Chinese developmental miracle happen Focusing on the key historical turning point in China's post socialist development the book examines the complex processes through which China interacted with the global neoliberal project of the late twentieth century Alvin Y So and Yin Wah Chu reveal the centrality of

the communist party state in propelling China onto the world scene and how it has successfully responded to the developmental challenges of technological upgrading environmental degradation inter state rivalry and maintaining its power This book provides a comprehensive and insightful study of the rise of China not solely from an economic social and political perspective but also from a global and historical perspective It will be an invaluable guide for students and non specialists interested in post socialist development and the global rise of China in the twenty first century

China's Regulatory State Roselyn Hsueh Romano, 2011-10-15 Today s China is governed by a new economic model that marks a radical break from the Mao and Deng eras it departs fundamentally from both the East Asian developmental state and its own Communist past It has not however adopted a liberal economic model China has retained elements of statist control even though it has liberalized foreign direct investment more than any other developing country in recent years This mode of global economic integration reveals much about China s state capacity and development strategy which is based on retaining government control over critical sectors while meeting commitments made to the World Trade Organization In China s Regulatory State Roselyn Hsueh demonstrates that China only appears to be a more liberal state even as it introduces competition and devolves economic decisionmaking the state has selectively imposed new regulations at the sectoral level asserting and even tightening control over industry and market development to achieve state goals By investigating in depth how China implemented its economic policies between 1978 and 2010 Hsueh gives the most complete picture yet of China s regulatory state particularly as it has shaped the telecommunications and textiles industries Hsueh

contends that a logic of strategic value explains how the state with its different levels of authority and maze of bureaucracies interacts with new economic stakeholders to enhance its control in certain economic sectors while relinquishing control in others. Sectoral characteristics determine policy specifics although the organization of institutions and boom-bust cycles influence how the state reformulates old rules and creates new ones to maximize benefits and minimize costs after an initial phase of liberalization. This pathbreaking analysis of state goals, government-business relations and methods of governance across industries in China also considers Japan's, South Korea's and Taiwan's manifestly different approaches to globalization.
